Financial Services Cloud Object Reference Guide

Salesforce, Summer '16

CONTENTS

USAGE OF FINANCIAL SERVICES CLOUD FIELDS AND OBJECTS

Refer to the fields and objects that extend Salesforce for Financial Services Cloud. They are available in API version 37.0 for the Financial Services Cloud managed package version 2.0.

Fields and objects in the package have the `FinServ` namespace prefix. For example, `FinServ__IndividualId__c` is a custom field on Account. `FinServ__FinancialAccount__c` is a custom object. To refer to the standard Salesforce objects, see the *Object Reference for Salesforce*.

Some fields may not be listed for some objects. To verify the complete list of fields for an object, use a describe call from the API, inspect the WSDL, or use a schema viewer.
