

WHAT'S NEW WITH CONNECT FOR OFFICE?

Current Release Information

Force.com Connect for Office v1.8.1.6 includes the following updates:

- Updated certificates that ensure the authenticity of Connect for Office until 2018 for Microsoft® Word and Excel users. Users must upgrade to Connect for Office v1.8.1.6 to continue using Connect for Office. (W-3708154)
- Starting on March 4, 2017, Connect for Office will no longer be supported. To avoid service disruption, we recommend that you upgrade reps to an alternative product. For more information, see: [Connect for Office: End of Support Pending, Customer Action Required](#)

Previous Release Information

Force.com Connect for Office v1.8.1.5 includes the following updates:

- Updated certificates that ensure the authenticity of Connect for Office until 2017 for Microsoft® Word 2007 users. Users must upgrade to Connect for Office v1.8.1.5 or later to continue using Connect for Office with Word 2007. (W-2511883)

Force.com Connect for Office v1.8.1.4 includes the following update:

- Updated certificates that ensure the authenticity of Connect for Office until early 2017. All users must upgrade to the latest version to continue using Connect for Office. (W-2503514)

Force.com Connect for Office v1.8.1.3 includes the following updates:

- Updated certificates that ensure the authenticity of Connect for Office until early 2015. All users must upgrade to the latest version to continue using Connect for Office. (W-1558047)

Force.com Connect for Office v1.8.1.2 includes the following updates:

- Updated the security certificate for the Foghorn libraries for Connect for Office. (W-763023)
- The Refresh All Reports option now only works if users first select a report. (W-761264)

Force.com Connect for Office v1.8.1.1 includes the following updates:

- Updated the Connect for Office version number in the Salesforce About dialog box in Microsoft Excel and Microsoft Word. (W-750105)

Force.com Connect for Office v1.8.1.0 includes the following updates:

- Updated the security certificate for Connect for Office. All users must upgrade to the latest version to avoid receiving a security popup regarding an expired certificate. (W-744150)
- Fixed an issue that caused Connect for Office to highlight the wrong row when a report was refreshed. (W-686018)

Force.com Connect for Office v1.8.0.8 includes the following updates:

- Fixed the Refresh Reports feature so all imported reports refresh correctly. (W-636839)

Force.com Connect for Office v1.8.0.7 includes the following updates:

- Updated the security certificate for Connect for Office. Users will no longer receive a security popup regarding an expired certificate. (W-625297)

What's New with Connect for Office?

Force.com Connect for Office v1.8.0.6

- Fixed an issue in which Excel pivot tables that were based on Salesforce report data did not refresh correctly when users selected the **Refresh Existing Reports...** option.

Force.com Connect for Office v1.8.0.5

- Fixed the issue for certain Office 2007 users where an error message popped up and the Salesforce Word or Excel plug-in was disabled when they opened Word or Excel applications.
- Removed the errant menu options related to Connect for Office that appeared under the **Insert > AutoText** menu in Word.

Force.com Connect for Office v1.8.0.4

- Fixed an issue where an Excel plug-in occasionally generated a run-time Visual Basic error.

Force.com Connect for Office v1.8.0.2

- All unitoolbox controls were replaced with standard Microsoft controls. This includes edit boxes, list boxes, and buttons.
