FINANCIAL SERVICES CLOUD DEVELOPER GUIDE

Use the fields, objects, and metadata that extend Salesforce for Financial Services Cloud. Apex trigger information is also provided.

Fields and objects in the package have the `FinServ` namespace prefix. For example, `FinServ__IndividualId__c` is a custom field on Account. `FinServ__FinancialAccount__c` is a custom object. To refer to the standard Salesforce objects, see the [Object Reference for Salesforce](#).

Note: The custom objects, components, classes, and triggers delivered in the Financial Services Cloud managed package are one API version behind the core Salesforce API. Financial Services Cloud standard objects have the same API version as core Salesforce. For example, if your org's API version is 43, the custom objects in the Financial Services Cloud managed package are API version 42, and the standard Financial Services Cloud objects are API version 43.

FINANCIAL SERVICES CLOUD STANDARD AND CUSTOM OBJECTS

Account Custom Fields

Represents information about an individual that pertains to their dealings with your firm, such as their review frequency or service tier. Custom fields extend the standard Account object for use in Financial Services Cloud.

Fields

Field Name	Details

TotalPremium__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Policyholder's total annual premium.
WalletShare__c	Type percent Properties Create, Filter, Nillable, Sort, Update

Field Name	Details
	Description Read only. Percentage of this individual's financial assets that your company manages or administers. Calculated as the percent of financial accounts that are held (<code>FinancialAccount__c.HeldAway</code> is <code>false</code>).

AccountAccountRelation

Represents a relationship between two accounts, such as between a household and a business account.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Account__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Account that <code>RelatedAccount__c</code> is related from.
Active__c	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the relationship is active (<code>true</code>) or not (<code>false</code>). The default value is <code>true</code> .
CurrencyIsoCode	Type picklist Properties Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update Description If multiple currencies is enabled, contains the currency ISO code associated with the record.

Field	Details
EndDate__c	<p>Type date</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Date when the relationship ended.</p>
ExternalId__c	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description ID that uniquely identifies the relationship in an external data source.</p>
InverseRelationship__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Uniquely identifies the relationship between <code>Account</code> and <code>RelatedAccount__c</code> so that it can be referenced by a trigger that creates the inverse relationship record.</p>
Name	<p>Type string</p> <p>Properties Defaulted on create, Filter, idLookup, Sort</p> <p>Description Auto-number identifier for the relationship. Label is <code>Account Relation Name</code>.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description ID of the user who created the relationship record.</p>
RelatedAccount__c	<p>Type reference</p> <p>Properties Filter, Group, Nillable, Sort</p>

Field	Details
	Description Account that Account__c is related to.
Role__c	Type reference Properties Create, Filter, Group, Sort, Update Description Role that describes how RelatedAccount__c is related to Account__c.
SourceSystemId__c	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description ID that uniquely identifies the relationship in an external data source.
StartDate__c	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Date when the relationship started.

AccountContactRelation Standard and Custom Fields

Represents the relationship between an individual (specifically the contact part of the individual) and the household (account) that the individual is a member of. AccountContactRelation is a standard object that is available through the Shared Contacts feature. Custom fields extend the AccountContactRelation standard object for use in Financial Services Cloud.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	Type reference

Field	Details
	Properties Create, Filter, Group, Sort Description ID of the household (account) that the individual is a member of.
ContactId	Type reference Properties Create, Filter, Group, Sort Description ID of the contact that partially represents the individual.
CurrencyIsoCode	Type picklist Properties Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update Description If multiple currencies is enabled, contains the currency ISO code associated with the record.
EndDate	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Date when the individual's status as a household member is no longer in effect.
IncludeInGroup__c	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Includes this account in a related individual's primary group.
IsActive	Type boolean Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description Indicates whether the individual's status as a household member is in effect (<code>true</code>) or not (<code>false</code>). Label is <code>Active</code> .

Field	Details
IsDirect	<p>Type boolean</p> <p>Properties Defaulted on create, Filter, Group, Sort</p> <p>Description Indicates whether the account-to-contact relationship is direct, which means that it relates the account and contact parts of an individual to represent a single individual (<code>true</code>). Otherwise, the relationship is indirect, which means that it relates the contact part of an individual to the household the individual belongs to (<code>false</code>). Label is <code>Direct</code>.</p>
Primary__c	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates the primary member of a group (<code>true</code>) or not (<code>false</code>).</p>
PrimaryGroup__c	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates a person's primary group. You can roll up summary fields only to a person's primary group if <code>PrimaryGroup__c</code> is set to <code>true</code>.</p>
Roles	<p>Type picklist</p> <p>Properties Create, Filter, Nillable, Update</p> <p>Description Role that the individual plays within the household. Valid values:</p> <ul style="list-style-type: none"> • Influencer • Evaluator • Business User • Technical Buyer • Economic Buyer • Other • Decision Maker • Economic Decision Maker • Executive Sponsor

Field	Details
	 Note: Replace these default picklist values with appropriate values for the roles that clients occupy within households, such as client, spouse, domestic partner, and dependent.
Rollups__c	<p>Type multipicklist</p> <p>Properties Create, Filter, Nillable, Update</p> <p>Description Records associated with the individual that are included in household roll-up summaries. Valid values:</p> <ul style="list-style-type: none"> • All • Tasks • Events • Financial Accounts • Assets and Liabilities • Financial Goals
SourceSystemId__c	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description ID that uniquely identifies the individual in an external data source.</p>
StartDate	<p>Type date</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Date when the individual's status as a household member took effect.</p>

AccountParticipant

Represents information about a participant in the context of an account record. This object is available in API version 49.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description The ID of the account related to the participant.</p>
Comments	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Notes about this participant.</p>
IsActive	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether this participant is active.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The most recent date on which a user referenced this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The most recent date on which a user viewed this record.</p>
Name	<p>Type string</p> <p>Properties Autonumber, Defaulted on create, Filter, idLookup, Sort</p>

Field	Details
	Description An automatically generated name for the participant.
ParticipantId	Type reference Properties Create, Filter, Group, Sort Description The ID of the user or group related to the participant.
ParticipantRoleId	Type reference Properties Create, Filter, Group, Sort, Update Description The ID of the object-based role for this participant.

Alert

Represents notifications to alert advisors about their client accounts.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Account__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description A lookup field to an account that alerts are related to.
Active__c	Type boolean

Field	Details
	<p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether an alert is active.</p>
FinancialAccount__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The financial account that alerts are related to.</p>
Message__c	<p>Type string</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The main content of an alert.</p>
MessageDescription__c	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description An optional description for the main content of an alert as specified in the Message__c field. This text appears below the main content.</p>
Priority__c	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Restricted picklist, Sort, Update</p> <p>Description An indication of the urgency of an alert. Valid values:</p> <ul style="list-style-type: none"> • High • Low • Medium
Severity__c	<p>Type picklist</p> <p>Properties Create, Defaulted on create, Filter, Group, Restricted picklist, Sort, Update</p>

Field	Details
	Description The type of alert. Valid values: <ul style="list-style-type: none"> Error Info Warning
SourceSystemId__c	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of a record from the external system that triggered the alert.

AssetsAndLiabilities

Represents assets or liabilities that are not represented in a client's financial accounts, such as real estate or collectibles.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Amount__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Amount of an asset (positive) or liability (negative).
AssetsAndLiabilitiesSource__c	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Data source. Label is <code>Source</code> . Valid values: <ul style="list-style-type: none"> Manual Entry

Field	Details
	<ul style="list-style-type: none"> Yodlee
AssetsAndLiabilitiesType__c	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Type of asset or liability. Label is <code>Type</code>. Valid values:</p> <ul style="list-style-type: none"> Auto Loan Mortgage Other Personal Loan Real Estate Equipment Automobile Collection Gold Jewelry Cash
CurrencyIsoCode	<p>Type picklist</p> <p>Properties Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update</p> <p>Description If multiple currencies is enabled, contains the currency ISO code associated with the record.</p>
Description__c	<p>Type textarea</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Description of this asset or liability.</p>
FinancialAccount__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Financial account that this asset or liability is related to.</p>

Field	Details
Household__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Household that this asset or liability is associated with.</p>
JointOwner__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Joint owner, if any, for this asset or liability.</p>
LastReferencedDate	<p>Type date</p> <p>Properties Filter, Nillable, Sort,</p> <p>Description Timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type date</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Timestamp for when the current user last viewed this record.</p>
Name	<p>Type string</p> <p>Properties Create, Defaulted on create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description Name of this asset or liability.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on createFilter, Group, Sort, Update</p> <p>Description ID of the user who created the asset or liability record.</p>

Field	Details
Ownership__c	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Type of ownership for this asset or liability. Valid values:</p> <ul style="list-style-type: none"> • Individual • Joint • Trust
OwnerType__c	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Client's ownership role (primary or joint) for this asset or liability. The value is specified by a trigger.</p>
PrimaryOwner__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Primary owner of this asset or liability.</p>
RecordTypeId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description ID of the record type associated with this asset or liability.</p>
SourceSystemId__c	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description ID that uniquely identifies the asset or liability in an external data source.</p>

AuthorizedInsuranceLine

Represents the insurance lines that an insurance company is authorized to sell. This object is available in API version 48.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Country	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The country where the insurance company can sell this insurance line.
InsuranceLine	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The insurance line that the insurance company is authorized to sell. Possible values are: <ul style="list-style-type: none">• Disability• Life• Property
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort

Field	Details
	Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
LegalEntityId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Legal entity ID of the insurance company that this authorization has been issued to.
Name	Type string Properties Autonumber, Defaulted on create, Filter, idLookup, Sort Description An auto-number identifier for the insurance line.
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description The ID of the record owner.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

Award

Represents a person's or organization's professional awards.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description ID of the organization receiving the award.</p>
AwardDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Date award was received.</p>
AwardedBy	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Name of the issuing organization.</p>
ContactId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Person who received the award and is listed as a contact.</p>
Identifier	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Issuing organization's identifier for the award recipient.</p>

Field	Details
IsActive	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the record is active.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The most recent date on which a user referenced this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The most recent date on which a user viewed this record.</p>
Name	<p>Type string</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description Award name.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description ID of the user who owns this record.</p>
Status	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Award status. Example values:</p>

Field	Details
	<ul style="list-style-type: none"> Inactive Revoked Draft Verified
UserId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description ID of the person who received the award and is listed as a user.</p>
VerificationStatus	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Current award status. Example values:</p> <ul style="list-style-type: none"> Authorized Pending Unverified
VerifiedDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Award was validated on this date.</p>

Banker

Represents a business unit member who is assigned the banker role for a branch unit. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
CurrentBranchId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the branch associated with this banker's current work.
CurrentBranchStartTime	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date and time when this banker made this branch assignment current.
Description	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Information about the assignment of this person to the banker role.
JobCode	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description An identifier that relates the banker to an external system.

Field	Details
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The most recent date on which a user referenced this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description</p>
Level	<p>Type picklist</p> <p>Properties Create, Defaulted on create, Filter, Group, Nillable, Sort, Update</p> <p>Description Specifies the organizational level of the banker. Possible values are:</p> <ul style="list-style-type: none">• 1• 2• 3• 4• 5• 6• 7• 8• 9• 10 <p>The default value is '1'.</p>
Name	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Sort, Update</p> <p>Description The name of this assignment of a banker to a branch.</p>

Field	Details
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description The ID of the user who owns this record.
ServiceResourceId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of a service resource that lets this user be assigned to service territories.
UserOrContactId	Type reference Properties Create, Filter, Group, Sort, Update Description The contact or user associated with the banker.

BatchCalcJobDefinitionView

Represents the details of a Data Processing Engine definition. The definition can also be a file-based definition that is available in your Salesforce org. This object is available in API version 51.0 and later.

Supported Calls

`describeSObjects()`, `query()`

Fields

Field	Details
Description	Type string Properties Filter, Group, Nillable, Sort Description The description of a Data Processing Engine definition.

Field	Details
DurableId	<p>Type string</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The unique identifier for the field. Always retrieve this value before using it, as the value isn't guaranteed to stay the same from one release to the next. Simplify queries by using this field instead of making multiple queries.</p>
InstalledPackageName	<p>Type string</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The name of the package used to add the definition to the org.</p>
IsActive	<p>Type boolean</p> <p>Properties Defaulted on create, Filter, Group, Sort</p> <p>Description Indicates whether the definition is active.</p>
IsTemplate	<p>Type boolean</p> <p>Properties Defaulted on create, Filter, Group, Sort</p> <p>Description Indicates whether the definition is a template. You can make a copy of a template definition and update it based on your requirements.</p>
LastModifiedBy	<p>Type string</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The unique identifier of the user who modified the definition last.</p>
ManageableState	<p>Type picklist</p> <p>Properties Filter, Group, Nillable, Restricted picklist, Sort</p>

Field	Details
	<p>Description</p> <p>Indicates the manageable state of the definition if it is contained in a package.</p> <p>Possible values are:</p> <ul style="list-style-type: none"> • <code>beta</code>—Managed-Beta • <code>deleted</code>—Managed-Proposed-Deleted • <code>deprecated</code>—Managed-Proposed-Deprecated • <code>deprecatedEditable</code>—SecondGen-Installed-Deprecated • <code>installed</code>—Managed-Installed • <code>installedEditable</code>—SecondGen-Installed-Editable • <code>released</code>—Managed-Released • <code>unmanaged</code>—Unmanaged
MasterLabel	<p>Type</p> <p>string</p> <p>Properties</p> <p>Filter, Group, Nillable, Sort</p> <p>Description</p> <p>The label of the Data Processing Engine definition.</p>
Name	<p>Type</p> <p>string</p> <p>Properties</p> <p>Filter, Group, Nillable, Sort</p> <p>Description</p> <p>The name of the Data Processing Engine definition.</p>
NamespacePrefix	<p>Type</p> <p>string</p> <p>Properties</p> <p>Filter, Group, Nillable, Sort</p> <p>Description</p> <p>The namespace prefix associated with this object. Each Developer Edition organization that creates a managed package has a unique namespace prefix. Limit: 15 characters. You can refer to a component in a managed package by using the <code>namespacePrefix__componentName</code> notation.</p> <p>The namespace prefix can have one of the following values:</p> <ul style="list-style-type: none"> • In Developer Edition organizations, the namespace prefix is set to the namespace prefix of the organization for all objects that support it. There is an exception if an object is in an installed managed package. In that case, the object has the namespace prefix of the installed managed package. This field's value is the namespace prefix of the Developer Edition organization of the package developer.

Field	Details
	<ul style="list-style-type: none"> In organizations that are not Developer Edition organizations, NamespacePrefix is only set for objects that are part of an installed managed package. There is no namespace prefix for all other objects.
ProcessType	<p>Type picklist</p> <p>Properties Filter, Group, Nillable, Restricted picklist, Sort</p> <p>Description The process type of the definition. Possible values are:</p> <ul style="list-style-type: none"> DataProcessingEngine—Standard Rebates Loyalty FSCHierarchyRollUp

BatchJob

Represents an instance of a batch job that is either running and has been run. This object is available in API version 51.0 and later.

Supported Calls

`describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`

Fields

Field	Details
BatchJobDefinitionId	<p>Type reference</p> <p>Properties Filter, Group, Sort</p> <p>Description The unique identifier of the associated batch job definition.</p>
BatchJobDefinitionName	<p>Type string</p> <p>Properties Filter, Group, Sort</p>

Field	Details
	Description The developer name of the associated batch job definition.
EndTime	Type dateTime Properties Filter, Nillable, Sort Description The timestamp when the batch job run was completed.
ErrorDescription	Type string Properties Filter, Nillable, Sort Description The error message in case the batch job run failed.
ExternalReference	Type string Properties Filter, Group, Nillable, Sort Description The unique identifier of the process that's running or has run the batch job.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed the batch job.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this item.
Name	Type string Properties Filter, Group, idLookup, Sort

Field	Details
	Description The name of the batch job.
OwnerId	Type reference Properties Filter, Group, Sort Description Unique identifier of the user who initiated the batch job run.
ProcessGroup	Type string Properties Filter, Group, Sort Description The group or team for which the batch job is run.
RetryCount	Type int Properties Filter, Group, Nillable, Sort Description The number of times the batch job run is automatically rerun in case it fails.
RuntimeParameter	Type textarea Properties Nillable Description The values of the input variables that are used as filter criterias in a Batch Management job.
StartTime	Type dateTime Properties Filter, Nillable, Sort Description The timestamp when the batch job run was started.
Status	Type picklist Properties Filter, Group, Restricted picklist, Sort

Field	Details
	Description The status of the batch job run. Possible values are: <ul style="list-style-type: none"> Cancelled—Canceled Completed CompletedWithFailures—Completed With Failures Failed InProgress—In Progress Submitted
Type	Type picklist Properties Defaulted on create, Filter, Group, Restricted picklist, Sort Description The type of batch job that is run. Possible values are: <ul style="list-style-type: none"> Calc—Data Processing Engine Flow

BatchJobPart

Represents one part of a batch job. This object is available in API version 51.0 and later.

When a batch job is run, it is divided in to multiple parts. Each part is used to process a specific number of records.

Supported Calls

`describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`

Fields

Field	Details
BatchJobId	Type reference Properties Filter, Group, Sort Description The unique identifier of the associated batch job.

Field	Details
EndTime	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp when the batch job part was processed.</p>
ErrorDescription	<p>Type string</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The error message in case the batch job part failed.</p>
FailedRecordCount	<p>Type int</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The number of records that the batch job part couldn't process.</p>
InputRecordCount	<p>Type int</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The number of records that the batch job part must process.</p>
Name	<p>Type string</p> <p>Properties Filter, Group, idLookup, Sort</p> <p>Description The name of the batch job part.</p>
OutputRecordCount	<p>Type int</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The number of records the batch job part has processed.</p>

Field	Details
ParentBatchJobPartId	<p>Type reference</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The unique identifier of the part batch job part associated with the batch job part.</p>
RetryCount	<p>Type int</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The number of times the batch job part is automatically rerun in case it fails.</p>
StartTime	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp when the batch job part's run was started.</p>
Status	<p>Type picklist</p> <p>Properties Defaulted on create, Filter, Group, Restricted picklist, Sort</p> <p>Description The status of the batch job part. Possible values are:</p> <ul style="list-style-type: none"> Cancelled—Canceled Completed Failed InProgress—In Progress
Type	<p>Type picklist</p> <p>Properties Filter, Group, Nillable, Restricted picklist, Sort</p> <p>Description The type of node in case the associated batch job is of the type Calc (Data Processing Engine). Possible values are:</p>

Field	Details
	<ul style="list-style-type: none"> Aggregate Append Compute Datasink Filter Join Slice Source Transform Writeback

BatchJobPartFailedRecord

Represents records that a batch job part couldn't successfully process. This object is available in API version 51.0 and later.

Supported Calls

`describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`

Fields

Field	Details
BatchJobId	<p>Type reference</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The unique identifier of the associated batch job.</p>
BatchJobPartId	<p>Type reference</p> <p>Properties Filter, Group, Sort</p> <p>Description The unique identifier of the associated batch job part.</p>
ErrorDescription	<p>Type string</p>

Field	Details
	Properties Filter, Nillable, Sort Description The error message that indicates why the batch job part couldn't process the records.
Name	Type string Properties Filter, Group, idLookup, Sort Description The name of the batch job part failed record.
Record	Type string Properties Filter, Group, Nillable, Sort Description The unique identifier of the batch record that processed the failed records.

BillingStatement

Represents a billing statement for an individual's financial account.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
BalanceTransfers__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Balance transfer details.

Field	Details
BillingPeriodEnd__c	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Billing period end date.
BillingPeriodStart__c	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Billing period start date.
CashAdvances__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Cash advance amount for the billing period.
Deposits__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Deposit made to the account during the billing period.
EndingBalance__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Balance due on the account during the billing period.
FeesCharged__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Fee charged during the billing period.

Field	Details
FinancialAccount__c	Type reference Properties Create, Filter, Group, Sort Description Financial account associated with this billing statement.
InsurancePolicy__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The insurance policy associated with the billing statement
InterestThisPeriod__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Interest charged on the account during the billing period.
InterestYTD__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Interest charged year to date.
LastPaymentDate__c	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Date of the last payment made on the account.
MinimumPaymentDue__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Minimum payment required by the due date.

Field	Details
OtherCredits__c	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Other credits made during the billing period.</p>
PastDueAmount__c	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Amount past due as of the statement date.</p>
PaymentDueDate__c	<p>Type date</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Date a payment is due.</p>
Payments__c	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Payment received since the last statement.</p>
PreviousBalance__c	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Account balance at the end of the previous billing period.</p>
Purchases__c	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Total purchases made during the current billing period.</p>

Field	Details
SourceSystemId__c	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description ID that uniquely identifies the individual in an external data source.
StatementDate__c	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Date the current statement was generated.
Withdrawals__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Cash withdrawal made during the billing period.

BranchUnit

Represents details about a branch of an organization. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	Type reference Properties Create, Filter, Group, Sort, Update

Field	Details
	Description The ID of an account that contains additional information about a branch. The value must be unique within this organization.
BranchCode	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description An identifier that relates this branch to an external system.
BranchManagerId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of a user who is the manager or main point of contact for the branch unit.
EndDate	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description The date the branch most recently stopped being active.
IsActive	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the branch is currently active and can be used for banker assignments and automatic associations. The default value is 'false'.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The most recent date when a user referenced this record.

Field	Details
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The most recent date when a user viewed this record.</p>
LocationId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of a location where the branch does business.</p>
Name	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Sort, Update</p> <p>Description</p>
OperatingHoursId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of an operating hours record that specifies the hours when the branch is open for normal business operations.</p>
OperationalState	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Specifies the operational readiness of a branch.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description The ID of the user who owns this record.</p>

Field	Details
ParentBranchUnitId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of this branch's parent branch unit, if it has one.</p>
ServiceTerritoryId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of a service territory that corresponds to this branch unit.</p>
StartDate	<p>Type date</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The date the branch most recently became active.</p>
Type	<p>Type picklist</p> <p>Properties Create, Filter, Group, Restricted picklist, Sort, Update</p> <p>Description Specifies the branch interaction type with customers. Possible values are:</p> <ul style="list-style-type: none"> Physical—The branch only operates at a physical location PhysicalAndVirtual—Physical and Virtual Virtual—The branch only operates as a virtual entity

BranchUnitBusinessMember

Represents a user or contact who can perform a specific role for a branch. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
BranchUnitId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description The ID of the branch unit associated with this assignment.</p>
BusinessUnitMemberId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description A user or contact with a predefined role that can be performed at this branch.</p>
EndDate	<p>Type date</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The date that this person stopped fulfilling this role for this branch unit.</p>
IsActive	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether this role assignment can be used for this branch unit. The default value is 'false'.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The most recent date when a user referenced this record.</p>
LastViewedDate	<p>Type dateTime</p>

Field	Details
	Properties Filter, Nillable, Sort Description The most recent date when a user viewed this record.
Name	Type string Properties Autonumber, Defaulted on create, Filter, idLookup, Sort Description The name of this branch unit business member assignment.
ServiceTerritoryMemberId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of a service territory member record for the same user who can be assigned to service appointments in a service territory.
StartDate	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description The date that this person was assigned this role for this branch unit.

BranchUnitCustomer

Represents a customer account that is assigned to or attributed to a branch unit. This object is available in API version 5.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description The ID of a customer account associated with the branch.</p>
AssociationLevel	<p>Type picklist</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates the branch's level of responsibility for managing the customer account. Possible values are:</p> <ul style="list-style-type: none"> • Primary • Secondary <p>The default value is 'Primary'.</p>
BranchUnitId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description The branch that is handling the associated customer account.</p>
LastInteractionDate	<p>Type date</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The date when the customer account was associated with the branch.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The most recent date when a user referenced this record.</p>

Field	Details
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The most recent date when a user viewed this record.
Name	Type string Properties Autonumber, Defaulted on create, Filter, idLookup, Sort Description The name of the branch unit customer relationship.

BranchUnitRelatedRecord

Represents a record such as a case or account that is associated with or attributed to a branch unit. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of a customer account associated with the related record.
BranchUnitId	Type reference Properties Create, Filter, Group, Sort

Field	Details
	Description The ID of the branch unit that's associated with the related record.
BusinessUnitMemberId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the business unit member who was active at the branch when this association was made.
Comment	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Comments about the relationship between the related record and the branch.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The most recent date when a user referenced this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The most recent date when a user viewed this record.
Name	Type string Properties Autonumber, Defaulted on create, Filter, idLookup, Sort Description The name of the branch unit related record association.
Reason	Type picklist

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description Specifies a reason or rationale for associating the record with the branch.
RelatedObjectName	Type picklist Properties Filter, Group, Restricted picklist, Sort Description The object name or record type of the related record. Possible values are: <ul style="list-style-type: none"> Account LeadLead and Referral
RelatedRecordId	Type reference Properties Create, Filter, Group, Sort, Update Description The ID of the related record.

BusinessLicense

Represents the licenses of a party role like healthcare provider or producer.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update

Field	Details
	Description ID of the organization holding the license.
ContactId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description ID of the person who holds the license and is listed as a contact.
Identifier	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description Issuer's ID for the licensee.
IsActive	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the license is active.
Issuer	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description License issuer's name.
JurisdictionCountry	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Country where license is valid.
JurisdictionOther	Type string Properties Create, Filter, Group, Nillable, Sort, Update

Field	Details
	Description Name of other jurisdiction.
JurisdictionState	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description State where license is valid.
JurisdictionType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Jurisdiction for the license. Example values: <ul style="list-style-type: none"> • State • County • Province • Country
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The most recent date on which a user referenced this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The most recent date on which a user viewed this record.
LicenseClass	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update

Field	Details
	<p>Description</p> <p>The class that the distributor's license belongs to. This field is available from API version 48.0 and later.</p> <p>Possible values are:</p> <ul style="list-style-type: none"> Insurance Producer Managing General Agent Public Adjuster
LineOfAuthority	<p>Type</p> <p>picklist</p> <p>Properties</p> <p>Create, Filter, Group, Nillable, Sort, Update</p> <p>Description</p> <p>The line of authority that the distributor is licensed for. This field is available from API version 48.0 and later.</p> <p>Possible values are:</p> <ul style="list-style-type: none"> Accident & Health or Sickness Casualty Property
Name	<p>Type</p> <p>string</p> <p>Properties</p> <p>Create, Filter, Group, idLookup, Sort, Update</p> <p>Description</p> <p>Name of the business or professional license.</p>
OwnerId	<p>Type</p> <p>reference</p> <p>Properties</p> <p>Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description</p> <p>The ID of the user who owns this record.</p>
PeriodEnd	<p>Type</p> <p>dateTime</p> <p>Properties</p> <p>Create, Filter, Nillable, Sort, Update</p> <p>Description</p> <p>License's expiration date.</p>

Field	Details
PeriodStart	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description License's effective start date.</p>
ResidenceStatus	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Residence status of the producer. This field is available from API version 48.0 and later. Possible values are:</p> <ul style="list-style-type: none"> • Non-resident • Resident
Status	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Current status of the license. Example values:</p> <ul style="list-style-type: none"> • Inactive • Revoked • Draft • Verified
UserId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Person who holds the license and is listed as a user.</p>
VerificationStatus	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p>

Field	Details
	Description Current status for the license. Example values: <ul style="list-style-type: none"> • Authorized • Pending • Unverified
VerifiedDate	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description License was validated on this date.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

BusinessLicenseFeed

Feed tracking is available for the object.

BusinessLicenseHistory

History is available for tracked fields of the object.

BusinessLicenseOwnerSharingRule

Sharing rules are available for the object.

BusinessLicenseShare

Sharing is available for the object.

BusinessMilestone

Represents the milestones of a business, such as acquisition, market listing, and expansion. This object is available in API version 47.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
ExpirationDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The date when the business milestone expired.</p>
ExpirationDescription	<p>Type textarea</p> <p>Properties Create, Nillable, Update</p> <p>Description The reason why the business milestone expired.</p>
IsExpired	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the business milestone has expired. The default value is False.</p>
IsTentative	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates that the exact date of the business milestone is not known. The default value is False.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p>

Field	Details
	Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
MilestoneDate	Type dateTime Properties Create, Filter, Sort, Update Description The date on which the business milestone occurred.
MilestoneDescription	Type textarea Properties Create, Nillable, Update Description The description of the business milestone.
MilestoneSiteId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The location where the business milestone occurred. For example, the location where a business deal was won.
MilestoneType	Type picklist Properties Create, Filter, Group, Sort Description The type of the business milestone. Possible values are: <ul style="list-style-type: none"> • Award • Bankruptcy • Executive Change • Expansion • Incorporation • Market Listing • Merger & Acquisition • New Funding

Field	Details
	<ul style="list-style-type: none"> • New Partnership • New Product Launch
Name	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Sort, Update</p> <p>Description An auto-generated number assigned to this record.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description The ID of the record owner.</p>
PrimaryAccountId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description The primary business account this business milestone is related to.</p>
SourceSystem	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The name of the source system this record was obtained from.</p>
SourceSystemIdentifier	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description The ID of this record in the source system. This field is unique within your organization.</p>

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

BusinessMilestoneFeed

Feed tracking is available for the object.

BusinessMilestoneHistory

History is available for tracked fields of the object.

BusinessProfile

Represents the insurance-related attributes for the insured business. This object is available in API version 47.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	Type reference Properties Create, Filter, Group, Sort, Update Description The ID of the account related to this business profile.
ConsecWorkersCompCoverage	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description The number of consecutive years for which the insured business had workers' compensation coverage.
CreditTypesUsed	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description The credit types used by the insured business.
HasDishonoredPolicies	Type boolean

Field	Details
	Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the business has canceled policies, has not renewed policies, or has been denied policies in the past.
HasSufferedBankruptcy	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the business has reported any bankruptcies in the past.
HasUncorrectedSafetyViolations	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the business has any uncorrected safety violations.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
Name	Type string Properties Autonumber, Defaulted on create, Filter, idLookup, Sort Description An auto-generated number assigned to this record.

Field	Details
SourceSystem	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The name of the source system this record was obtained from.
SourceSystemIdentifier	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description The ID of this record in the source system. This field is unique within your organization.
WorkersCompClaims	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description The number of workers' compensation claims raised.
WorkersCompMedicalClaims	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description The number of workers' compensation medical claims raised.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

[BusinessProfileFeed](#)

Feed tracking is available for the object.

[BusinessProfileHistory](#)

History is available for tracked fields of the object.

Card

Represents credit or debit card associated with this financial account.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountHolder__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Individual credit or debit holder associated with this card.</p>
Active__c	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the account is active (<code>true</code>) or inactive (<code>false</code>). Default is <code>true</code>.</p>
BinNumber__c	<p>Type double</p> <p>Properties CreateFilter, Nillable, SortUpdate</p> <p>Description Bank Identification number for this account.</p>
FinancialAccount__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Financial account associated with this card.</p>
OwnershipType__c	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Type of ownership for this card. Valid values:</p>

Field	Details
	<ul style="list-style-type: none"> • Primary • Authorized • Other
SourceSystemId__c	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description ID that uniquely identifies the financial account in an external data source.
ValidUntil__c	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Date card is no longer valid.

CaseGatewayRequest

Holds the JSON output from the Financial Services Cloud flows and serves as an endpoint for integration with backend systems. It records the data interchange between the integrated systems.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
CaseId	Type reference Properties Create, Filter, Group, Sort, Update Description The ID of the associated case.
IntegrationPayload	Type textarea

Field	Details
	<p>Properties Create, Update</p> <p>Description The data payload for the integration, in JSON format. Here's an example.</p> <pre>{ "FlowName": "", "ServiceRequestNumber": "", "ServiceRequestId": "", "AccountId": "", "FinancialAccountId": "" }</pre>
Name	<p>Type string</p> <p>Properties Autonumber, Defaulted on create, Filter, Sort</p> <p>Description An auto-generated string assigned to this record.</p>
SourceSystem	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The name of the source system this record was obtained from.</p>
SourceSystemIdentifier	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of this record in the source system.</p>
StatusCode	<p>Type string</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The status code of the transmission.</p>
StatusMessage	<p>Type string</p>

Field	Details
	Properties Create, Filter, Group, Sort, Update
	Description The status of the transmission.

ChargesAndFees

Represents agreed-to fees and charges for servicing an individual's financial account.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AnnualAccountCharge__c	Type currency
	Properties Create, Filter, Nillable, Sort, Update
	Description Annual fee for maintaining an account.
AnnualMembershipFee__c	Type currency
	Properties Create, Filter, Nillable, Sort, Update
	Description Annual fee for credit card membership.
APR__c	Type percent
	Properties Create, Filter, Nillable, Sort, Update
	Description Annual percentage rate.

Field	Details
APRType__c	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Annual percentage rate type. Valid values:</p> <ul style="list-style-type: none"> • Fixed • Other • Variable
ATMFee__c	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description ATM fee.</p>
BalanceTransferAPR__c	<p>Type percent</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description APR for balance transfers.</p>
CashAdvanceFee__c	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Fee for withdrawing cash from a credit card account.</p>
CashAPR__c	<p>Type percent</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Annual percentage rate applied to cash withdrawals.</p>
CashAPRType__c	<p>Type picklist</p>

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description APR applied to cash borrowed from a credit card account. Valid values: <ul style="list-style-type: none"> • Fixed • Other • Variable
ForeignTransactionFee__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Fee for making a credit card purchase in a foreign currency.
InsufficientFundsFee__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Fee for attempting to make a purchase or payment from an account with insufficient funds.
InterestRate__c	Type percent Properties Create, Filter, Nillable, Sort, Update Description Interest rate on a loan account (APR%).
LatePaymentFee__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Fee for not paying the minimum payment by the due date.
MaximumTransactionFee__c	Type currency Properties Create, Filter, Nillable, Sort, Update

Field	Details
	Description Fee for exceeding the maximum monthly transaction limit.
MonthlyServiceFee__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Monthly account maintenance charge.
OverdraftFees__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Fee for a withdrawal that exceeds the available balance.
ReplacementCardFee__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Fee for debit or credit card replacement.
ReturnedCheckFee__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Fee for writing or receiving a check returned due to insufficient funds.
SourceSystemId__c	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description ID that uniquely identifies the individual in an external data source.
StatementFee__c	Type currency Properties Create, Filter, Nillable, Sort, Update

Field	Details
	Description Fee for mailing an account statement.
StopPaymentFee__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Fee for requesting a stop payment on a check or payment that hasn't been processed yet.

Claim

Represents the types of claims, such as life, auto, or home.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the account related to the claim.
ActualAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The actual amount that was billed for the repair of damages.
ApprovedAmount	Type currency

Field	Details
	Properties Create, Filter, Nillable, Sort, Update Description The amount that was approved for the repair of damages based on an agent's inspection.
AssessmentDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date on which the claim was officially assessed.
CaseId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the case that created the claim.
ClaimReason	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The reason for initiating the claim.
ClaimReasonType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The category that the claim reason belongs to. For example, natural disaster, accident.
ClaimType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The type of the claim. For example, home, auto, annuity, or life.
EstimatedAmount	Type currency

Field	Details
	<p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The estimated cost of damages given by the owner or the repair shop.</p>
FinalizedDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The date on which the claim was marked resolved, with claim status as approved or rejected.</p>
FnolChannel	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The channel through which the loss was reported. Possible values are:</p> <ul style="list-style-type: none"> • Chatbot • Mobile • Phone • Web
IncidentSite	<p>Type address</p> <p>Properties Filter, Nillable</p> <p>Description The place where the accident took place. This is a compound field of type Address and combines these fields: IncidentSiteCity, IncidentSiteCountry, IncidentSiteGeocodeAccuracy, IncidentSiteLatitude, IncidentSiteLongitude, IncidentSitePostalCode, IncidentSiteState, and IncidentSiteStreet. For more information, see Address Compound Fields.</p>
InitiationDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The date on which the claim was initiated.</p>

Field	Details
InsuredAssetId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of the asset that is insured.</p>
IsAuthoritiesNotified	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the authorities have been informed about the accident. The default value is False.</p>
IsClosed	<p>Type boolean</p> <p>Properties Defaulted on create, Filter, Group, Sort</p> <p>Description Indicates whether the claim has been closed. The default value is False.</p>
IsDrivable	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the vehicle is drivable after the accident. The default value is False.</p>
IsInhabitable	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the property is inhabitable after the accident. The default value is False.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p>

Field	Details
	Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
LossDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date on which the accident took place.
LossType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The type of the loss for which the claim was initiated. For example, partial loss, repair, replacement.
Name	Type string Properties Create, Filter, Group, Sort, Update Description The claim number in the claims management system.
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description ID of the record owner.
PolicyNumberId	Type reference

Field	Details
	<p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description ID of the parent insurance policy related to the claim.</p>
RenewalChannel	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The channel through which the insurance policy associated with this claim was renewed. This field is deprecated in API version 48.0 and will be removed in API version 52 (the Summer '21 release). Possible values are:</p> <ul style="list-style-type: none"> • Chatbot • Mobile • Phone • Web
RepairShop	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The name of the repair shop where the damaged vehicle was repaired.</p>
RepairShopLocation	<p>Type textarea</p> <p>Properties Create, Nillable, Update</p> <p>Description The location of the repair shop where the damaged vehicle was repaired.</p>
ReportDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The timestamp for when the accident report was filled out.</p>

Field	Details
ReportNumber	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description The number of the accident report.</p>
ReportingAuthority	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The name of the authority who filled out the accident report.</p>
Severity	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The severity of the claim. For example, high, medium, or low.</p>
SourceSystem	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The name of the system this record was obtained from.</p>
SourceSystemIdentifier	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of this record in the source system.</p>
Status	<p>Type picklist</p> <p>Properties Create, Defaulted on create, Filter, Group, Nillable, Sort, Update</p> <p>Description The status of the claim.</p>

Field	Details
Summary	Type textarea Properties Create, Nillable, Update Description The description of the claim.
VisitDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The timestamp for when the agent visited the site of the accident or the place where the vehicle was moved after the accident.
VisitSite	Type textarea Properties Create, Nillable, Update Description The site that the agent visited.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

ClaimFeed

Feed tracking is available for the object.

ClaimHistory

History is available for tracked fields of the object.

ClaimOwnerSharingRule

Sharing rules are available for the object.

ClaimShare

Sharing is available for the object.

ClaimCase

A junction object that associates the Claim object with the Case object. You see this object only if you have enabled the Use Many-to-Many Relationships org pref.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
CaseId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The ID of the case that was opened to handle this claim.</p>
ClaimId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The ID of the claim.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
Name	<p>Type string</p> <p>Properties Autonumber, Defaulted on create, Filter, Sort</p> <p>Description An auto-generated number assigned to this record.</p>

Field	Details
SourceSystem	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The name of the source system this record was obtained from.
SourceSystemIdentifier	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of this record in the source system.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

ClaimCaseFeed

Feed tracking is available for the object.

ClaimCaseHistory

History is available for tracked fields of the object.

ClaimCoverage

Represents the insurance policy coverage for a claim. This object stores the information about financial activities related to the claim, including payouts and reserves. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
ClaimId	Type reference Properties Create, Filter, Group, Sort, Update

Field	Details
	Description The claim associated with this claim coverage.
ClaimItemId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The item associated with the claim.
ClaimParticipantId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The claim participant associated with this claim coverage.
Description	Type textarea Properties Create, Nillable, Update Description The description of the coverage for the claim.
ExpenseReserveAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The amount of expense reserve held for this claim coverage.
InsurancePolicyAssetId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The insurance policy asset associated with this claim coverage.
InsurancePolicyCoverageId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update

Field	Details
	Description The insurance policy coverage associated with the claim.
InternalReserveMode	Type picklist Properties Create, Filter, Group, Restricted picklist, Sort, Update Description Specifies the rule for determining the loss reserve amount and expense reserve amount for the coverage of the claim. If the rule is Coverage Reserve, the reserve amounts are stored in the Loss Reserve and Expense Reserve fields of the Claim Coverage object. If the rule is Reserve Worksheet, the reserve amounts are stored in the Claim Coverage Reserve object. The values are added to and displayed in the Loss Reserve and Expense Reserve fields of the Claim Coverage object. Possible values are: <ul style="list-style-type: none"> CoverageReserve—Coverage Reserve ReserveWorksheet—Reserve Worksheet
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
LossReserveAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The amount of loss reserve held for a claim coverage.
Name	Type string

Field	Details
	Properties Create, Filter, Group, idLookup, Sort, Update Description The name of the claim coverage.
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description The ID of the record owner.
Status	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Specifies the status of a claim coverage. Possible values are: <ul style="list-style-type: none"> • Closed • Denied • Open

ClaimItem

Represents claim items (such as collision damage, roadside assistance, rental care) and their coverage details. This object is available in API version 47.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Category	Type picklist

Field	Details
	<p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Specifies the category of the claim item. This field is available from API version 51.0 and later.</p> <p>Possible values are:</p> <ul style="list-style-type: none"> • Damaged Property • Involved Injury
ClaimId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The parent claim that includes this claim item.</p>
ClaimParticipantId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The claim participant associated with the claim item. This field is available from API version 51.0 and later.</p>
CurrentAddress	<p>Type address</p> <p>Properties Filter, Nillable</p> <p>Description The location of the claim item. This field is available from API version 51.0 and later.</p> <p>This is a compound field of type Address and combines these fields: City, Country, GeocodeAccuracy, Latitude, Longitude, PostalCode, State, and Street. For more information, see Address Compound Fields.</p>
Description	<p>Type textarea</p> <p>Properties Create, Nillable, Update</p> <p>Description The description of the claim item.</p>

Field	Details
InsurancePolicyAssetId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The insurance policy asset associated with the claim item. This field is available from API version 51.0 and later.</p>
InsurancePolicyCoverageId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of the coverage that covers this claim item.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
Name	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Sort, Update</p> <p>Description Name of the item that's included in the claim.</p>

Associated Objects

This object has the following associated objects. Unless noted, they're available in the same API version as this object.

ClaimItemFeed

Feed tracking is available for the object.

ClaimItemHistory

History is available for tracked fields of the object.

ClaimParticipant

A junction object that associates the Claim object with the Account object. This object represents the participants of a claim. Claim participants include insured, claimants, and witnesses.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
ClaimId	Type reference Properties Create, Filter, Group, Sort, Update Description The ID of the claim in which this participant has one or more roles.
InsurancePolicyParticipantId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the insurance policy participant associated with this claim. This field is available from API version 51.0 and later.
IsInjured	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the claim participant was injured in the accident. The default value is False.
LastReferencedDate	Type dateTime

Field	Details
	Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
Name	Type string Properties Autonumber, Defaulted on create, Filter, Sort Description An auto-generated number assigned to this record.
ParticipantAccountId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the claim participant's account.
ParticipantContactId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the claim participant's contact.
Roles	Type multipicklist Properties Create, Filter, Update Description The roles that the claim participant can have in the claim. For example, witness, victim, defendant, claimant.

Field	Details
SourceSystem	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The name of the source system this record was obtained from.
SourceSystemIdentifier	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of this record in the source system.

Associated Objects

This object has the following associated objects. Unless noted, they're available in the same API version as this object.

[ClaimParticipantFeed](#)

Feed tracking is available for the object.

[ClaimParticipantHistory](#)

History is available for tracked fields of the object.

ClaimPaymentSummary

Represents the amount of money that's paid to a claimant or claim participant to cover a claim. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
ClaimId	Type reference Properties Create, Filter, Group, Sort, Update

Field	Details
	Description The ID of the claim associated with this claim payment.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
Name	Type string Properties Create, Filter, Group, idLookup, Sort, Update Description The name of the claim payment summary.
PaymentAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The amount of the payment.
PaymentDate	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Specifies the date when the claim payment was initiated.
PaymentIdentifier	Type string

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description A unique identifier for the payment record assigned by the financial transaction system.
PaymentStatus	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Specifies the status of the claim payment. Possible values are: <ul style="list-style-type: none"> • Canceled • Paid • Pending Payment • Stopped

Contact Custom Fields

Represents information about an individual that pertains to their personhood, irrespective of their relationship with your firm, such as their birthdate or tax ID number. Custom fields extend the Contact object for use in Financial Services Cloud.

Fields

Field Name	Details
Affiliations__c	Type textarea Properties Create, Filter, Group, Nillable, Sort, Update Description Memberships in clubs, organizations, and alumni associations.
Age__c	Type double Properties Filter, Nillable, Sort Description Age. Calculated from <code>Contact.Birthdate</code> .

Field Name	Details
AgeAsText__c	<p>Type string</p> <p>Properties Filter, Nillable, Sort</p> <p>Description Age expressed in years, months, and days. Calculated from <code>Contact.Birthdate</code>. Label is Age Text.</p>
AnnualIncome__c	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Annual income.</p>
BillingAddress__c	<p>Type string</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The compound form of the billing address. Based on these address fields: <code>Account.BillingStreet</code>, <code>Account.BillingCity</code>, <code>Account.BillingState</code>, <code>Account.BillingPostalCode</code>, and <code>Account.BillingCountry</code>.</p>
Citizenship__c	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Citizenship.</p>
CommunicationPreferences__c	<p>Type multipicklist</p> <p>Properties Create, Filter, Nillable, Update</p> <p>Description Preferred communication channel. Valid values:</p> <ul style="list-style-type: none"> • Balance Activities:Email • Balance Activities:Phone • Balance Activities:SMS

ShippingAddress__c	<p>Type string</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The compound form of the shipping address. Based on these address fields: <code>Account.ShippingStreet</code>, <code>Account.ShippingCity</code>, <code>Account.ShippingState</code>, <code>Account.ShippingPostalCode</code>, and <code>Account.ShippingCountry</code>.</p>
SourceSystemId__c	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description ID that uniquely identifies this individual in an external data source.</p>
TaxBracket__c	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Rate at which this individual is taxed. Valid values:</p> <ul style="list-style-type: none"> • 10% • 15% • 25% • 28% • 33%

Field Name	Details
	<ul style="list-style-type: none"> 35%
TaxId__c	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Tax Identification Number or Social Security number.
Twitter__c	Type url Properties Create, Filter, Group, Nillable, Sort, Update Description Twitter profile URL.
WeddingAnniversary__c	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Date of wedding anniversary.

ContactContactRelation

Represents the relationship between any two individuals.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Active__c	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update

Field	Details
	<p>Description</p> <p>Indicates whether the relationship is active (<code>true</code>) or not (<code>false</code>). The default value is <code>true</code>.</p>
Contact__c	<p>Type</p> <p>reference</p> <p>Properties</p> <p>Create, Filter, Group, Nillable, Sort, Update</p> <p>Description</p> <p>Contact that RelatedContact__c is related from.</p>
CurrencyIsoCode	<p>Type</p> <p>picklist</p> <p>Properties</p> <p>Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update</p> <p>Description</p> <p>If multiple currencies is enabled, contains the currency ISO code associated with the record.</p>
EndDate__c	<p>Type</p> <p>date</p> <p>Properties</p> <p>Create, Filter, Group, Nillable, Sort, Update</p> <p>Description</p> <p>Date when the relationship ended.</p>
ExternalId__c	<p>Type</p> <p>string</p> <p>Properties</p> <p>Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description</p> <p>ID that uniquely identifies the relationship in an external data source.</p>
InverseRelationship__c	<p>Type</p> <p>reference</p> <p>Properties</p> <p>Create, Filter, Group, Nillable, Sort, Update</p> <p>Description</p> <p>Uniquely identifies the relationship between Contact and RelatedContact__c so that it can be referenced by a trigger that creates the inverse relationship record.</p>
Name	<p>Type</p> <p>string</p>

Field	Details
	<p>Properties Defaulted on create, Filter, idLookup, Sort</p> <p>Description Auto-number identifier for the relationship. Label is <code>Contact Relation Name</code>.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description ID of the user who created the relationship record.</p>
RelatedContact__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Contact that <code>Contact__c</code> is related to.</p>
Role__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description Role that describes how <code>RelatedContact__c</code> is related to <code>Contact__c</code></p>
SourceSystemId__c	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description ID that uniquely identifies the relationship in an external data source.</p>
StartDate__c	<p>Type date</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Date when the relationship started.</p>

CoverageType

Represents the type of coverage, such as liability, earthquake, or collision damage. You see this object only if you have enabled the Access Master List of Coverage Types org pref.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
BenefitPaymentFrequency	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The frequency of the payment if the benefit or coverage entails a recurring payout to the insured.
Category	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The category that the coverage belongs to. For example, benefit, clause, deductible, rider.
CategoryCode	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description A carrier-specific code that identifies the coverage. For example, benefit, clause, or deductible.
CategoryGroup	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The specific category group. For example, for a liability coverage record, benefit is the category and liability is the category group.

Field	Details
CategoryGroupType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The type of the category group.</p>
CategoryGroupTypeValue	<p>Type multipicklist</p> <p>Properties Create, Filter, Nillable, Update</p> <p>Description Identifies the coverage limit type. For example, for a liability coverage of USD 1000 per person and USD 1500 per occurrence, Amount per Person and Amount per Occurrence are the category group type values.</p>
CoverageCode	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description A carrier-specific code that identifies the policy limit code in the source system.</p>
DeathBenefitOptionType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The method for the payment of death benefit.</p>
DeductibleAmount	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The deductible amount that the customer must pay.</p>
Description	<p>Type textarea</p> <p>Properties Create, Nillable, Update</p>

Field	Details
	Description The description of the coverage type.
Discount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The discount that was given on the coverage or the benefit.
EffectiveDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date from which the coverage is in effect.
ExpirationDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date on which the coverage expires.
IncomeOptionType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The type of the income option given to the policy participant. For example, periodic payment is an income option type, and annuity is an income option.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime

Field	Details
	Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
LimitAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The limit of the fixed coverage amount. For example, uninsured motorist coverage of USD 1000.
LimitDate	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description The date from which the coverage limit is in effect. For example, an annuity benefit is valid only after the insured is 60 years old.
LimitPercentage	Type percent Properties Create, Filter, Nillable, Sort, Update Description The percentage of the actuals covered by this coverage.
LimitRange	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The range of the coverage limit. For example, bodily injury coverage with limits as USD 100,000 per person and USD 300,000 per accident.
Name	Type string Properties Create, Filter, Group, Sort, Update

Field	Details
	Description An auto-generated number assigned to this record.
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description ID of the record owner.
PremiumAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The premium paid by the customer for this coverage.
SourceSystem	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The name of the source system this record was obtained from.
SourceSystemIdentifier	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of this coverage record in the source system.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

CoverageTypeFeed

Feed tracking is available for the object.

CoverageTypeHistory

History is available for tracked fields of the object.

CoverageTypeOwnerSharingRule

Sharing rules are available for the object.

CoverageTypeShare

Sharing is available for the object.

CustomerProperty

Represents the insurable and insured properties of a customer.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Address	Type address Properties Filter, Nillable Description The location of the property. This is a compound field of type Address and combines these fields: City, Country, GeocodeAccuracy, Latitude, Longitude, PostalCode, State, and Street. For more information, see Address Compound Fields .
AnnualMileage	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description The distance that the vehicle is expected to be driven in a year.
AssetId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the asset associated with this customer property.
BathroomCount	Type double

Field	Details
	Properties Create, Filter, Nillable, Sort, Update Description The total number of bathrooms in the property.
BedroomCount	Type double Properties Create, Filter, Nillable, Sort, Update Description The total number of bedrooms in the property.
BuiltUpArea	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The property's usable area, which is also known as the carpet area.
CeilingType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The type of the ceiling the property has. For example, conventional, beam, shed, cove, tray, suspended.
ConstructionClass	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The type of the property's construction. For example, framed, masonry non-combustible, modified, semi-resistive, or fire resistive.
DaysDrivenToWork	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description The number of days that the vehicle was used to drive to work.

Field	Details
Description	<p>Type textarea</p> <p>Properties Create, Nillable, Update</p> <p>Description The description of the asset.</p>
DwellingType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The property's dwelling type on the policy creation date. For example, ranch, single family, or condo.</p>
EngineDisplacementVolume	<p>Type int</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The engine capacity of the vehicle.</p>
FactoryPrice	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The price of the vehicle billed by the manufacturer.</p>
FairMarketValue	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The estimated market price of the vehicle on the policy creation date.</p>
FinancingType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p>

Field	Details
	Description The type of financing used to purchase the asset.
FloorCount	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description The number of stories in the property.
FloorType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The type of the floor the property had on the policy creation date. For example, ceramic tile, porcelain tile, floating wood tile.
FoundationType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The type of the property's foundation. For example, pier and beam, slab.
FuelType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The fuel system of the vehicle.
GarageSpaceCount	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description The number of parking spaces available in the property.
GarageType	Type picklist

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description The type of the garage the property has.
GrossVehicleWeight	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description Vehicle's weight.
IsBasementIncluded	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the property has a basement. The default value is False.
IsChimneyIncluded	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the property has a chimney. The default value is False.
IsPassedSmogCheck	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the vehicle has passed the smog check. The default value is False.
IsSwimmingPoolIncluded	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the property has a swimming pool. The default value is False.
KitchenCount	Type double

Field	Details
	Properties Create, Filter, Nillable, Sort, Update Description The total number of kitchens in the property.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
LeasePeriod	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description The current lease period for the property.
LienHolderName	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description The bank or the financial firm that legally owns the asset.
LoadCapacity	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Vehicle's load-carrying capacity.

Field	Details
LotArea	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The total area of the plot on which the property is constructed, including the construction area and the open area on all sides.</p>
Make	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The brand of the vehicle.</p>
MakeYear	<p>Type int</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The year in which the vehicle was manufactured.</p>
MilesDrivenToWork	<p>Type int</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The number of miles that the vehicle covered when it was used to drive to work.</p>
ModelName	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The model name of the vehicle.</p>
Name	<p>Type string</p> <p>Properties Autonumber, Defaulted on create, Filter, Sort</p>

Field	Details
	Description An auto-generated number assigned to this record.
OdometerReading	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description Vehicle's odometer reading on the policy creation date.
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description ID of the record owner.
PassengerSeatCapacity	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description The legal seating capacity of the vehicle.
PrimaryOwnerId	Type reference Properties Create, Filter, Group, Sort, Update Description ID of the primary owner of the asset.
PrimaryUse	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description What the vehicle is primarily going to be used for.
PurchaseDate	Type date Properties Create, Filter, Group, Nillable, Sort, Update

Field	Details
	Description The date on which this property was purchased.
PurchasePrice	Type currency Properties Create, Filter, Nillable, Sort, Update Description The amount of money paid by the owner to purchase this property.
RegistrationNumber	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description Vehicle's license plate number.
RegistrationType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Vehicle's registration type. For example, antique, combo, apportioned, commercial.
RoofType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The type of the roof the property has.
SourceSystem	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The name of the source system this property record was obtained from.
SourceSystemIdentifier	Type string Properties Create, Filter, Group, Nillable, Sort, Update

Field	Details
	Description The ID of this property record in the source system.
TransmissionType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The transmission type of the vehicle.
Vin	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Vehicle's identification number.
YearBuilt	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description The year in which the property was constructed.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

[CustomerPropertyFeed](#)

Feed tracking is available for the object.

[CustomerPropertyHistory](#)

History is available for tracked fields of the object.

Sharing rules are available for the object.

[CustomerPropertyShare](#)

Sharing is available for the object.

DistributorAuthorization

Represents the official authorization from an insurance company granting a distributor the permission to act as its agent. This object is available in API version 48.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of the distributor's business account.</p>
AuthorizedInsuranceLineId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The insurance line that the insurance company is authorized to sell.</p>
ContactId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of the contact associated with the producer.</p>
EffectiveDate	<p>Type date</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The date from which this authorization is in effect.</p>
ExpirationDate	<p>Type date</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The date on which this authorization expires.</p>

Field	Details
IsActive	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the authorization is active (true) or inactive (false). The default value is false.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
LicenseId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The distributor's business license against which the distributor is authorized.</p>
Name	<p>Type string</p> <p>Properties Autonumber, Defaulted on create, Filter, idLookup, Sort</p> <p>Description An auto-number identifier for this distributor authorization.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p>

Field	Details
	Description The ID of the record owner.
Status	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The authorization status of the distributor. Possible values are: <ul style="list-style-type: none"> Appointed Terminated
TerminationCause	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The reason for the termination of the distributor's authorization.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

DistributorAuthorization

Feed tracking is available for the object.

DistributorAuthorization

History is available for tracked fields of the object.

DistributorAuthorization

Sharing rules are available for the object.

DistributorAuthorization

Sharing is available for the object.

DocumentChecklistItem

Represents a checklist item for a file documentation upload. This object is available in API version 47.0 and later.

Supported Calls

`describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`

Fields

Field	Details
AccountId	<p>Type reference</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The ID of the account the document checklist item belongs to.</p>
DocumentTypeId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description ID of the document type for the document checklist item.</p>
Instruction	<p>Type textarea</p> <p>Properties Create, Nillable, Update</p> <p>Description Instructions associated with the document checklist item.</p>
IsAccepted	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the file has been accepted. The default value is False.</p>
IsFrozen	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates that the item can no longer be modified. The default value is False.</p>
IsRequired	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort</p>

Field	Details
	Description Indicates if the document checklist item is required. The default value is False.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
Name	Type string Properties Create, Filter, Group, idLookup, Sort, Update Description Name of the document checklist item.
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description ID of the user who owns this record.
ParentRecordId	Type reference Properties Create, Filter, Group,, Sort, Update Description Original parent object the document checklist item belonged to.
Status	Type picklist

Field	Details
	<p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Uploaded document checklist item status.</p> <p>Possible values are:</p> <ul style="list-style-type: none"> Accepted New Pending Rejected <p>The default value is New.</p>
UploadedById	<p>Type reference</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description Person who uploaded the file.</p>
WhoId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Person that the uploaded documentation pertains to.</p>

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

[DocumentChecklistItemFeed](#)

Feed tracking is available for the object.

[DocumentChecklistItemHistory](#)

History is available for tracked fields of the object.

[DocumentChecklistItemOwnerSharingRule](#)

Sharing rules are available for the object.

[DocumentChecklistItemShare](#)

Sharing is available for the object.

DocumentType

Represents the type of file being uploaded or attached. This object is available in API version 47.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `query()`, `retrieve()`, `update()`, `upsert()`

Fields

Field	Details
Description	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Document type description.</p>
DeveloperName	<p>Type string</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The unique name of the object in the API. This name can contain only underscores and alphanumeric characters, and must be unique in your org. It must begin with a letter, not include spaces, not end with an underscore, and not contain two consecutive underscores. In managed packages, this field prevents naming conflicts on package installations. With this field, a developer can change the object's name in a managed package and the changes are reflected in a subscriber's organization.</p> <p> Note: When creating large sets of data, always specify a unique <code>DeveloperName</code> for each record. If no <code>DeveloperName</code> is specified, performance may slow while Salesforce generates one for each record.</p>
IsActive	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the document type is active.</p>
Language	<p>Type picklist</p>

Field	Details
	Properties Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update
	Description The language of the document type.
MasterLabel	Type string
	Properties Create, Filter, Group, idLookup, Sort, Update
	Description The label for the picklist value that appears in the UI.

Education

Represents an individual's educational background.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Contact__c	Type reference
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description The individual's contact record.
EducationLevel__c	Type picklist
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description Level of education. Valid values: <ul style="list-style-type: none"> Declined to Comment Graduate

Field	Details
	<ul style="list-style-type: none"> • High School • Post Graduate
GraduationDate__c	<p>Type date</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Date of graduation from the corresponding education level.</p>
Institution__c	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Name of the educational institution that awarded the degree.</p>
SourceSystemId__c	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description ID that uniquely identifies the individual in an external data source.</p>

Employment

Represents information about an individual's employment history.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AnnualIncome__c	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p>

Field	Details
	Description Gross annual income as reported on the most recent tax return.

Field	Details
	Description Timestamp for when this financial holding last had a task or event action associated with the record.
LastReferencedDate	Type date Properties Filter, Nillable, Sort, Description Timestamp for when the current user last viewed a record related to this record.
LastUpdated__c	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Timestamp for when data for this holding was last updated by an external data source.
LastViewedDate	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Timestamp for when the current user last viewed this record.
MarketValue__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Current market value.
Name	Type string Properties Create, Defaulted on create, Filter, Group, idLookup, Nillable, Sort, Update Description Name of this holding.
PercentChange__c	Type percent

Field	Details
	Properties Create, Filter, Nillable, Sort, Update Description Percent change in value since purchase.
Price__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Current price per share.
PrimaryOwner__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Primary owner of this holding.
PurchasePrice__c	Type currency Properties Create, Filter, Sort, Update Description Price per-share at time of purchase.
Securities__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Name of the securities held. Label is Symbol.
Shares__c	Type double Properties Create, Filter, Sort, Update Description Number of shares held.
SourceSystemId__c	Type string

Field	Details
	Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description ID that uniquely identifies the holding in an external data source.
Symbol__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Ticker symbol for the securities held. The value is copied from <code>Securities__c</code> and can't be changed.

IdentificationDocument

Represents information about documents used to verify an individual's identity.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Account__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Account object related to the identification document.
DocumentNumber__c	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Number listed on the identification document.

Field	Details
DocumentType__c	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Restricted picklist, Sort, Update</p> <p>Description Type of document used to verify the person's identity. Valid values:</p> <ul style="list-style-type: none"> • Green Card • License • Other • Passport • Visa

SourceSystemId__c	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description ID that uniquely identifies the financial account in an external data source.
VerifiedBy__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Name of the person who verified the document.
VerifiedOn__c	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description Date the identification document was verified.

IdentityDocument

Represents information about documents used to identify Financial Services Cloud clients.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
ExpirationDate	Type date

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description Date when the document expires.
IdDocumentType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Type of the document that's used to verify the client's identity.
IssueDate	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Date when the document was issued.
IssuingAuthority	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The authority that issued the document.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.

Field	Details
Name	Type string Properties Create, Filter, Group, idLookup, Sort, Update Description Name of the document.
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description ID of the user who created this record.
RelatedLegalEntityId	Type reference Properties Create, Filter, Group, Sort, Update Description ID of the legal entity related to this document.
VerifiedById	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Name of the person who verified this document.
VerifiedOn	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description Date when this document was verified.

IdentityVerification

Represents information about methods used to verify a client's identity.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Account__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Account object related to the identity verification.</p>
IsVerified__c	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the client's identity has been verified.</p>
VerificationMethod__c	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Restricted picklist, Sort, Update</p> <p>Description Method used to verify the client's identity. Valid values:</p> <ul style="list-style-type: none"> • External • Last 4 digits of ID • License • Manual • Mother's Maiden Name
VerifiedBy__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Individual who verified the client's identity.</p>

Field	Details
VerifiedOn__c	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description Date the client's identity was verified.

InsuranceClaimAsset

A junction object that associates the Claim object with the InsurancePolicyAsset object. You see this object only if you have enabled the Use Many-to-Many Relationships org pref.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
ClaimId	Type reference Properties Create, Filter, Group, Sort, Update Description The ID of the originating claim.
InsurancePolicyAssetId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the asset associated with this claim.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort

Field	Details
	Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
Name	Type string Properties Autonumber, Defaulted on create, Filter, Sort Description An auto-generated number assigned to this record.
SourceSystem	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The name of the source system this record was obtained from.
SourceSystemIdentifier	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of this record in the source system.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

[InsuranceClaimAssetFeed](#)

Feed tracking is available for the object.

[InsuranceClaimAssetHistory](#)

History is available for tracked fields of the object.

InsurancePolicy

Represents the type of insurance policy, such as auto, home, life, or annuity.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AuditTerm	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The frequency of the audit. For example, monthly, semi-monthly, quarterly, semi-annually, or annually.</p>
CancellationDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The date on which the insurance policy was canceled.</p>
CancellationReason	<p>Type textarea</p> <p>Properties Create, Nillable, Update</p> <p>Description The reason for canceling the insurance policy.</p>
CancellationReasonType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The category that the cancellation reason belongs to.</p>

Field	Details
CashSurrenderValue	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The cash surrender value of the insurance policy.</p>
ChangeSubtype	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description A further categorization of the change type. For example, childbirth, marriage.</p>
ChangeType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The type of the change in the policy. For example, life event, house renovation.</p>
DateRenewed	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The date on which the policy was last renewed.</p>
Discount	<p>Type double</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The discount that was given on the policy.</p>
EffectiveDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The date from which the policy is in effect.</p>

Field	Details
ExpirationDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The date on which the policy expires.</p>
FinalRenewalDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The final date on which the policyholder can renew the insurance policy.</p>
EnolChannel	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The channel through which the loss for the claim associated with this policy was reported. This field is deprecated in API version 48.0 and will be removed in API version 52 (the Summer '21 release). Possible values are:</p> <ul style="list-style-type: none"> • Chatbot • Mobile • Phone • Web
GrossWrittenPremium	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The total expected premium amount for the insurance policy over the policy period.</p>
HasAnyAutoCoverage	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p>

Field	Details
	Description Indicates whether the insurance policy has an Any Auto coverage, which extends the coverage to hired and other non-owned vehicles. The default value is False.
IsActive	Type boolean Properties Defaulted on create, Filter, Group, Sort Description Indicates whether the policy is active. The default value is False.
IsLoanEligibile	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether a loan can be requested against the insurance policy. The default value is False.
IsRenewedPolicy	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the policy is a renewed policy. The default value is False.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.

Field	Details
Name	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Sort, Update</p> <p>Description The insurance policy number.</p>
NameInsuredId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The name of the primary insured.</p>
OriginalEffectiveDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The date on which the original policy went into effect. This field is available from API version 51.0 and later.</p>
OriginalExpirationDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Expiration date of the original policy. This field is available from API version 51.0 and later.</p>
OriginalPolicyId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of the original insurance policy. This field is available from API version 51.0 and later.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p>

Field	Details
	Description ID of the record owner.
PaidToDate	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description The date up to which the policy is paid for. This field is available from API version 51.0 and later.
ParentPolicyId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the parent policy that covers this policy. For example, a parent policy can cover an auto policy and home policy.
PaymentDueDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date on which the next payment of the premium is due.
PlanTier	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The class that the insurance policy belongs to. For example, silver, gold, or platinum.
PlanType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The type of the insurance policy plan. For example, single life, joint last-to-die, or joint first-to-die (primarily applicable for term insurance).

Field	Details
PolicyDescription	<p>Type textarea</p> <p>Properties Create, Nillable, Update</p> <p>Description The description of the insurance policy.</p>
PolicyName	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The name of the insurance policy.</p>
PolicyTerm	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The time period for which the policy provides coverage. This field is available from API version 51.0 and later. Possible values are:</p> <ul style="list-style-type: none"> • Annual • Custom • Daily • Monthly • Semi-Annual
PolicyType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The type of the insurance policy. For example, home, auto, annuity, or life.</p>
PremiumAmount	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The premium paid by the policy owner for the current billing period.</p>

Field	Details
PremiumCalculationMethod	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The premium calculation method for a payment period. This field is available from API version 51.0 and later. Possible values are:</p> <ul style="list-style-type: none"> • Daily • Modal
PremiumFrequency	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The frequency of the premium payment or billing. For example, monthly, semi-monthly, quarterly, semi-annually, or annually.</p>
PremiumPaymentType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The type of premium payment, such as Advance or Arrears. This field is available from API version 51.0 and later. Possible values are:</p> <ul style="list-style-type: none"> • Advance • Arrears
PreviousPremium	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The premium of the policy before it was renewed.</p>
PreviousRenewalDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p>

Field	Details
	Description The date on which the insurance policy was renewed in the last renewal cycle.
PriorPolicyId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the insurance policy before it was renewed.
ProducerId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the agency or the agent who sold the policy.
ProductId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The product that this policy belongs to. For example, if the customer buys a silver auto policy, this field looks up to the silver auto product in the Product object.
RenewalChannel	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The channel through which the insurance policy was renewed. Possible values are: <ul style="list-style-type: none"> • Chatbot • Mobile • Phone • Web
RenewalDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update

Field	Details
	Description The date on which the policy is expected to be renewed. The actual renewal date may be different.
SaleDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date on which the policy was sold.
ServicingOffice	Type address Properties Filter, Nillable Description The address of the office that issued the policy and that services the policy. This is a compound field of type Address and combines these fields: ServicingOfficeCity, ServicingOfficeCountry, ServicingOfficeGeocodeAccuracy, ServicingOfficeLatitude, ServicingOfficeLongitude, ServicingOfficePostalCode, ServicingOfficeState, and ServicingOfficeStreet. For more information, see Address Compound Fields .
SourceOpportunityId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the opportunity from which the policy was created.
SourceSystem	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The name of the source system this record was obtained from.
SourceSystemIdentifier	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description The ID of this record in the source system.

Field	Details
StandardFeeAmount	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The expected fee for the policy over the policy period. This field is available from API version 51.0 and later.</p>
StandardPremiumAmount	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The expected premium for the policy over the policy period. This field is available from API version 51.0 and later.</p>
StandardTaxAmount	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The expected tax on the policy over the policy period. This field is available from API version 51.0 and later.</p>
Status	<p>Type picklist</p> <p>Properties Create, Defaulted on create, Filter, Group, Nillable, Sort, Update</p> <p>Description The status of the insurance policy.</p>
Substatus	<p>Type picklist</p> <p>Properties Create, Defaulted on create, Filter, Group, Nillable, Sort, Update</p> <p>Description The carrier system's substatus code for the insurance policy.</p>
TaxesSurcharges	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p>

Field	Details
	Description The taxes and surcharges levied on the premium for the insurance policy.
TermFeeAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The expected fee for the policy over the policy period, prorated based on the policy's effective dates. This field is available from API version 51.0 and later.
TermPremiumAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The expected premium for the policy over the policy period, prorated based on the policy's effective dates. This field is available from API version 51.0 and later.
TermTaxAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The expected tax on the policy over the policy period, prorated based on the policy's effective dates. This field is available from API version 51.0 and later.
TotalStandardAmount	Type currency Properties Filter, Nillable, Sort Description The sum of the expected premium, fee, and tax for the policy over the policy period. This field is available from API version 51.0 and later. This is a calculated field.
TotalSumInsured	Type currency Properties Create, Filter, Nillable, Sort, Update Description The total insured amount. This field is available from API version 51.0 and later.

Field	Details
UnderwritingEntityId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Legal entity that underwrote the insurance policy.
UniversalPolicyNumber	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description A number that uniquely identifies the policy across different source systems.

Associated Objects

This object has the following associated objects. Unless noted, they're available in the same API version as this object.

InsurancePolicyCoverage

A junction object that associates the InsurancePolicy object with the ProductCoverage object.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
BenefitPaymentFrequency	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The frequency of the payment if the benefit or coverage entails a recurring payout to the insured. For example, monthly, semi-monthly, quarterly, semi-annually, or annually.</p>
Category	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The category that the coverage belongs to. For example, benefit, clause, deductible, rider.</p>
CategoryCode	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description A carrier-specific code that identifies the coverage. For example, benefit, clause, or deductible.</p>
CategoryGroup	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The specific category group. For example, for a liability coverage record, benefit is the category and liability is the category group.</p>
CategoryGroupType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The type of the category group.</p>
CoverageName	<p>Type string</p>

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description The name of the coverage.
CoverageTypeId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description ID of the coverage type. This field is available only if the Access Master List of Coverage Types option is enabled.
DeathBenefitOptionType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The method for the payment of death benefit.
DeductibleAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The deductible amount that the customer must pay.
Description	Type textarea Properties Create, Nillable, Update Description The description of the coverage.
Discount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The discount that was given on the coverage or the benefit.

Field	Details
EffectiveDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The date from which the coverage is in effect.</p>
ExpirationDate	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The date on which the coverage expires.</p>
IncomeOptionType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The type of the income option given to the policy participant. For example, periodic payment is an income option type, and annuity is an income option.</p>
InsurancePolicyAssetId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The asset covered by this coverage.</p>
InsurancePolicyId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The insurance policy associated with this coverage.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p>

Field	Details
	Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
LimitAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The limit of the fixed coverage amount. For example, uninsured motorist coverage of USD 1000.
LimitDate	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description The date from which the coverage limit is in effect. For example, an annuity benefit is valid only after the insured is 60 years old.
LimitPercentage	Type percent Properties Create, Filter, Nillable, Sort, Update Description The percentage of the actuals covered by this coverage.
LimitRange	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The range of the coverage limit. For example, bodily injury coverage with limits as USD 100,000 per person and USD 300,000 per accident.

Field	Details
Name	<p>Type string</p> <p>Properties Autonumber, Defaulted on create, Filter, Sort</p> <p>Description An auto-generated number assigned to this record.</p>
PremiumAmount	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The premium paid by the customer for this coverage.</p>
SourceSystem	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The name of the source system this record was obtained from.</p>
SourceSystemIdentifier	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of this coverage record in the source system.</p>
StandardFeeAmount	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The expected fee for the policy over the policy period. This field is available from API version 51.0 and later.</p>
StandardPremiumAmount	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p>

Field	Details
	Description The expected premium for the policy over the policy period. This field is available from API version 51.0 and later.
StandardTaxAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The expected tax on the policy over the policy period. This field is available from API version 51.0 and later.
TermFeeAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The expected fee for the policy over the policy period, prorated based on the policy's effective dates. This field is available from API version 51.0 and later.
TermPremiumAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The expected premium for the policy over the policy period, prorated based on the policy's effective dates. This field is available from API version 51.0 and later.
TermTaxAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The expected tax on the policy over the policy period, prorated based on the policy's effective dates. This field is available from API version 51.0 and later.
TotalStandardAmount	Type currency Properties Filter, Nillable, Sort

Field	Details
	Description The sum of the expected premium, fee, and tax for the policy over the policy period. This field is available from API version 51.0 and later. This is a calculated field.

Associated Objects

This object has the following associated objects. Unless noted, they're available in the same API version as this object.

[InsurancePolicyCoverageFeed](#)

Feed tracking is available for the object.

[InsurancePolicyCoverageHistory](#)

History is available for tracked fields of the object.

InsurancePolicyMemberAsset

A junction object that associates the InsurancePolicyAsset object with the InsurancePolicyParticipant object. You see this object only if you've enabled the Use Many-to-Many Relationships org pref.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
InsurancePolicyAssetId	Type reference Properties Create, Filter, Group, Sort, Update Description The ID of the insured asset.
InsurancePolicyId	Type reference Properties Filter, Group, Nillable, Sort Description The ID of the insurance policy associated with the asset. This field is available from API version 51.0 and later.

Field	Details
InsurancePolicyParticipantId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The ID of the insured policy participant.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
Name	<p>Type string</p> <p>Properties Autonumber, Defaulted on create, Filter, Sort</p> <p>Description An auto-generated number assigned to this record.</p>
SourceSystem	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The name of the source system this record was obtained from.</p>
SourceSystemIdentifier	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p>

Field	Details
	Description The ID of this record in the source system.

Associated Objects

This object has the following associated objects. Unless noted, they're available in the same API version as this object.

[InsurancePolicyMemberAssetFeed](#)

Feed tracking is available for the object.

[InsurancePolicyMemberAssetHistory](#)

History is available for tracked fields of the object.

InsurancePolicyParticipant

A junction object that associates the InsurancePolicy object with the Account object. This object represents the participants of an insurance policy. Insurance policy participants include policy owners and beneficiaries.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
BeneficiarySharePercentage	Type percent Properties Create, Filter, Nillable, Sort, Update Description The percentage of the total benefits that goes to the nominee.
EffectiveDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date from which the participant is active on the policy.
ExpirationDate	Type dateTime

Field	Details
	Properties Create, Filter, Nillable, Sort, Update Description The date from which the participant is inactive on the policy.
InsurancePolicyId	Type reference Properties Create, Filter, Group, Sort, Update Description The ID of the insurance policy.
IsActiveParticipant	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the participant is an active participant on the policy. The default value is False.
IsMinorBeneficiary	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the nominee is a minor. The default value is False.
IsPolicyholder	Type boolean Properties Defaulted on create, Filter, Group, Sort Description Indicates whether this client owns the policy or is just a participant on the policy. This field is available from API version 51.0 and later.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.

Field	Details
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
LegalGuardianId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The legal guardian of the minor beneficiary. This can be a business account or a person account.</p>
Name	<p>Type string</p> <p>Properties Autonumber, Defaulted on create, Filter, Sort</p> <p>Description An auto-generated number assigned to this record.</p>
PrimaryParticipantAccountId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of the primary participant's account.</p>
PrimaryParticipantContactId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of the primary participant's contact.</p>
RelatedParticipantAccountId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p>

Field	Details
	Description The ID of the related participant's account.
RelatedParticipantContactId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the related participant's contact.
RelationshipToInsured	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The relationship of the nominee with the insured.
Role	Type multipicklist Properties Create, Filter, Update Description The roles that the participant has in the policy. For example, owner, beneficiary, driver.
SourceSystem	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The name of the source system this record was obtained from.
SourceSystemIdentifier	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of this record in the source system.
StandardFeeAmount	Type currency Properties Create, Filter, Nillable, Sort, Update

Field	Details
	Description The expected fee for the policy over the policy period. This field is available from API version 51.0 and later.
StandardPremiumAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The expected premium for the policy over the policy period. This field is available from API version 51.0 and later.
StandardTaxAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The expected tax on the policy over the policy period. This field is available from API version 51.0 and later.
TermFeeAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The expected fee for the policy over the policy period, prorated based on the policy's effective dates. This field is available from API version 51.0 and later.
TermPremiumAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The expected premium for the policy over the policy period, prorated based on the policy's effective dates. This field is available from API version 51.0 and later.
TermTaxAmount	Type currency Properties Create, Filter, Nillable, Sort, Update

Field	Details
	Description The expected tax on the policy over the policy period, prorated based on the policy's effective dates. This field is available from API version 51.0 and later.
TotalStandardAmount	Type currency Properties Filter, Nillable, Sort Description The sum of the expected premium, fee, and tax for the policy over the policy period. This field is available from API version 51.0 and later. This is a calculated field.
TotalTermAmount	Type currency Properties Filter, Nillable, Sort Description The sum of the expected premium, tax, and fee for the policy over the policy period, prorated based on the policy's effective dates. This field is available from API version 51.0 and later. This is a calculated field.

Associated Objects

This object has the following associated objects. Unless noted, they're available in the same API version as this object.

[InsurancePolicyParticipantFeed](#)

Feed tracking is available for the object.

[InsurancePolicyParticipantHistory](#)

History is available for tracked fields of the object.

InsurancePolicySurcharge

Represents the charges calculated for an insurance policy and its related assets, coverages, and participants in a region. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
ApplicableObjectType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Restricted picklist, Sort, Update</p> <p>Description Specifies the item on which the surcharge was applied. Possible values are:</p> <ul style="list-style-type: none"> InsurancePolicyAsset—Insurance Policy Asset InsurancePolicyCoverage—Insurance Policy Coverage InsurancePolicyParticipant—Insurance Policy Participant
InsurancePolicyAssetId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The insurance policy asset associated with the surcharge.</p>
InsurancePolicyCoverageId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The insurance policy coverage associated with the surcharge.</p>
InsurancePolicyId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The insurance policy associated with the surcharge.</p>
InsurancePolicyParticipantId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The insurance policy participant associated with the surcharge.</p>

Field	Details
InsurancePolicyTransactionId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The insurance policy transaction associated with the surcharge.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
Name	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Sort, Update</p> <p>Description The name of the insurance policy surcharge.</p>
SourceSystem	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The name of the system from which this insurance policy surcharge was obtained.</p>
SourceSystemIdentifier	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p>

Field	Details
	Description The ID of the insurance policy surcharge record in the source system. This field is unique within your organization.
SurchargeAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The surcharge amount calculated for an insurance policy, insurance policy asset, insurance policy coverage, or an insurance policy participant. This surcharge is calculated based on the tax and fee structure defined for products or can be retrieved from a source system.

InsurancePolicyTransaction

Represents a transaction related to a change that affects the premium of an insurance policy, such as an endorsement, renewal, or cancellation. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
InsurancePolicyId	Type reference Properties Create, Filter, Group, Sort, Update Description The insurance policy this transaction is related to.
InsurancePolicyVersionId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The current version of the insurance policy.

Field	Details
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
Name	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Sort, Update</p> <p>Description The name of the transaction.</p>
ParentTransactionId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The transaction this insurance policy transaction is related to. For example, a charge transaction is the parent transaction for a payment made against that charge.</p>
TotalTransactionAmount	<p>Type currency</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The total amount of transaction, including transaction fee and tax. This is a calculated field.</p>
TransactionAmount	<p>Type currency</p>

Field	Details
	Properties Create, Filter, Nillable, Sort, Update Description The transaction amount.
TransactionEffectiveDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date of the transaction.
TransactionFeeAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The prorated fee for the transaction.
TransactionNumber	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description An identifier for the transaction from an external system.
TransactionPostedDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date on which the amount was charged to the customer.
TransactionTaxAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description The prorated tax on the transaction amount.
Type	Type picklist

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description Specifies the type of transaction. Possible values are: <ul style="list-style-type: none"> • Cancellation • Credit • Deposit • Endorsement • Loan • Premium Payment • Renewal • Surcharge • Surrender • Withdrawal

InsuranceProfile

Represents the insurance-related attributes for the insured member.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
ContactId	Type reference
	Properties Create, Filter, Group, Sort, Update
	Description The ID of the contact related to this insurance profile.
IsAlcoholAbuser	Type boolean

Field	Details
	Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the person has a history of alcohol abuse. The default value is False.
IsAlcoholConsumer	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the person consumes alcohol. The default value is False.
IsDrugAbuser	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the person has a history of drug abuse. The default value is False.
IsGoodDriver	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the person is categorized as a good driver. The default value is False.
IsGoodStudent	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the person is categorized as a good student. The default value is False.
IsHighRiskOccupation	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the person's current employment is a high-risk job. The default value is False.

Field	Details
IsLicenseSuspended	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the insured member's driver's license was ever suspended. The default value is False.</p>
IsTobaccoConsumer	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the person consumes tobacco. The default value is False.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
MajorCitationCount	<p>Type int</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The number of major citations the person had when the policy was created.</p>
MinorCitationCount	<p>Type int</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p>

Field	Details
	Description The number of minor citations the person had when the policy was created.
Name	Type string Properties Autonumber, Defaulted on create, Filter, Sort Description An auto-generated number assigned to this record.
NumberOfAccidents	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description The number of accidents the insured member was involved in.
SourceSystem	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The name of the source system this record was obtained from.
SourceSystemIdentifier	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of this record in the source system.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

[InsuranceProfileFeed](#)

Feed tracking is available for the object.

[InsuranceProfileHistory](#)

History is available for tracked fields of the object.

Interaction

Represents an interaction (phone call, in-person meeting, or video conference) between two or more people (attendees), typically including at least one representative and one customer or partner. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the account related to the customer or partner who attended the interaction.
EndTime	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date and time that the interaction ended.
InteractionType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The type of interaction. Possible values are: <ul style="list-style-type: none"> • Conference • Email • In Person • Phone Call
LastReferencedDate	Type dateTime

Field	Details
	Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
LocationId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The location of the interaction.
Name	Type string Properties Create, Filter, Group, idLookup, Sort, Update Description The name of the interaction.
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description The ID of the record owner.
StartTime	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date and time that the interaction started.

InteractionAttendee

Represents an attendee of an interaction. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AttendeeType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The type of attendee. Possible values are:</p> <ul style="list-style-type: none">• External• Internal
ContactId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The contact who attended the interaction.</p>
EventId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The event on Salesforce calendar for this attendee.</p>
InteractionId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The interaction for which this attendee record is created.</p>

Field	Details
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
Name	Type string Properties Autonumber, Defaulted on create, Filter, idLookup, Sort Description The name of the interaction attendee.
UserId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The user who attended the interaction.

InteractionSummary

Represents the summary of an interaction, including confidentiality information. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of the account related to the customer who attended the client interaction.</p>
ConfidentialityType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Specifies the level of confidentiality of the information that's recorded in this interaction summary. Possible values are:</p> <ul style="list-style-type: none">• Confidential• Public
InteractionId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The client interaction related to the interaction summary.</p>
InteractionPurpose	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Specifies the purpose of the client interaction. Possible values are:</p> <ul style="list-style-type: none">• Deal Execution• Meet and Greet• Quarterly Check-In
LastReferencedDate	<p>Type dateTime</p>

Field	Details
	Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
MeetingNotes	Type textarea Properties Create, Nillable, Update Description The detailed record of what transpired during the client interaction.
Name	Type string Properties Create, Filter, Group, idLookup, Sort, Update Description The title of the interaction summary, capturing the summary of the interaction.
NextSteps	Type textarea Properties Create, Nillable, Update Description The next steps that were decided during the interaction.
Offering	Type multipicklist Properties Create, Filter, Nillable, Update Description The offerings that were discussed in the client interaction. Possible values are:

Field	Details
	<ul style="list-style-type: none"> Debt Capital Markets Equity Capital Markets Mergers and Acquisitions Advisory
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description The ID of the record owner.</p>
PartnerAccountId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of the account related to the partner who attended the client interaction.</p>
RelatedRecordId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The name of the record such as an opportunity associated with a client interaction.</p>
Status	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Specifies the status of the interaction summary. Possible values are:</p> <ul style="list-style-type: none"> Draft Published

InteractionSummaryParticipant

Represents a user with whom an interaction summary is shared. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `update()`, `upsert()`

Fields

Field	Details
Comments	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Notes about this participant.</p>
InteractionSummaryId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description The interaction summary that's shared with this user.</p>
IsActive	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether this participant is active.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>

Field	Details
Name	Type string Properties Autonumber, Defaulted on create, Filter, idLookup, Sort Description The name of the interaction summary participant.
ParticipantId	Type reference Properties Create, Filter, Group, Sort Description The user or group that the interaction summary is shared with.
ParticipantRoleId	Type reference Properties Create, Filter, Group, Sort, Update Description The role assigned to this participant.

Lead Custom Fields

Represents a lead associated with an individual. Custom fields extend the Lead object for use in Financial Services Cloud.

Fields

Field Name	Details
CreatedByMe__c	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the user contact was converted from this lead.
CreatedFromLead__c	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update

Field Name	Details
	Description Indicates whether a contact converted from this lead sets the value of <code>Contact.CreatedFromLead__c</code> as (true) or not (false).
Employer__c	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The lead's employer information that converts to the individual's contact record upon lead conversion.
ExpressedInterest__c	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Lead's expressed area of interest. Label is <code>Category</code> . Valid values: <ul style="list-style-type: none"> • Mortgage • Personal Loan • Credit Card • Savings Account • Checking Account • HELOC • Day to Day Banking • Manage Money • Property Purchase • Investments • Education • Manage Debt
Household__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description ID of the household record associated with the lead record.
PotentialValue__c	Type currency

Field Name	Details
	Properties Filter, Nillable, Sort Description Potential value from converting the lead.
ProductInterest__c	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Lead's area of interest. This field is deprecated. Use the ExpressedInterest__c field instead.
ReferredByContact__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description External contact who made the referral.
ReferredByUser__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Internal Salesforce user who made the referral.
ReferrerScore__c	Type double Properties Create, Filter, Nillable, Sort, Update Description A value of 0 to 100. A high score reflects a high rate of referral conversion.
RelatedAccount__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Individual or household account related to a lead.

LifeEvent

Represents a client's life event, such as a birth or marriage.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Client__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Individual the life event is related to.
CurrencyIsoCode	Type picklist Properties Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update Description If multiple currencies is enabled, contains the currency ISO code associated with the record.
DiscussionNote__c	Type textarea Properties Create, Filter, Group, Nillable, Sort, Update Description Notes from past discussions.
EventDate__c	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Date of the life event.
EventType__c	Type picklist

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description Type of life event. Valid values: <ul style="list-style-type: none"> • College • New Baby • New Business • New Home • New Job • Retirement
FinancialGoal__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Financial goal that the life event is related to.
GoalType__c	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Type of financial goal implied by the life event. Valid values: <ul style="list-style-type: none"> • Saving for College • Saving for Retirement
SourceSystemId__c	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description ID that uniquely identifies the goal in an external data source.

LoanApplicant

Represents details of the borrower or co-borrower for the loan application. This object is available in API version 47.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
ApplicantExtIdentifier	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description ID that uniquely identifies imported data in an external data source (if applicable).</p>
AsianRaceSubType	<p>Type multipicklist</p> <p>Properties Create, Filter, Nillable, Update</p> <p>Description Borrower's Asian race. Possible values are:</p> <ul style="list-style-type: none"> • Asian Indian • Chinese • Filipino • Japanese • Korean • Other • Vietnamese
BorrowerType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Restricted picklist, Sort, Update</p> <p>Description Applicant's borrower type. Values are:</p> <ul style="list-style-type: none"> • Borrower • CoBorrower

Field	Details
CitizenshipStatus	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Borrower's citizenship status. Possible values are:</p> <ul style="list-style-type: none">• Non-Permanent Resident Alien• Permanent Resident Alien• U.S. Citizen
ContactId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description Contact associated with this borrower.</p>
DependentCount	<p>Type int</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Borrower's number of dependents.</p>
DependentsAge	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Ages of borrower's dependents in a comma-separated list.</p>
EthnicitySubType	<p>Type multipicklist</p> <p>Properties Create, Filter, Nillable, Update</p> <p>Description Borrower's ethnicity origin. Possible values are:</p> <ul style="list-style-type: none">• Cuban

Field	Details
	<ul style="list-style-type: none"> • Mexican • Other • Puerto Rican
EthnicityType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Borrower's ethnicity. Possible values are:</p> <ul style="list-style-type: none"> • Hispanic or Latino • I do not wish to provide this information • Not Hispanic or Latino
GenderType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Borrower's gender. Possible values are:</p> <ul style="list-style-type: none"> • Female • I do not wish to provide this information • Male
HasMilitaryService	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the borrow is serving in the United States Armed Forces or the borrower or the borrower's deceased spouse served in the past.</p>
IsActiveMilitary	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether borrower is currently on active duty with the United States Armed Forces.</p>

Field	Details
IsJointCredit	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether borrower is applying for joint credit.</p>
IsSurvivingMilitarySpouse	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether borrower is a surviving spouse of a veteran.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
LoanApplicationId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description Loan application associated with this borrower.</p>
MaritalStatus	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p>

Field	Details
	Description Borrower's marital status. Possible values are: <ul style="list-style-type: none"> • Married • Separated • Unmarried
MilitaryTourExpirationMonth	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description Month that borrower's tour of service expires.
MilitaryTourExpirationYear	Type int Properties Create, Filter, Group, Nillable, Sort, Update Description Year that borrower's tour of service expires.
Name	Type string Properties Create, Filter, Group, idLookup, Sort, Update Description Name of the loan applicant.
OtherAsianRaceSubType	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Borrower's Asian race if other is specified.
OtherEthnicitySubType	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Borrower's ethnicity if other is selected.

Field	Details
OtherPacIslandSubType	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Borrower's native Hawaiian or Pacific Islander race if other is specified.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description ID of the user who owns this record.</p>
PacIslandSubType	<p>Type multipicklist</p> <p>Properties Create, Filter, Nillable, Update</p> <p>Description Borrower's native Hawaiian or Pacific Islander race. Possible values are:</p> <ul style="list-style-type: none">• Guamanian or Chamorro• Native Hawaiian• Other• Samoan
PreferredLanguage	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Borrower's preferred communication language. Possible values are:</p> <ul style="list-style-type: none">• Chinese• English• I do not wish to respond• Korean• Other• Spanish• Tagalog

Field	Details
	<ul style="list-style-type: none"> Vietnamese
RaceType	<p>Type multipicklist</p> <p>Properties Create, Filter, Nillable, Update</p> <p>Description Borrower's race. Possible values are:</p> <ul style="list-style-type: none"> American Indian or Alaska Native Asian Black or African American I do not wish to provide this information Native Hawaiian or Other Pacific Islander White
TribeName	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Name of borrower's enrolled or principal tribe.</p>
WasActiveMilitary	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether borrower is currently retired, discharged, or separated from active military duty.</p>
WasNonActivatedService	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether borrower's only military service was as a non-activated Reserve soldier or as a non-activated member of the National Guard.</p>

PropertyGeocodeAccuracy	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Restricted picklist, Sort, Update</p> <p>Description The level of accuracy of a location's geographical coordinates compared with its physical address. A geocoding service typically provides this value based on the address's latitude and longitude coordinates.</p>
PropertyLatitude	<p>Type double</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Used with Longitude to specify the precise geolocation of the address. Acceptable values are numbers between –90 and 90 with up to 15 decimal places.</p>
PropertyLongitude	<p>Type double</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Used with Latitude to specify the precise geolocation of the address. Acceptable values are numbers between –180 and 180 with up to 15 decimal places.</p>
PropertyPostalCode	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The address postal code.</p>
PropertyState	<p>Type string</p>

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description The address state.
PropertyStreet	Type textarea Properties Create, Filter, Group, Nillable, Sort, Update Description The address street.
PropertyUseType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Borrower's stated use for the property. Possible values are: <ul style="list-style-type: none"> FHA Secondary Residence Investment Property Primary Residence Secondary Residence
PropertyValue	Type currency Properties Create, Filter, Nillable, Sort, Update Description Estimated present market value of the application property.
RequestedLoanAmount	Type currency Properties Create, Filter, Nillable, Sort, Update Description Total loan amount the borrower is applying for.
UnitsFinancedCount	Type int

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description Number of units being financed at this address.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

[LoanApplicationPropertyFeed](#)

Feed tracking is available for the object.

[LoanApplicationPropertyHistory](#)

History is available for tracked fields of the object.

LoanApplicationTitleHolder

Represents details of borrowers who are applying to hold title to the property the loan application finances. This object is available in API version 47.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
CurrencyIsoCode	Type picklist
	Properties Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update
	Description If multiple currencies is enabled, contains the currency ISO code associated with the record. Possible values are: <ul style="list-style-type: none"> EUR—Euro INR—Indian Rupee USD—U.S. Dollar
IsCurrentTitleHolder	Type boolean

Field	Details
	<p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether person is a current title holder on property to be refinanced.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
LoanApplicationId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description Loan application associated with this title holder.</p>
Name	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Sort, Update</p> <p>Description Name of the loan application title holder.</p>
TitleHolderExtIdentifier	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description ID that uniquely identifies imported data in an external data source (if applicable). This field is unique within your organization.</p>

Field	Details
TitleHolderName	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Name of the person on the title for the property associated with the loan application.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

[LoanApplicationTitleHolderFeed](#)

Feed tracking is available for the object.

[LoanApplicationTitleHolderHistory](#)

History is available for tracked fields of the object.

Opportunity Custom Fields

Represents an opportunity associated with an individual. Custom fields extend the Opportunity object for use in Financial Services Cloud.

Fields

Field Name	Details
FinancialAccount__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description Financial account associated with this opportunity.
ReferredByContact__c	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description External contact referring this opportunity.
ReferredByUser__c	Type reference

Field Name	Details
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description Internal user referring this opportunity.

OpportunityParticipant

Represents information about a participant in the context of an opportunity record. This object is available in API version 50.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `update()`, `upsert()`

Fields

Field	Details
Comments	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Notes about this participant.
IsActive	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether this participant is active.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The most recent date on which a user referenced this record.

Field	Details
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The most recent date on which a user viewed this record.
Name	Type string Properties Autonumber, Defaulted on create, Filter, idLookup, Sort Description An automatically generated name for the participant.
OpportunityId	Type reference Properties Create, Filter, Group, Sort Description The ID of the opportunity related to the participant.
ParticipantId	Type reference Properties Create, Filter, Group, Sort Description The ID of the user or group related to the participant.
ParticipantRoleId	Type reference Properties Create, Filter, Group, Sort, Update Description The ID of the object-based role for this participant.

ParticipantRole

Represents details like the name and associated default access level for a role that a participant can have in the context of a parent record. This object is available in API version 50.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `query()`, `retrieve()`, `update()`, `upsert()`

Fields

Field	Details
DefaultAccessLevel	<p>Type picklist</p> <p>Properties Create, Filter, Group, Restricted picklist, Sort, Update</p> <p>Description The default sharing access granted to the participant role.</p> <p>Valid values are:</p> <ul style="list-style-type: none"> Edit—Read/Write None Read—Read Only
DeveloperName	<p>Type string</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The unique name of the object in the API.</p>
IsActive	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the participant role is activated.</p>
Language	<p>Type picklist</p> <p>Properties Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update</p> <p>Description The language of the participant role.</p>
MasterLabel	<p>Type string</p>

Field	Details
	Properties Create, Filter, Group, idLookup, Sort, Update Description The name for the participant role.
ParentObject	Type picklist Properties Create, Filter, Group, Restricted picklist, Sort, Update Description The parent object for the participant role. Valid values are: <ul style="list-style-type: none"> Account InteractionSummary Opportunity This value is valid in version 51.0 and later.

PersonEducation

Represents information about professional education for a person in a party role.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
CompletionDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description Education's completion date.
ContactId	Type reference

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description ID of the person who earned the degree and is listed as a contact.
EducationLevel	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Level of education achieved. Example values: <ul style="list-style-type: none"> • Undergraduate degree • Medical school • Internship • Residency • Fellowship
GraduationDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description Graduation date from institution.
Identifier	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description ID issued to the recipient by the educational institution.
IdentifierIssuer	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Educational institution's name.
IndividualId	Type reference

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description ID of the person who earned the degree and is listed as an individual.
IsActive	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the record is active.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The most recent date on which a user referenced this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The most recent date on which a user viewed this record.
Name	Type string Properties Create, Filter, Group, Sort, Update Description Name of the degree earned.
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description The ID of the user who owns this record.
StartDate	Type dateTime

Field	Details
	Properties Create, Filter, Nillable, Sort, Update Description Education's start date.
Status	Type picklist Properties Create, Defaulted on create, Filter, Group, Nillable, Sort, Update Description Current status of education. Valid values: <ul style="list-style-type: none"> • Inactive • Revoked • Draft • Verified The default value is Inactive.
UserId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description ID of the person who earned the degree and is listed as a user.
VerificationStatus	Type picklist Properties Create, Defaulted on create, Filter, Group, Nillable, Sort, Update Description Current educational status. Valid values: <ul style="list-style-type: none"> • Authorized • None The default value is None.
VerifiedDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description Education was validated on this date.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

PersonEducationFeed

Feed tracking is available for the object.

PersonEducationHistory

History is available for tracked fields of the object.

PersonEducationOwnerSharingRule

Sharing rules are available for the object.

PersonEducationShare

Sharing is available for the object.

PersonLifeEvent

Represents the life events of an individual, such as marriage, birth of a child, birthday, engagement.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
EventDate	Type dateTime Properties Create, Filter, Sort, Update Description The date on which the life event occurred.
EventDescription	Type textarea Properties Create, Nillable, Update Description The description of the life event.
EventLocation	Type reference Properties Create, Filter, Group, Nillable, Sort, Update

Field	Details
	<p>Description</p> <p>The location where the life event occurred.</p> <p>This is a compound field of type Address and combines these fields: EventLocationCity, EventLocationCountry, EventLocationGeocodeAccuracy, EventLocationLatitude, EventLocationLongitude, EventLocationPostalCode, EventLocationState, and EventLocationStreet. For more information, see Address Compound Fields.</p>
EventType	<p>Type</p> <p>picklist</p> <p>Properties</p> <p>Create, Filter, Group, Sort</p> <p>Description</p> <p>The type of the life event. For example, birth, graduation, job, marriage, relocation, car, home, baby, retirement.</p>
ExpirationDate	<p>Type</p> <p>dateTime</p> <p>Properties</p> <p>Create, Filter, Nillable, Sort, Update</p> <p>Description</p> <p>The the date when a life event expired.</p>
ExpirationDescription	<p>Type</p> <p>textarea</p> <p>Properties</p> <p>Create, Nillable, Update</p> <p>Description</p> <p>Describes why the event expired.</p>
IsExpired	<p>Type</p> <p>boolean</p> <p>Properties</p> <p>Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description</p> <p>Indicates whether a life event has expired. The default value is False.</p>
IsTentative	<p>Type</p> <p>boolean</p> <p>Properties</p> <p>Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description</p> <p>Indicates that the exact date of the event is not known. The default value is False.</p>

Field	Details
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
Name	<p>Type string</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The name of the life event.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description The ID of the record owner.</p>
PrimaryPersonId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description ID of the person to whom the life event is related. This field cannot be updated using API.</p>
RelatedPersonId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p>

Field	Details
	Description The person related to the primary person in a life event involving two people, such as marriage.
SourceSystem	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The name of the source system this record was obtained from.
SourceSystemIdentifier	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of this record in the source system.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

PersonLifeEventFeed

Feed tracking is available for the object.

PersonLifeEventHistory

History is available for tracked fields of the object.

PersonLifeEventOwnerSharingRule

Sharing rules are available for the object.

PersonLifeEventShare

Sharing is available for the object.

PolicyPaymentMethod

Represents the premium payment method for a policy, such as credit card, debit card, or internet banking. This object is available in API version 47.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Name	<p>Type string</p> <p>Properties Autonumber, Defaulted on create, Filter, idLookup, Sort</p> <p>Description An auto-generated number assigned to this record.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description The ID of the record owner.</p>
EndDate__c	<p>Type dateTime</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The date on which the financial account was removed as the active payment method.</p>
FinancialAccount__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The financial account that is used to make any payments for the policy. For example, debit card, credit card, bank account.</p>
InsurancePolicy__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The policy for which this payment setup is done.</p>
IsActive__c	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p>

Field	Details
	Description Indicates whether this financial account and its billing configuration are active.
IsPrimaryAccount__c	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether the financial account is the primary billing account for the policy.
PaymentPercentage__c	Type percent Properties Create, Filter, Nillable, Sort, Update Description The percentage of the total bill amount that is charged to this financial account.
StartDate__c	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date on which the financial account was added as an active payment method.

Producer

Represents an agent or an agency selling insurance.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	Type reference

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the agency's business account.
ContactId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the contact associated with the producer if the producer is an external agent.
InternalUserId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description If the producer is an internal employee, this field contains the employee's user ID.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
Name	Type string Properties Create, Filter, Group, Sort, Update Description A unique identifier for the agent or the agency.

Field	Details
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description ID of the record owner.</p>
Type	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Indicates whether the producer is an agent or an agency. If the producer reference has agency information, this field value is Agent. Otherwise, it can be an independent agent or agency.</p>

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

ProducerFeed

Feed tracking is available for the object.

ProducerHistory

History is available for tracked fields of the object.

ProducerOwnerSharingRule

Sharing rules are available for the object.

ProducerShare

Sharing is available for the object.

ProducerCommission

Represents a producer's commission for an insurance policy. The commission can be calculated from the commissionable transactions or can be populated from an external system. This object is available in API version 51.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
CommissionAmount	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The calculated commission amount for the insurance policy transaction.</p>
CommissionableAmount	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The amount on which the commission is applied. This can be a transaction amount or a portion of the premium.</p>
InsurancePolicyAssetId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The insured item for which the commission was calculated.</p>
InsurancePolicyCoverageId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The ID of the policy coverage for which the commission was calculated.</p>
InsurancePolicyId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The insurance policy for which the commission was calculated.</p>
InsurancePolicyTransactionId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p>

Field	Details
	Description The transaction for which the commission record was created.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
Name	Type string Properties Create, Filter, Group, idLookup, Sort, Update Description The name of the producer commission.
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description The ID of the record owner.
PaymentDatetime	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date on which the commission was paid.
ProducerId	Type reference

Field	Details
	Properties Create, Filter, Group, Sort, Update Description The producer, broker, brokerage, or other user who receives the commission.
SourceSystem	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The system from which the producer commission record was sourced.
SourceSystemIdentifier	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description The ID of the producer commission record in the source system. This field is unique within your organization.
Status	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Specifies the status of the commission payment. Possible values are: <ul style="list-style-type: none"> Disputed Paid Pending Reversed
Type	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Specifies the type of commission paid to a producer, account, or contact for a commissionable transaction. Possible values are: <ul style="list-style-type: none"> Advance

Field	Details
	<ul style="list-style-type: none">• Bonus• Chargeback• Commission• Contingent Commission

ProducerPolicyAssignment

A junction object that associates the Insurance Policy object with the Producer object. This object represents the producers who are managing the same insurance policy. This object is available in API version 47.0 and later. You see this object only if you have enabled the Let Multiple Producers Work on the Same Policy org pref.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
InsurancePolicyId	Type reference Properties Create, Filter, Group, Sort, Update Description The insurance policy that the producer is managing.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.

Field	Details
LineOfBusiness	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The producer's line of business. Possible values are:</p> <ul style="list-style-type: none">• Business Liability• Commercial Auto• Commercial Property
Name	<p>Type string</p> <p>Properties Autonumber, Defaulted on create, Filter, idLookup, Sort</p> <p>Description An auto-generated number assigned to this record.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description The ID of the record owner.</p>
ProducerId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The ID of one of the producers who are working on the insurance policy.</p>

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

[ProducerPolicyAssignmentFeed](#)

Feed tracking is available for the object.

[ProducerPolicyAssignmentHistory](#)

History is available for tracked fields of the object.

ProducerPolicyAssignmentOwnerSharingRule

Sharing rules are available for the object.

ProducerPolicyAssignmentShare

Sharing is available for the object.

ProductCoverage

A junction object that associates the Product object with the CoverageType object. You see this object only if you have enabled the Access Master List of Coverage Types org pref.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
CoverageTypeId	Type reference Properties Create, Filter, Group, Sort, Update Description The ID of the coverage type.
EffectiveDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date from which the coverage is in effect.
ExpirationDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The date on which the coverage expires.
IsCovered	Type boolean

Field	Details
	<p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether this coverage is included in the product. The default value is False.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
Name	<p>Type string</p> <p>Properties Autonumber, Defaulted on create, Filter, Sort</p> <p>Description An auto-generated number assigned to this record.</p>
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description ID of the record owner.</p>
ProductId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The ID of the product that is covered.</p>

Field	Details
SourceSystem	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The name of the source system this record was obtained from.
SourceSystemIdentifier	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of this record in the source system.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

Feed tracking is available for the object.

[ProductCoverageHistory](#)

History is available for tracked fields of the object.

[ProductCoverageOwnerSharingRule](#)

Sharing rules are available for the object.

[ProductCoverageShare](#)

Sharing is available for the object.

ReciprocalRole

Represents the other entity's corresponding role in a one-to-one relationship between entities.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
CreateInverseRole__c	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether the corresponding reciprocal role record is created automatically for the inverse role (<code>true</code>) or not (<code>false</code>).</p>
CurrencyIsoCode	<p>Type picklist</p> <p>Properties Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update</p> <p>Description If multiple currencies is enabled, contains the currency ISO code associated with the record.</p>
InverseRelationship__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Uniquely identifies the relationship between <code>Role</code> and <code>InverseRole__c</code> so that it can be referenced by a trigger that creates the inverse relationship record.</p>
InverseRole__c	<p>Type string</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description The role that the other entity occupies in the relationship, such as a grandparent to a grandchild, or an owned business to a proprietor.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description Timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p>

Field	Details
	Properties Filter, Nillable, Sort
	Description Timestamp for when the current user last viewed this record.
Name	Type string
	Properties Create, Defaulted on create, Filter, Group, idLookup, Nillable, Sort, Update
	Description Name of this reciprocal role.
OwnerId	Type reference
	Properties Create, Defaulted on create, Filter, Group, Sort, Update
	Description ID of the user who created the reciprocal role record.
RecordTypeId	Type reference
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description ID of the record type associated with this reciprocal role.
RelationshipType__c	Type picklist
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description Type of entities involved in the relationship. Valid values: <ul style="list-style-type: none"> All Contact Contact Relation Account Account Relation
SourceSystemId__c	Type string
	Properties Create, Filter, Group, idLookup, Nillable, Sort, Update

Field	Details
	Description ID that uniquely identifies the reciprocal role in an external data source.

ResidentialLoanApplication

Represents details about a loan application from the lender. This object is available in API version 47.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AccountId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the account related to the loan application.
AmortizationTerm	Type double Properties Create, Filter, Nillable, Sort, Update Description Duration of the loan in months.
AmortizationType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Amortization type for the loan. Possible values are: <ul style="list-style-type: none"> Adjustable Rate Fixed Rate Other

Field	Details
ApplicationExtIdentifier	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description ID that uniquely identifies imported data in an external data source (if applicable).</p>
BalloonTermMonths	<p>Type double</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Number of months during which the cumulative loan must be repaid.</p>
CurrencyIsoCode	<p>Type picklist</p> <p>Properties Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update</p> <p>Description If multiple currencies are enabled, contains the currency ISO code associated with the record. Values are:</p> <ul style="list-style-type: none"> • EUR—Euro • INR—Indian Rupee • USD—U.S. Dollar
EstateHoldType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Lender's lien is on both land and structure (fee simple) or just structure (leasehold). Possible values are:</p> <ul style="list-style-type: none"> • Fee Simple • Leasehold
HasOtherLoanFeature	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p>

Field	Details
	Description Indicates whether loan has other amortization feature.
HasPrepaymentPenalty	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether penalty is incurred if borrower pays off loan balance before the loan term expires.
ImprovementCost	Type currency Properties Create, Filter, Nillable, Sort, Update Description Construction costs for a construction loan or home improvement costs for a renovation loan.
InitialBuydownRate	Type double Properties Create, Filter, Nillable, Sort, Update Description Initial lesser interest rate for the loan.
IntOnlyTermMonthCount	Type double Properties Create, Filter, Nillable, Sort, Update Description Number of months that loan payments are interest only.
InterestRate	Type double Properties Create, Filter, Nillable, Sort, Update Description Interest rate for the loan.
IsBalloon	Type boolean

Field	Details
	Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether borrower is applying for a balloon payment mortgage.
IsBorrowerCommPropState	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether at least one borrower lives in a community property state.
IsConstructionConversion	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether loan proceeds to provide permanent financing replacing interim construction financing.
IsContractConversion	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether loan proceeds is to pay off balance due on a contract for deed or land contract.
IsEnergyRelImprovement	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether loan is to finance energy-related improvements.
IsInterestOnly	Type boolean Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether borrower is applying for an interest-only mortgage.

Field	Details
IsNegativeAmortization	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether loan allows for negative amortization where shortfalls in interest payments are added to the outstanding loan balance.</p>
IsPropertyCommPropState	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether property is located in a community property state.</p>
IsRenovation	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether loan proceeds to finance cost of renovations to the property, and renovation value is included in the property's appraised value.</p>
IsSingleClosing	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether construction and permanent loans have a single combined closing. Once construction is complete, the loan converts to a traditional mortgage.</p>
IsSubjectToPriorityLien	<p>Type boolean</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description Indicates whether property is currently subject to an energy-related lien that could take priority over the first mortgage lien.</p>
IsTempIntRateBuydown	<p>Type boolean</p>

Field	Details
	Properties Create, Defaulted on create, Filter, Group, Sort, Update Description Indicates whether borrower is applying for loan with an initially reduced interest payment in exchange for an up-front cash deposit.
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
LeaseHoldExpirationDate	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description Date when leasehold expires if land is leased.
LoanPurpose	Type picklist Properties Create, Filter, Group, Nillable, Restricted picklist, Sort, Update Description What the borrower will use the loan for. Values are: <ul style="list-style-type: none"> • Other • Purchase • Refinance
LotAcquiredDate	Type dateTime

Field	Details
	Properties Create, Filter, Nillable, Sort, Update Description Date the property or land was purchased.
LotOriginalCost	Type currency Properties Create, Filter, Nillable, Sort, Update Description Original property cost (refinance) or original land cost (construction).
MonthsBeforeFirstAdj	Type double Properties Create, Filter, Nillable, Sort, Update Description Number of months before the first rate adjustment for an adjustable rate loan.
MonthsBetweenAdjustments	Type double Properties Create, Filter, Nillable, Sort, Update Description Number of months between subsequent rate adjustments for an adjustable rate loan.
MortgageLienType	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Type of mortgage lien associated with this loan application. Possible values are: <ul style="list-style-type: none"> • First Lien • Subordinate Lien
MortgageProgramType	Type picklist Properties Create, Filter, Group, Nillable, Restricted picklist, Sort, Update

Field	Details
	Description Type of mortgage program applied for. Values are: <ul style="list-style-type: none"> • Conventional • FHA • Other • USDA Rural Housing Service • VA
Name	Type string Properties Create, Filter, Group, idLookup, Sort, Update Description Name of the residential loan application.
NativeLandTenure	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Property is located on an area reserved by or for an Indian land, village, or tribe to live on and use. Possible values are: <ul style="list-style-type: none"> • Alaska Native Corporation Land • Fee Simple (On a Reservation) • Individual Trust Land (Allotted/Restricted) • Tribal Trust Land (Off Reservation) • Tribal Trust Land (On a Reservation)
OpportunityId	Type reference Properties Create, Filter, Group, Nillable, Sort, Update Description The ID of the opportunity associated with the loan application.
OtherAmortizationType	Type string

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description Description of other amortization type for government loans.
OtherLoanFeature	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Description of other loan amortization feature.
OtherLoanPurpose	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description What the borrower will use the loan for if other was specified.
OtherMortgageProgramType	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Description of the other mortgage type.
OtherRefinanceProgType	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description Refinance program name if other was specified.
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description ID of the user who owns this record.
PrepayPenaltyTermMonth	Type double

Field	Details
	<p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Number of months during which borrower incurs a penalty for early payoff of the loan balance.</p>
ProjectType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Specifies the type of project that the property belongs to. Possible values are:</p> <ul style="list-style-type: none"> • Condominium • Cooperative • Planned Unit Development (PUD) • Property is not located in a project
RefinanceProgramType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The applicable refinance program type based on the investor, guarantor, or lender guidelines. Possible values are:</p> <ul style="list-style-type: none"> • Full Documentation • Interest Rate Reduction • Other • Streamlined without Appraisal
RefinanceType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Refinance loan type. Possible values are:</p> <ul style="list-style-type: none"> • Cash Out • Limited Cash Out • No Cash Out

Field	Details
Status	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Indicates the current status of the loan application. Possible values are:</p> <ul style="list-style-type: none"> Completed New Pending
TitleType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Way the borrower or borrowers take title for the loan. Possible values are:</p> <ul style="list-style-type: none"> Joint Tenancy with Right of Survivorship Life Estate Other Sole Ownership Tenancy by the Entirety Tenancy in Common
TotalFinLiabilityMonthlyAmt	<p>Type currency</p> <p>Properties Filter, Nillable, Sort</p> <p>Description Total monthly amount of borrowers' outstanding financial liabilities payments excluding real estate.</p>
TotalFinancialAssetAmount	<p>Type currency</p> <p>Properties Filter, Nillable, Sort</p> <p>Description Total amount of borrowers' financial account assets excluding real estate.</p>

Field	Details
TotalOtherAssetAmount	<p>Type currency</p> <p>Properties Filter, Nillable, Sort</p> <p>Description Total amount of borrowers' other assets excluding real estate.</p>
TotalOtherFinLiabilityMonthlyAmt	<p>Type currency</p> <p>Properties Filter, Nillable, Sort</p> <p>Description Total monthly amount of borrowers' other monthly liability and expense payments excluding real estate.</p>
TrustTitleType	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Title to be held in a living trust or a land trust. Possible values are:</p> <ul style="list-style-type: none"> • Title Will be Held by a Land Trust • Title Will be Held by an Inter Vivos (Living) Trust

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

[ResidentialLoanApplicationFeed](#)

Feed tracking is available for the object.

[ResidentialLoanApplicationHistory](#)

History is available for tracked fields of the object.

[ResidentialLoanApplicationOwnerSharingRule](#)

Sharing rules are available for the object.

[ResidentialLoanApplicationShare](#)

Sharing is available for the object.

Revenue

Represents data from Financial Services Cloud and external systems to aggregate revenue streams for an advisor's book of business.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Account__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Account that Revenue__c is related from. This field or FinancialAccount__c requires an entry but not both.</p>
Amount__c	<p>Type currency</p> <p>Properties Create, Filter Sort, Update</p> <p>Description Revenue amount.</p>
Date__c	<p>Type date</p> <p>Properties Create, Filter, Group, Sort, Update</p> <p>Description Date when this revenue was made.</p>
FinancialAccount__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Financial Account that Revenue__c is related from. This field or Account__c requires an entry but not both.</p>
SourceSystemId__c	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p>

Field	Details
	Description A value that uniquely identifies the revenue in an external data source.
SubType__c	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The subtype of revenues. Valid values: Transaction, Advisory, Investment, Custodian, Planning.
Type__c	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The type of revenues. Valid values: Fees, Commission.

Securities

Represents a security, such as a stock or bond.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
CurrencyIsoCode	Type picklist Properties Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update Description If multiple currencies is enabled, contains the currency ISO code associated with the record.
CUSIP__c	Type string

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update Description Committee on Uniform Securities Identification Procedures identification number for the securities.
Exchange__c	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description Exchange on which the securities are traded. Valid values: <ul style="list-style-type: none"> • NYSE • NASDAQ
LastReferencedDate	Type dateTime Properties Filter, Nillable, Sort Description Timestamp for when the current user last viewed a record related to this record.
LastUpdated__c	Type date Properties Create, Filter, Group, Nillable, Sort, Update Description Timestamp for when data for the securities was last updated by an external data source.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description Timestamp for when the current user last viewed this record.
Name	Type string Properties Create, Defaulted on create, Filter, Group, idLookup, Nillable, Sort, Update

Field	Details
	Description Name of the securities. Label is <code>Symbol</code> .
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description ID of the user who created the securities record.
Price__c	Type currency Properties Create, Filter, Nillable, Sort, Update Description Current price of the securities.
SecuritiesName__c	Type string Properties Create, Filter, Group, idLookup, Sort, Update Description Name that uniquely identifies the securities.
SecurityId__c	Type string Properties Create, Filter, Group, Nillable, Sort, Update Description ID of the securities.
SourceSystemId__c	Type string Properties Create, Filter, Group, idLookup, Nillable, Sort, Update Description ID that uniquely identifies the securities in an external data source.

SecuritiesHolding

Represents the securities associated with an insurance policy. This object is available in API version 47.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AssetCategory	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The subcategory of asset type. Possible values are:</p> <ul style="list-style-type: none"> • Allocation • Alternative • Commodities • International Equity • Municipal Bond • Sector Equity • Taxable Bond • U.S. Equity
AssetCategoryName	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The market capitalization and investing style. Possible values are:</p> <ul style="list-style-type: none"> • Large Blend • Large Growth • Large Value • Mid-Cap Blend • Mid-Cap Growth

Field	Details
	<ul style="list-style-type: none"> • Mid-Cap Value • Small Blend • Small Growth • Small Value
AssetClass	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The major category of asset type. Possible values are:</p> <ul style="list-style-type: none"> • Alternative Investments • Cash Equivalents • Equities • Fixed Income
GainLoss	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Change in the value of this holding since its purchase.</p>
HouseholdId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The household this holding rolls up to.</p>
InsurancePolicyId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The insurance policy this holding is related to.</p>
LastReferencedDate	<p>Type dateTime</p>

Field	Details
	Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed a record related to this record.
LastUpdated	Type dateTime Properties Create, Filter, Nillable, Sort, Update Description The timestamp for when data for this holding was last updated by an external data source.
LastViewedDate	Type dateTime Properties Filter, Nillable, Sort Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.
MarketValue	Type currency Properties Create, Filter, Nillable, Sort, Update Description The current market value of this holding.
Name	Type string Properties Create, Filter, Group, idLookup, Sort, Update Description The name of the holding.
OwnerId	Type reference Properties Create, Defaulted on create, Filter, Group, Sort, Update Description The ID of the record owner.

Field	Details
PercentChange	<p>Type percent</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The percent change in the value of this holding since its purchase.</p>
Price	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Current price per share.</p>
PrimaryOwnerId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The primary owner of this holding.</p>
PurchasePrice	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Price per share at the time of purchase.</p>
Shares	<p>Type double</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The number of shares held.</p>
SourceSystem	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The name of the source system this record was obtained from.</p>

Field	Details
SourceSystemIdentifier	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Nillable, Sort, Update</p> <p>Description The ID of this record in the source system. This field is unique within your organization.</p>

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

[SecuritiesHoldingFeed](#)

Feed tracking is available for the object.

[SecuritiesHoldingHistory](#)

History is available for tracked fields of the object.

[SecuritiesHoldingOwnerSharingRule](#)

Sharing rules are available for the object.

[SecuritiesHoldingShare](#)

Sharing is available for the object.

Task Custom Fields

Represents a task associated with a client. Custom fields extend the standard Task object for use in Financial Services Cloud.

Fields

Field Name	Details
Expectations__c	<p>Type textarea</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description Expectations that this task relates to.</p>
Household__c	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description ID of the household associated with the individual.</p>

Field Name	Details
NextSteps__c	Type textarea Properties Create, Filter, Group, Nillable, Sort, Update Description Next steps for this task.
Objectives__c	Type textarea Properties Create, Filter, Group, Nillable, Sort, Update Description Objectives that this task relates to.
Regarding__c	Type picklist Properties Create, Filter, Group, Nillable, Sort, Update Description The nature of this task. Valid values: <ul style="list-style-type: none"> Prospecting Onboarding Client Retention Service

User Custom Fields

Represents a user in your organization.

Supported Calls

`create()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `update()`, `upsert()`

Fields

Field	Details
ReferrerScore__c	Type double

Field	Details
	Properties Create, Filter, Nillable, Sort, Update
	Description A value of 0 to 100. A high score reflects a high rate of referral conversion.

WealthAppConfig

Represents configuration information for Financial Services Cloud functionality.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
InteractionUpdateFrequency	Type double
	Properties Create, Defaulted on create, Filter, Nillable, Sort, Update
	Description Frequency (in minutes) with which the Last Interaction and Next Interaction dates are automatically updated. Default is 15 min.
RejectedReferralStatus	Type string
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description The lead status used to identify rejected referrals.

WorkerCompCoverageClass

Represents the compensation coverage class that a worker belongs to. This object is available in API version 47.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
InsurancePolicyCoverageId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The coverages included in the insurance policy.</p>
InsurancePolicyId	<p>Type reference</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The insurance policy that covers this compensation coverage class.</p>
LastReferencedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed a record related to this record.</p>
LastViewedDate	<p>Type dateTime</p> <p>Properties Filter, Nillable, Sort</p> <p>Description The timestamp for when the current user last viewed this record. If this value is null, it's possible that this record was referenced (LastReferencedDate) and not viewed.</p>
Name	<p>Type string</p> <p>Properties Autonumber, Defaulted on create, Filter, idLookup, Sort</p> <p>Description The name of the compensation coverage class.</p>

Field	Details
OwnerId	<p>Type reference</p> <p>Properties Create, Defaulted on create, Filter, Group, Sort, Update</p> <p>Description The ID of the record owner.</p>
Premium	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The premium for the insurance policy that covers this compensation coverage class.</p>
TotalExposure	<p>Type currency</p> <p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description The payroll that the employees of this compensation coverage class belong to.</p>
WorkerClass	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The code that represents the compensation class of the employees. Possible values are:</p> <ul style="list-style-type: none"> • 1701 Abrasive Wheel Mfg. & Drivers • 1748 Abrasive Wheel Mfg. & Drivers • 1860 Abrasive Paper or Cloth Preparation
WorkerCount	<p>Type int</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The number of employees in this compensation coverage class.</p>
WorkerLocationId	<p>Type reference</p>

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description The location where the worker is employed.

Associated Objects

This object has the following associated objects. Unless noted, they are available in the same API version as this object.

WorkerCompCoverageClassFeed

Feed tracking is available for the object.

WorkerCompCoverageClassHistory

History is available for tracked fields of the object.

WorkerCompCoverageClassOwnerSharingRule

Sharing rules are available for the object.

WorkerCompCoverageClassShare

Sharing is available for the object.

FINANCIAL SERVICES CLOUD SETUP OBJECTS

Use setup objects to interact with metadata for declarative development. For example, you can create your own version of Setup, or restrict the amount of data required to push to an app to a mobile phone.

[Tooling API Developer Guide](#)

BatchCalcJobDefinition

Represents a Data Processing Engine definition. This object is available in API version 51.0 and later.

Supported SOAP API Calls

`describeSObjects()`, `query()`, `retrieve()`

Supported REST API Methods

DELETE, GET, HEAD, PATCH, POST, Query

Fields

Field	Details
BatchJobDefinitionId	Type reference Properties Filter, Group, Nillable, Sort Description The unique identifier of the associated batch job definition.
DeveloperName	Type string Properties Filter, Group, Sort Description The developer name of the Data Processing Engine definition.
FullName	Type string

Field	Details
	<p>Properties Create, Group, Nillable</p> <p>Description The name of the Data Processing Engine definition.</p> <p>Query this field only if the query result contains no more than one record. Otherwise, an error is returned. If more than one record exists, use multiple queries to retrieve the records. This limit protects performance.</p>
IsTemplate	<p>Type boolean</p> <p>Properties Defaulted on create, Filter, Group, Sort</p> <p>Description Indicates whether this is a template Data Processing Engine definition.</p>
Language	<p>Type picklist</p> <p>Properties Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort</p> <p>Description The language in which this Data Processing Engine definition is created.</p> <p>Possible values are:</p> <ul style="list-style-type: none"> • da—Danish • de—German • en_US—English • es—Spanish • es_MX—Spanish (Mexico) • fi—Finnish • fr—French • it—Italian • ja—Japanese • ko—Korean • nl_NL—Dutch • no—Norwegian • pt_BR—Portuguese (Brazil) • ru—Russian • sv—Swedish • th—Thai • zh_CN—Chinese (Simplified)

Field	Details
	<ul style="list-style-type: none"> zh_TW—Chinese (Traditional)
ManageableState	<p>Type ManageableState enumerated list</p> <p>Properties Filter, Group, Nillable, Restricted picklist, Sort</p> <p>Description Indicates the manageable state of the specified component that is contained in a package:</p> <ul style="list-style-type: none"> beta deleted deprecated deprecatedEditable installed installedEditable released unmanaged
MasterLabel	<p>Type string</p> <p>Properties Filter, Group, Sort</p> <p>Description Label of the Data Processing Engine definition.</p>
Metadata	<p>Type complexvalue</p> <p>Properties Create, Nillable, Update</p> <p>Description Data Processing Engine definition's metadata.</p> <p>Query this field only if the query result contains no more than one record. Otherwise, an error is returned. If more than one record exists, use multiple queries to retrieve the records. This limit protects performance.</p>
NamespacePrefix	<p>Type string</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The namespace prefix associated with this object. Each Developer Edition organization that creates a managed package has a unique namespace prefix. Limit: 15 characters. You can</p>

Field	Details
	<p>refer to a component in a managed package by using the <i>namespacePrefix__componentName</i> notation.</p> <p>The namespace prefix can have one of the following values:</p> <ul style="list-style-type: none"> • In Developer Edition organizations, the namespace prefix is set to the namespace prefix of the organization for all objects that support it. There is an exception if an object is in an installed managed package. In that case, the object has the namespace prefix of the installed managed package. This field's value is the namespace prefix of the Developer Edition organization of the package developer. • In organizations that are not Developer Edition organizations, NamespacePrefix is only set for objects that are part of an installed managed package. There is no namespace prefix for all other objects.
ProcessType	<p>Type</p> <p>picklist</p> <p>Properties</p> <p>Filter, Group, Restricted picklist, Sort</p> <p>Description</p> <p>The process type for which the Data Processing Engine definition is created.</p> <p>Possible values are:</p> <ul style="list-style-type: none"> • DataProcessingEngine—Standard • Rebates • Loyalty • FSCHierarchyRollUp

BatchJobDefinition

Represents the definition of a batch job. This object is available in API version 51.0 and later.

Supported SOAP API Calls

`describeSObjects()`, `query()`, `retrieve()`

Supported REST API Methods

`DELETE`, `GET`, `HEAD`, `PATCH`, `POST`, `Query`

Fields

Field	Details
Description	<p>Type textarea</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The description of the batch job definition.</p>

FINANCIAL SERVICES CLOUD ASSOCIATED OBJECTS

This section provides a list of objects associated to Financial Services Cloud standard objects with their standard fields.

Some fields may not be listed for some objects. To see the system fields for each object, see [System Fields](#) in the *Object Reference for Salesforce and Lightning Platform*.

To verify the complete list of fields for an object, use a describe call from the API or inspect with an appropriate tool. For example, inspect the WSDL or use a schema viewer.

StandardObjectNameFeed

StandardObjectNameFeed is the model for all feed objects associated with standard objects. These objects represent the posts and feed-tracked changes of a standard object.

The object name is variable and uses *StandardObjectNameFeed* syntax. For example, *AccountFeed* represents the posts and feed-tracked changes on an account record. We list the available associated feed objects at the end of this topic. For specific version information, see the documentation for the standard object.

Supported Calls

`delete()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`

Special Access Rules

In the internal org, users can delete all feed items they created. This rule varies in communities where threaded discussions and delete-blocking are enabled. Community members can delete all feed items they created, provided the feed items don't have content nested under them—like a comment, answer, or reply. Where the feed item has nested content, only feed moderators and users with the Modify All Data permission can delete threads.

To delete feed items they didn't create, users must have one of these permissions:

- Modify All Data
- Modify All on the parent object, like Account for AccountFeed
- Moderate Chatter

Note: Users with the Moderate Chatter permission can delete only the feed items and comments they can see.

Only users with this permission can delete items in unlisted groups.

For more special access rules, if any, see the documentation for the standard object. For example, for AccountFeed, see the special access rules for Account.

Fields

Field	Details
BestCommentId	<p>Type reference</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The ID of the comment marked as best answer on a question post.</p>
Body	<p>Type textarea</p> <p>Properties Nillable, Sort</p> <p>Description The body of the post. Required when <code>Type</code> is <code>TextPost</code>. Optional when <code>Type</code> is <code>ContentPost</code> or <code>LinkPost</code>.</p>
CommentCount	<p>Type int</p> <p>Properties Filter, Group, Sort</p> <p>Description The number of comments associated with this feed item.</p>
ConnectionId	<p>Type reference</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description When a <code>PartnerNetworkConnection</code> modifies a record that is tracked, the <code>CreatedBy</code> field contains the ID of the system administrator. The <code>ConnectionId</code> contains the ID of the <code>PartnerNetworkConnection</code>. Available if Salesforce to Salesforce is enabled for your organization.</p>
InsertedById	<p>Type reference</p> <p>Properties Group, Nillable, Sort</p> <p>Description ID of the user who added this item to the feed. For example, if an application migrates posts and comments from another application into a feed, the <code>InsertedBy</code> value is set to the ID of the context user.</p>

Field	Details
isRichText	<p>Type boolean</p> <p>Properties Defaulted on create, Filter, Group, Sort</p> <p>Description Indicates whether the feed item Body contains rich text. If you post a rich text feed comment using SOAP API, set <code>IsRichText</code> to <code>true</code> and escape HTML entities from the body. Otherwise, the post is rendered as plain text.</p> <p>Rich text supports the following HTML tags:</p> <ul style="list-style-type: none"> • <code><p></code> <p> Tip: Though the <code>
</code> tag isn't supported, you can use <code><p>&nbsp;&nbsp;&nbsp;</p></code> to create lines.</p> <ul style="list-style-type: none"> • <code><a></code> • <code></code> • <code><code></code> • <code><i></code> • <code><u></code> • <code><s></code> • <code></code> • <code></code> • <code></code> • <code></code> <p>The <code></code> tag is accessible only through the API and must reference files in Salesforce similar to this example: <code></code></p> <p> Note: In API version 35.0 and later, the system replaces special characters in rich text with escaped HTML. In API version 34.0 and prior, all rich text appears as a plain-text representation.</p>
LikeCount	<p>Type int</p> <p>Properties Filter, Group, Sort</p> <p>Description The number of likes associated with this feed item.</p>
LinkUrl	<p>Type url</p> <p>Properties Nillable, Sort</p>

Field	Details
	Description The URL of a <code>LinkPost</code> .
<code>NetworkScope</code>	Type picklist Properties Group, Nillable, Restricted picklist, Sort Description Specifies whether this feed item is available in the default Experience Cloud site, a specific Experience Cloud site, or all sites. This field is available in API version 26.0 and later, if digital experiences is enabled for your org. <code>NetworkScope</code> can have the following values: <ul style="list-style-type: none"> • <code>NetworkId</code>—The ID of the Experience Cloud site in which the <code>FeedItem</code> is available. If left empty, the feed item is only available in the default Experience Cloud site. • <code>AllNetworks</code>—The feed item is available in all Experience Cloud sites. Note the following exceptions for <code>NetworkScope</code> : <ul style="list-style-type: none"> • Only feed items with a Group or User parent can set a <code>NetworkId</code> or a null value for <code>NetworkScope</code>. • For feed items with a record parent, users can set <code>NetworkScope</code> only to <code>AllNetworks</code>. • You can't filter a feed item on the <code>NetworkScope</code> field.
<code>ParentId</code>	Type reference Properties Filter, Group, Sort Description ID of the record that is tracked in the feed. The detail page for the record displays the feed.
<code>RelatedRecordId</code>	Type reference Properties Group, Nillable, Sort Description ID of the <code>ContentVersion</code> record associated with a <code>ContentPost</code> . This field is null for all posts except <code>ContentPost</code> .
<code>Title</code>	Type string Properties Group, Nillable, Sort

Field	Details
	Description The title of the feed item. When the <code>Type</code> is <code>LinkPost</code> , the <code>LinkUrl</code> is the URL and this field is the link name.
Type	Type picklist Properties Filter, Group, Nillable, Restricted picklist, Sort Description The type of feed item. Values are: <ul style="list-style-type: none"> • <code>ActivityEvent</code>—indirectly generated event when a user or the API adds a Task associated with a feed-enabled parent record (excluding email tasks on cases). Also occurs when a user or the API adds or updates a Task or Event associated with a case record (excluding email and call logging). For a recurring Task with <code>CaseFeed</code> disabled, one event is generated for the series only. For a recurring Task with <code>CaseFeed</code> enabled, events are generated for the series and each occurrence. • <code>AdvancedTextPost</code>—created when a user posts a group announcement and, in Lightning Experience as of API version 39.0 and later, when a user shares a post. • <code>AnnouncementPost</code>—Not used. • <code>ApprovalPost</code>—generated when a user submits an approval. • <code>BasicTemplateFeedItem</code>—Not used. • <code>CanvasPost</code>—a post made by a canvas app posted on a feed. • <code>CollaborationGroupCreated</code>—generated when a user creates a public group. • <code>CollaborationGroupUnarchived</code>—Not used. • <code>ContentPost</code>—a post with an attached file. • <code>CreatedRecordEvent</code>—generated when a user creates a record from the publisher. • <code>DashboardComponentAlert</code>—generated when a dashboard metric or gauge exceeds a user-defined threshold. • <code>DashboardComponentSnapshot</code>—created when a user posts a dashboard snapshot on a feed. • <code>LinkPost</code>—a post with an attached URL. • <code>PollPost</code>—a poll posted on a feed. • <code>ProfileSkillPost</code>—generated when a skill is added to a user's Chatter profile. • <code>QuestionPost</code>—generated when a user posts a question. • <code>ReplyPost</code>—generated when Chatter Answers posts a reply. • <code>RypplePost</code>—generated when a user creates a Thanks badge in WDC. • <code>TextPost</code>—a direct text entry on a feed. • <code>TrackedChange</code>—a change or group of changes to a tracked field. • <code>UserStatus</code>—automatically generated when a user adds a post. Deprecated.

Field	Details
Visibility	<p>Type picklist</p> <p>Properties Filter, Group, Nillable, Restricted picklist, Sort</p> <p>Description Specifies whether this feed item is available to all users or internal users only. This field is available if Salesforce Communities are enabled for your organization.</p> <p>Visibility can have the following values:</p> <ul style="list-style-type: none"> • AllUsers—The feed item is available to all users who have permission to see the feed item. • InternalUsers—The feed item is available to internal users only. <p>Note the following exceptions for Visibility:</p> <ul style="list-style-type: none"> • For record posts, Visibility is set to InternalUsers for all internal users by default. • External users can set Visibility only to AllUsers. • On user and group posts, only internal users can set Visibility to InternalUsers.

Usage

A feed for an object is automatically created when a user enables feed tracking for the object. Use feeds to track changes to records. For example, AccountFeed tracks changes to an account record. Use feed objects to retrieve the content of feed fields, such as type of feed or feed ID.

Note the following SOQL restrictions. No SOQL limit if logged-in user has View All Data permission. If not, specify a **LIMIT** clause of 1,000 records or fewer. SOQL **ORDER BY** on fields using relationships is not available. Use **ORDER BY** on fields on the root object in the SOQL query.

Objects That Follow This Model

These objects follow the standard pattern for associated feed objects.

- AwardFeed
- BatchJobFeed
- BatchJobPartFailedRecordFeed
- BatchJobPartFeed
- BusinessLicenseFeed
- BusinessMilestoneFeed
- BusinessProfileFeed
- ClaimCaseFeed
- ClaimFeed
- ClaimItemFeed

- ClaimParticipantFeed

- LoanApplicationFinancialFeed
- LoanApplicationLiabilityFeed
- LoanApplicationPropertyFeed
- LoanApplicationTitleHolderFeed
- PersonLifeEventFeed
- ProducerFeed
- ProducerPolicyAssignmentFeed
- ProductCoverageFeed
- ResidentialLoanApplicationFeed
- SecuritiesHoldingFeed
- WorkerCompCoverageClassFeed

*StandardObjectName*History

StandardObjectNameHistory is the model for all history objects associated with standard objects. These objects represent the history of changes to the values in the fields of a standard object.

The object name is variable and uses *StandardObjectNameHistory* syntax. For example, AccountHistory represents the history of changes to the values of an account record's fields. We list the available associated history objects at the end of this topic. For specific version information, see the documentation for the standard object.

Supported Calls

`describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`

Special Access Rules

For specific special access rules, if any, see the documentation for the standard object. For example, for AccountHistory, see the special access rules for Account.

Fields

Field Name	Details
<i>StandardObjectId</i>	Type reference Properties Filter, Group, Sort Description ID of the standard object.
<i>DataType</i>	Type picklist Properties Filter, Group, Nillable, Restricted picklist, Sort Description Data type of the field that was changed.
<i>Field</i>	Type picklist Properties Filter, Group, Restricted picklist, Sort Description Name of the field that was changed.
<i>NewValue</i>	Type anyType Properties Nillable, Sort Description New value of the field that was changed.
<i>OldValue</i>	Type anyType Properties Nillable, Sort Description Old value of the field that was changed.

Objects That Follow This Model

These objects follow the standard pattern for associated feed objects.

- AwardHistory
- BatchJobFeed
- BatchJobPartFailedRecordFeed

- PersonLifeEventHistory
- ProducerHistory
- ProducerPolicyAssignmentHistory

- ProductCoverageHistory
- ResidentialLoanApplicationHistory
- SecuritiesHoldingHistory
- WorkerCompCoverageClassHistory

*StandardObjectName*OwnerSharingRule

StandardObjectNameOwnerSharingRule is the model for all owner sharing rule objects associated with standard objects. These objects represent a rule for sharing a standard object with users other than the owner.

The object name is variable and uses *StandardObjectNameOwnerSharingRule* syntax. For example, *ChannelProgramOwnerSharingRule* is a rule for sharing a channel program with users other than the channel program owner. We list the available associated owner sharing rule objects at the end of this topic. For specific version information, see the standard object documentation.

 **Note:** To enable access to this object for your org, contact Salesforce customer support. However, we recommend that you instead use Metadata API to programmatically update owner sharing rules because it triggers automatic sharing rule recalculation. The [SharingRules](#) Metadata API type is enabled for all orgs.

Supported Calls

`create()`, `delete()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `update()`, `upsert()`

Special Access Rules

For specific special access rules, if any, see the documentation for the standard object. For example, for *ChannelProgramOwnerSharingRule*, see the special access rules for *ChannelProgram*.

Fields

Field Name	Details
AccessLevel	<p>Type picklist</p> <p>Properties Create, Filter, Group, Restricted picklist, Sort, Update</p> <p>Description Determines the level of access users have to records. Values are:</p> <ul style="list-style-type: none"> • Read (read only) • Edit (read/write)
Description	<p>Type textarea</p>

Field Name	Details
	<p>Properties Create, Filter, Nillable, Sort, Update</p> <p>Description Description of the sharing rule. Maximum length is 1000 characters.</p>
DeveloperName	<p>Type string</p> <p>Properties Create, Filter, Group, Nillable, Sort, Update</p> <p>Description The unique name of the object in the API. This name can contain only underscores and alphanumeric characters, and must be unique in your org. It must begin with a letter, not include spaces, not end with an underscore, and not contain two consecutive underscores. In managed packages, this field prevents naming conflicts on package installations. With this field, a developer can change the object's name in a managed package and the changes are reflected in a subscriber's organization.</p> <p> Note: When creating large sets of data, always specify a unique DeveloperName for each record. If no DeveloperName is specified, performance may slow while Salesforce generates one for each record.</p>
GroupId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description ID of the source group. Records that are owned by users in the source group trigger the rule to give access.</p>
Name	<p>Type string</p> <p>Properties Create, Filter, Group, idLookup, Sort, Update</p> <p>Description Label of the sharing rule as it appears in the UI. Maximum length is 80 characters.</p>
UserOrGroupId	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p>

Field Name	Details
	Description ID of the user or group that you are granting access to.

Objects That Follow This Model

These objects follow the standard pattern for associated feed objects.

- ActionPlanOwnerSharingRule
- ActionPlanTemplateOwnerSharingRule
- AwardOwnerSharingRule
- BusinessLicenseOwnerSharingRule
- ClaimOwnerSharingRule
- CoverageTypeOwnerSharingRule
- CustomerPropertyOwnerSharingRule
- DocumentChecklistItemOwnerSharingRule
- InsurancePolicyAssetOwnerSharingRule
- InsurancePolicyOwnerSharingRule
- LoanApplicantDeclarationOwnerSharingRule
- LoanApplicantEmploymentOwnerSharingRule
- LoanApplicantIncomeOwnerSharingRule
- LoanApplicantOwnerSharingRule
- LoanApplicationAssetOwnerSharingRule
- LoanApplicationLiabilityOwnerSharingRule

- PersonLifeEventOwnerSharingRule
- ProducerOwnerSharingRule
- ProducerPolicyAssignmentOwnerSharingRule
- ProductCoverageOwnerSharingRule
- ResidentialLoanApplicationOwnerSharingRule
- SecuritiesHoldingOwnerSharingRule
- WorkerCompCoverageClassOwnerSharingRule

StandardObjectNameShare

StandardObjectNameShare is the model for all share objects associated with standard objects. These objects represent a sharing entry on the standard object.

The object name is variable and uses *StandardObjectNameShare* syntax. For example, AccountBrandShare is a sharing entry on an account brand. We list the available associated share objects at the end of this topic. For specific version information, see the standard object documentation.

Supported Calls

`create()`, `delete()`, `describeObjects()`, `query()`, `retrieve()`, `update()`, `upsert()`

Special Access Rules

For specific special access rules, if any, see the documentation for the standard object. For example, for `AccountBrandShare`, see the special access rules for `AccountBrand`.

Fields

Field Name	Details
<code>AccessLevel</code>	<p>Type picklist</p> <p>Properties Create, Filter, Group, Restricted picklist, Sort, Update</p> <p>Description The level of access allowed. Values are:</p> <ul style="list-style-type: none">• All (owner)• Edit (read/write)• Read (read only)
<code>ParentId</code>	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description ID of the parent record.</p>
<code>RowCause</code>	<p>Type picklist</p> <p>Properties Create, Filter, Group, Nillable, Restricted picklist, Sort</p> <p>Description Reason that the sharing entry exists.</p>
<code>UserOrGroupId</code>	<p>Type reference</p> <p>Properties Create, Filter, Group, Sort</p> <p>Description ID of the user or group that has been given access to the object.</p>

FINANCIAL SERVICES CLOUD BUSINESS APIS

Financial Services Cloud Business APIs are RESTful APIs that are sometimes available as Apex classes and methods.

[REST Reference](#)

You can access Financial Services Cloud Business APIs using REST endpoints. These REST APIs follow similar conventions as Connect REST APIs.

REST Reference

You can access Financial Services Cloud Business APIs using REST endpoints. These REST APIs follow similar conventions as Connect REST APIs.

To understand the architecture, authentication, rate limits, and how the requests and responses work, see [Connect REST API Developer Guide](#).

[Mortgage Business Resources](#)

Here's a list of Financial Services Cloud Mortgage Business API resources.

[Request Bodies](#)

Here's a list of Financial Services Cloud Business API request bodies.

[Response Bodies](#)

Here's a list of Financial Services Cloud Business API response bodies.

Mortgage Business Resources

Here's a list of Financial Services Cloud Mortgage Business API resources.

[Application Mapper](#)

Create financial accounts and related records from a residential loan application.

[Mortgage Application](#)

Use a single API call to get and update mortgage application information like borrowers, declarations, incomes, addresses, financial transactions, liabilities, assets, properties, and title holders. You can use both the `loanApplicationId` and the `externalID` of an external system to get a mortgage application.

[Mortgage Applications](#)

Create mortgage applications using the POST method.

Application Mapper

Create financial accounts and related records from a residential loan application.

Resource

```
/connect/financialservices/mapper
```

Available version

49.0

Requires Chatter

No

HTTP methods

POST

Request body for POST**JSON example**

```
{
  "recordId": "0cdB0000000CbVGIA0"
}
```

Properties

Name	Type	Description	Required or Optional	Available Version
recordId	String	ID of the residential loan application.	Required	49.0

Response example

```
{
  "result": {
    "assetsAndLiabilities": [
      "a03B0000000735LwIAI",
      "a03B0000000735LxIAI",
      "a03B0000000735LyIAI"
    ],
    "customerProperties": [
      "0b8B0000000GnjdIAC"
    ],
    "errors": [],
    "financialAccounts": [
      "a0EB0000000227WtMAI",
      "a0EB0000000227WuMAI",
      "a0EB0000000227WvMAI"
    ],
    "personAccounts": [
      "001B0000001K8Zx5IAF"
    ],
    "status": "SUCCESS"
  }
}
```

Response body for POST[Mapper Result Representation](#) on page 461

Mortgage Application

Use a single API call to get and update mortgage application information like borrowers, declarations, incomes, addresses, financial transactions, liabilities, assets, properties, and title holders. You can use both the `loanApplicationId` and the `externalId` of an external system to get a mortgage application.

Resource

```
/connect/financialservices/mortgages/loanId
```

Available version

48.0

Authentication

Use OAuth to connect to Salesforce and get an access token. Pass the access token in your requests. For more information, see [Connect to Connect REST API Using OAuth](#).

HTTP methods

GET, PATCH

Path Parameters

Parameter Name	Type	Description	Required	Available version
<i>loanId</i>	String	id or externalId associated with a loan application.	Yes	48.0

Request body JSON Example

```
{
  "amortizationTerm": 30
}
```

Response body for GET and PATCH

Property Name	Type	Description	Filter Group and Version	Available Version
message	String	Error message, if any.	Small, 48.0	48.0
result	Mortgage Information Output[]	Data of the mortgage result.	Small, 48.0	48.0

Sample response body for GET and PATCH

```
{
  "result" : {
    "accountId" : "001RM000004Xra2YAC",

Mortgage Applications

Create mortgage applications using the POST method.

A single API call lets you:

- Create records for objects like `ResidentialLoanApplication`, `LoanApplicant` `LoanApplicantAddress`, `LoanApplicantAsset`, `LoanApplicantDeclaration`, `LoanApplicantEmployment`,

LoanApplicantIncome, LoanApplicantLiability, LoanApplicationAsset, LoanApplicationFinancial, LoanApplicationLiability, LoanApplicationProperty, and LoanApplicationTitleHolder.

- Add your org's custom fields with the `extendedFields` property for mortgage applications, borrowers, declarations, incomes, addresses, financial transactions, liabilities, assets, properties, and title holders information.
- Use IDs from external systems with the `externalId` parameter for mortgage applications, borrowers, declarations, incomes, addresses, financial transactions, liabilities, assets, properties, and title holders.

Properties

Name	Type	Description	Required or Optional	Available Version
accountId	String	Account associated with the application.	Required if opportunityId isn't provided	48.0
amortizationTerm	Integer	Duration of the amortization in months.	Optional	48.0
amortizationType	String	Amortization type for loan.	Optional	48.0
assets	Asset Input[]	Represents details about the borrower's and co-borrower's current personal and real property.	Optional	48.0
balloonTermMonths	Integer	Number of months during which the cumulative loan must be repaid.	Optional	48.0
borrowers	Borrower Input[]	List of borrowers for a loan application.	Optional	48.0
estateHoldType	String	Lender's lien is on both land and structure (fee simple) or just structure (leasehold).	Optional	48.0
extendedFields	Extended Fields Input[]	Represents custom fields related to a loan application.	Optional	48.0
externalId	String	Identifier assigned to imported data by external data source (if applicable).	Optional	48.0
financials	Financial Input[]	Represents transaction details for a loan application.	Optional	48.0

Name	Type	Description	Required or Optional	Available Version
hasOtherLoanFeature	Boolean	Indicates whether loan has other amortization feature.	Optional	48.0
hasPrepaymentPenalty	Boolean	Indicates whether penalty is incurred if borrower pays off loan balance before the loan term expires.	Optional	48.0
improvementCost	Double	Construction costs for a construction loan or home improvement costs for a renovation loan.	Optional	48.0
initialBuydownRate	Double	Initial lesser interest rate for the loan.	Optional	48.0
interestOnlyMortCut	Integer	Number of months that loan payments are interest only.	Optional	48.0
interestRate	Double	Interest rate for loan.	Optional	48.0
isBalloon	Boolean	Indicates whether borrower is applying for a balloon payment mortgage.	Optional	48.0
isBooCommunityPropState	Boolean	Indicates whether borrower lives in community property state.	Optional	48.0
isConstructionPermit	Boolean	Indicates whether at least one borrower lives in a community property state.	Optional	48.0
isContractForDeed	Boolean	Indicates whether loan proceeds are to pay off balance due on a contract for deed or land contract.	Optional	48.0
isEnergyRelatedImprovement	Boolean	Indicates whether loan is to finance energy-related improvements.	Optional	48.0
isInterestOnly	Boolean	Indicates whether borrower is applying for an interest-only mortgage.	Optional	48.0
isNegativeAmortization	Boolean	Indicates whether loan allows for negative amortization where shortfalls in interest payments are added to the outstanding loan balance.	Optional	48.0
isPropCommunityPropState	Boolean	Indicates whether property is located in a community property state.	Optional	48.0
isRenovation	Boolean	Indicates whether loan proceeds to finance cost of renovations to the property, and renovation value is included in the property's appraised value.	Optional	48.0
isSingleClosing	Boolean	Indicates whether construction and permanent loans have a single combined	Optional	48.0

Name	Type	Description	Required or Optional	Available Version
		closing. Once construction is complete, loan converts to a traditional mortgage.		
isSubjectToPriorityLien	Boolean	Indicates whether property is currently subject to an energy-related lien that could take priority over the first mortgage lien.	Optional	48.0
isTapInRateBuydown	Boolean	Indicates whether borrower is applying for loan with an initially reduced interest payment in exchange for an up-front cash deposit.	Optional	48.0
leaseholdExpirationDate	String	Date when leasehold expires if land is leased.	Optional	48.0
liabilities	Liability Input[]	Represents details about the borrower and co-borrower current liabilities.	Optional	48.0
loanPurpose	String	Purpose of the loan.	Optional	48.0
lotAcquiredDate	String	Month and year property or land was purchased.	Optional	48.0
lotOriginalCost	Double	Original property cost (refinance) or original land cost (construction).	Optional	48.0
monthsBeforeFirstAdj	Integer	Initial period prior to first adjustment in months.	Optional	48.0
monthsBetweenAdjustments	Integer	Number of months before the first rate adjustment for an adjustable rate loan.	Optional	48.0
mortgageLienType	String	Type of mortgage lien associated with this loan application.	Optional	48.0
mortgageProgramType	String	Type of mortgage program applied for.	Optional	48.0
name	String	Name of the residential loan application.	Required	48.0
nativeLandTenure	String	Property is located on an area reserved by or for an Indian land, village, or tribe to live on and use.	Optional	48.0
opportunityId	String	Opportunity associated with the application.	Required if accountId isn't provided	48.0
otherAmortizationType	String	Description of other amortization type for government loans.	Optional	48.0
otherLoanFeature	String	Description of other loan amortization feature.	Optional	48.0

Name	Type	Description	Required or Optional	Available Version
otherLoanPurpose	String	What the borrower will use the loan for if other was specified.	Optional	48.0
otherMortgageProgramType	String	Description of the other mortgage type.	Optional	48.0
otherRefinanceProgramType	String	Refinance program name if other was specified.	Optional	48.0
prepayPenaltyTermMonth	Integer	Number of months during which borrower incurs a penalty for early payoff of the loan balance.	Optional	48.0
projectType	String	Specifies the type of project that the property belongs to.	Optional	48.0
properties	Property Input[]	Represents details of the property the loan application finances.	Optional	48.0
refinanceProgramType	String	The applicable refinance program type based on the investor, guarantor, or lender guidelines.	Optional	48.0
refinanceType	String	Refinance loan type.	Optional	48.0
status	String	Indicates the current status of the loan application.	Optional	48.0
titleHolders	Title Holder Input[]	Represents details of borrowers who are applying to hold title to the property the loan application finances.	Optional	48.0
titleType	String	Way the borrower or borrowers take title for the loan.	Optional	48.0
trustTitleType	String	Title to be held in a living trust or a land trust.	Optional	48.0

Response body

Property Name	Type	Description	Filter Group and Version	Available Version
message	String	Error message, if any.	Small, 48.0	48.0
result	Mortgage Result[]	Representation of mortgage result.	Small, 48.0	48.0

Request Bodies

Here's a list of Financial Services Cloud Business API request bodies.

[Address Input](#)

Represents address details.

[Borrower Address Input](#)

Input representation for Borrower addresses.

[Borrower Declaration Input](#)

Input representation for Borrower declarations

[Borrower Employment Input](#)

Represents details about the borrower's or co-borrower's current and past employment.

[Borrower Income Input](#)

Input representation for Borrower income

[Borrower Input](#)

Represents details of the borrower or co-borrower for the loan application.

[Mapper Input Representation](#)

Represents the input representation for the Mapper POST method.

[Extended Fields Input](#)

Input representation for extended fields.

[Asset Input](#)

Represents details about the borrower's and co-borrower's current personal and real property.

[Financial Input](#)

Input details for the financial transaction.

[Mortgage Input](#)

Represents the input for mortgage POST or PATCH method.

[Liability Input](#)

Details about the borrower and co-borrower current liabilities.

[Property Input](#)

Represents details of the property the loan application finances.

[Title Holder Input](#)

Represents details of borrowers who are applying to hold title to the property the loan application finances.

Address Input

Represents address details.

Root XML tag

```
<address>
```

JSON example

```
{
  "city": "San Francisco",
  "country": "United States",
  "postalCode": "94105",
  "state": "CA",
  "street": "50 Fremont Street"
}
```

Properties

Name	Type	Description	Required or Optional	Available Version
city	String	The address city.	Optional	48.0
country	String	The address country.	Optional	48.0
postalCode	String	The address postal code.	Optional	48.0
state	String	The address state.	Optional	48.0
street	String	The address street.	Optional	48.0

Borrower Address Input

Input representation for Borrower addresses.

Root XML tag

```
<addresses>
```

JSON example

```
{
  "addresses": [
    {
      "addressOwnership": "Own",
      "extendedFields": [],
      "externalId": "e8d51e2a-7d97-4da0-8356-ca86995d3d39",
      "monthlyRentPayment": 2300,
      "name": "Addr1",
      "residenceAdditionalMonthCount": 23,
    }
  ]
}
```

```

    "residenceAddress": {
      "city": "San Francisco",
      "country": "United States",
      "postalCode": "94105",
      "state": "CA",
      "street": "50 Fremont Street"
    },
    "residenceYearCount": 3,
    "residencyType": "Former Residence"
  }
]
}

```

Properties

Name	Type	Description	Required or Optional	Available Version
addressOwnership	String	Identifies borrower's status at residence.	Optional	48.0
extendedFields	Extended Fields Input[]	Custom fields related to the borrower's address.	Optional	48.0
externalId	String	Identifier assigned to imported borrower's address data by external data source. (if applicable)	Optional	48.0
id	String	ID of the borrower's address	Optional	48.0
monthlyRentPayment	Double	Borrower's monthly rent payment (if applicable).	Optional	48.0
name	String	Name of the borrower's address.	Optional	48.0
residenceAdditionalMonthCount	Integer	Additional months borrower lived at this residence.	Optional	48.0
residenceAddress	Address Input[]	Residence's physical address.	Optional	48.0
residenceYearCount	Integer	Years borrower lived at this residence.	Optional	48.0
residencyType	String	Identifies borrower's current residency status.	Optional	48.0

Borrower Declaration Input

Input representation for Borrower declarations

Root XML tag

```
<declarations>
```

JSON example

```

{
  "declarations": [
    {

```

```

}

```

Properties

Name	Type	Description	Required or Optional	Available Version
bankruptcyType	String	Bankruptcy type or types (if applicable).	Optional	48.0
borrowedAmount	Double	Amount of money borrowed for loan application transaction.	Optional	48.0
extendedFields	Extended Fields Input[]	Custom fields related to the declaration.	Optional	48.0
externalId	String	Identifier assigned to imported financial data by external data source (if applicable).	Optional	48.0
hasBorrowedMoney	Boolean	Indicates whether borrower is borrowing money for loan application transaction.	Optional	48.0
hasCoSignerUndisclosedDebt	Boolean	Indicates whether borrower is co-signer or guarantor on debt or loan that's not disclosed on loan application.	Optional	48.0
hasDeclaredBankruptcy	Boolean	Indicates whether borrower declared bankruptcy within the past seven years.	Optional	48.0
hasDeedSurrender	Boolean	Indicates whether borrower conveyed title to a property in lieu of foreclosure in past seven years.	Optional	48.0

Name	Type	Description	Required or Optional	Available Version
hasOutstandingJudgment	Boolean	Indicates whether there are one or more outstanding judgments against the borrower.	Optional	48.0
hasOwnershipInterest	Boolean	Indicates whether borrower had ownership interest in a property in the last three years.	Optional	48.0
hasPastShortSale	Boolean	Indicates whether borrower sold a property to a third party where lender agreed to accept amount less than total outstanding mortgage balance due within past seven years.	Optional	48.0
hasPropertyForeclosed	Boolean	Indicates whether borrower had property foreclosed upon in last seven years.	Optional	48.0
hasUndisclosedDebtApp	Boolean	Indicates whether, on or before closing, borrower applied for new undisclosed credit like a credit card or installment loan.	Optional	48.0
hasUndisclosedOtherProp	Boolean	Indicates whether, on or before closing, borrower applied for an undisclosed mortgage loan on a property other than the application property.	Optional	48.0
id	String	ID of the borrower declaration.	Optional	48.0
isPartyToLawsuit	Boolean	Indicates whether borrower is party to lawsuit with potential personal financial liability.	Optional	48.0
isPresentlyDelinquent	Boolean	Indicates whether borrower is currently delinquent or in default on any federal debt or other loan, mortgage, financial obligation, bond, or loan guarantee.	Optional	48.0
isPrimaryResidence	Boolean	Indicates whether property to be borrower's primary residence.	Optional	48.0
isRelatedToSeller	Boolean	Indicates whether borrower has family or business relationship with seller of property (for purchase transaction).	Optional	48.0
isSubjectToPriorityLien	Boolean	Indicates whether application property is to have a priority clean energy lien like Property Assessed Clean Energy Program financing that takes priority over the first mortgage lien.	Optional	48.0
name	String	Name of the declaration.	Optional	48.0

Name	Type	Description	Required or Optional	Available Version
priorPropertyTitleType	String	Identifies how borrower held title in the ownership interest property.	Optional	48.0
priorPropertyUsageType	String	Identifies type of property borrower held ownership interest in.	Optional	48.0

Borrower Employment Input

Represents details about the borrower's or co-borrower's current and past employment.

Root XML tag

```
<employments>
```

JSON example

```
{
  "employments": [
    {
      "currentJobAdditionalMonthCount": 24,
      "currentJobYearCount": 4,
      "employerAddress": {
        "city": "Fresno",
        "country": "United States",
        "postalCode": "93721",
        "state": "CA",
        "street": "1500 Divisadero Street"
      },
      "extendedFields": [],
      "externalId": "2a9460d0-3194-449a-8bf0-488a6cbaed0a",
      "isRelToTransactionParty": true,
      "isLessThanQuarterShare": true,
      "isSelfEmployed": true,
      "jobTitle": "developer",
      "monthlyBaseIncomeAmount": 2300,
      "monthlyBonusAmount": 100,
      "monthlyCommissionAmount": 10,
      "monthlyIncome": 5000,
      "monthlyMilitaryEntitlementAmt": 20,
      "monthlyOtherIncomeAmount": 10,
      "monthlyOvertimeAmount": 200,
      "name": "Empl1",
      "startDate": "2019-10-10T03:11:27.000Z"
    }
  ]
}
```

Properties

Name	Type	Description	Required or Optional	Available Version
currentAdditionalMonths	Integer	Additional number of months employed at this job (less than 12).	Optional	48.0
currentJobYearCount	Integer	Number of full years employed at this job.	Optional	48.0
employerAddress	Address Input[]	Address of borrower's employer or business.	Optional	48.0
employerName	String	Name of borrower's employer or business.	Optional	48.0
employerPhone	String	Employer's phone number.	Optional	48.0
endDate	String	Borrower's last date of employment at this job.	Optional	48.0
extendedFields	Extended Fields Input[]	Custom fields related to the borrower's employment.	Optional	48.0
externalId	String	Identifier assigned to imported employer data by external data source. (if applicable)	Optional	48.0
id	String	ID of the borrower's employment.	Optional	48.0
isLessThanQuarterShare	Boolean	Indicates whether borrower owns less than 25% of this business (if applicable).	Optional	48.0
isRelTransactionParty	Boolean	Indicates whether borrower is employed by a family member, property seller, real estate agent, or other person party to the loan application transaction.	Optional	48.0
isSelfEmployed	Boolean	Indicates whether borrower is self-employed or owns the business.	Optional	48.0
jobTitle	String	Borrower's job title or employer's business or industry type.	Optional	48.0
monthlyBaseIncomeAmount	Double	Borrower's monthly bonus from this job.	Optional	48.0
monthlyBonusAmount	Double	Borrower's monthly bonus from this job.	Optional	48.0
monthlyCommissionAmount	Double	Borrower's monthly commission from this job.	Optional	48.0
monthlyIncome	Double	Borrower's monthly income or loss from this business.	Optional	48.0
monthlyMilitaryEntitlement	Double	Borrower's monthly military entitlement from this job.	Optional	48.0
monthlyOtherIncomeAmount	Double	Borrower's other monthly income from this job.	Optional	48.0

Name	Type	Description	Required or Optional	Available Version
monthlyOvertimeAmount	Double	Borrower's monthly overtime income from this job.	Optional	48.0
name	String	Name of the loan applicant employment.	Optional	48.0
startDate	String	Date borrower started working at this job.	Optional	48.0

Borrower Income Input

Input representation for Borrower income

Root XML tag

```
<incomes>
```

JSON example

```
{
  "incomes": [
    {
      "extendedFields": [],
      "externalId": "b19d9372-df99-4eec-9de0-ad785503992d",
      "incomeSourceType": "Capital Gains",
      "monthlyIncomeAmount": 100,
      "name": "Income1"
    }
  ]
}
```

Properties

Name	Type	Description	Required or Optional	Available Version
extendedFields	Extended Fields Input[]	Custom fields related to the borrower's income.	Optional	48.0
externalId	String	Identifier assigned to imported income data by external data source (if applicable).	Optional	48.0
id	String	ID of the borrower's income.	Optional	48.0
incomeSourceType	String	Source of borrower's monthly non-employment income.	Optional	48.0
monthlyIncomeAmount	Double	Amount of borrower's monthly non-employment income from this source.	Optional	48.0
name	String	Name of the other monthly income.	Optional	48.0

Borrower Input

Represents details of the borrower or co-borrower for the loan application.

Root XML tag`<borrowers>`**JSON example**

Properties

Name	Type	Description	Required or Optional	Available Version
addresses	Borrower Address Input[]	Borrower's addresses.	Optional	48.0
asianRaceSubType	String	Borrower's Asian race.	Optional	48.0
borrowerType	String	Applicant's borrower type.	Optional	48.0
citizenshipStatus	String	Borrower's citizenship status.	Optional	48.0
contactId	String	Contact associated with this borrower.	Optional	48.0
declarations	Borrower Declaration Input[]	Borrower's declarations.	Optional	48.0
dependentCount	Integer	Borrower's number of dependents.	Optional	48.0
dependentsAge	String	Ages of borrower's dependents in a comma-separated list.	Optional	48.0
employments	Borrower Employment Input[]	Borrower's employments.	Optional	48.0
ethnicitySubType	String	Borrower's ethnicity.	Optional	48.0
ethnicityType	String	Borrower's ethnicity origin.	Optional	48.0
extendedFields	Extended Fields Input[]	Custom fields.	Optional	48.0
externalId	String	ID that uniquely identifies imported data in an external data source (if applicable).	Optional	48.0
genderType	String	Borrower's gender.	Optional	48.0
hasMilitaryService	Boolean	Indicates whether the borrower is serving in the United States Armed Forces or the borrower or the borrower's deceased spouse served in the past.	Optional	48.0

Name	Type	Description	Required or Optional	Available Version
id	String	ID of the borrower.	Optional	48.0
incomes	Borrower Income Input[]	Borrower's incomes.	Optional	48.0
isActiveMilitary	Boolean	Indicates whether borrower is currently on active duty with the United States Armed Forces.	Optional	48.0
isJointCredit	Boolean	Indicates whether borrower is applying for joint credit.	Optional	48.0
isSurvivingMilitarySpouse	Boolean	Indicates whether borrower is a surviving spouse of a veteran.	Optional	48.0
maritalStatus	String	Borrower's marital status.	Optional	48.0
militaryExpirationMonth	Integer	Month that borrower's tour of service expires.	Optional	48.0
militaryExpirationYear	Integer	Year that borrower's tour of service expires.	Optional	48.0
name	String	Name of the borrower.	Optional	48.0
otherAsianRaceSubType	String	Borrower's Asian race if other is specified.	Optional	48.0
otherEthnicitySubType	String	Borrower's ethnicity if other is specified.	Optional	48.0
otherPacificIslanderSubType	String	Borrower's native Hawaiian or Pacific Islander race if other is specified.	Optional	48.0
pacificIslanderSubType	String	Borrower's native Hawaiian or Pacific Islander race.	Optional	48.0
preferredLanguage	String	Borrower's preferred communication language.	Optional	48.0
raceType	String	Borrower's race.	Optional	48.0
tribeName	String	Name of borrower's enrolled or principal tribe.	Optional	48.0
wasActiveMilitary	Boolean	Indicates whether borrower is currently retired, discharged, or separated from active military duty.	Optional	48.0
wasNonActivatedService	Boolean	Indicates whether borrower's only military service was as a non-activated Reserve soldier or as a non-activated member of the National Guard.	Optional	48.0

Mapper Input Representation

Represents the input representation for the Mapper POST method.

JSON example

```
{
  "recordId": "0cdB0000000CbVGIA0"
}
```

Properties

Name	Type	Description	Required or Optional	Available Version
recordId	String	ID of the residential loan application.	Required	49.0

Extended Fields Input

Input representation for extended fields.

Root XML tag

```
<extendedFields>
```

JSON example

```
{
  "extendedFields": [
    {
      "name": "assigned_to",
      "value": "abcd"
    },
    {
      "name": "ownership",
      "value": true
    }
  ]
}
```

Properties

Name	Type	Description	Required or Optional	Available Version
name	String	Name of the custom field.	Optional	48.0
value	String	Value of the custom field.	Optional	48.0

Asset Input

Represents details about the borrower's and co-borrower's current personal and real property.

Root XML tag

```

Properties

Name	Type	Description	Required or Optional	Available Version
accountNumber	String	Account number associated with financial institution holding asset.	Optional	48.0
accountType	String	Identifies asset account type.	Optional	48.0
assetClass	String	Identifies which asset class total to include the asset's value in.	Optional	48.0
assetType	String	Identifies type of other asset.	Optional	48.0
borrowersExternalIds	String[]	External IDs of borrower and co-borrowers.	Optional	48.0
borrowersIds	String[]	IDs of borrower and co-borrowers.	Optional	48.0
cashOrMarketValue	Double	Asset's cash or current market value.	Optional	48.0
dispositionType	String	Real estate asset's planned future use.	Optional	48.0
extendedFields	Extended Fields Input[]	Custom fields related to the asset.	Optional	48.0
externalId	String	Identifier assigned to imported asset data by external data source (if applicable).	Optional	48.0
financialInstitutionName	String	Name of financial institution where financial account is held.	Optional	48.0
grossMonthlyRentalIncome	Double	Borrower's monthly rent income collected on real estate asset.	Optional	48.0
id	String	ID of the asset.	Optional	48.0
isJointAsset	Boolean	Indicates whether asset is held jointly.	Optional	48.0
name	String	Name of the loan application asset.	Optional	48.0
netMonthlyRentalIncome	Double	Borrower's net monthly income on real estate asset.	Optional	48.0
presentMarketValue	Double	Cash value of real estate asset if sold today.	Optional	48.0
realEstateAddress	Address Input[]	Real estate asset's address.	Optional	48.0
realEstateMonthlyExpense	Double	Borrower's monthly real estate asset expenses including insurance, maintenance, taxes, and miscellaneous costs.	Optional	48.0

Financial Input

Input details for the financial transaction.

Properties

Name	Type	Description	Required or Optional	Available Version
accountId	String	Account associated with the application.	Required if opportunityId isn't provided	48.0
amortizationTerm	Integer	Duration of the amortization in months.	Optional	48.0
amortizationType	String	Amortization type for loan.	Optional	48.0
assets	Asset Input[]	Represents details about the borrower's and co-borrower's current personal and real property.	Optional	48.0
balloonTermMonths	Integer	Number of months during which the cumulative loan must be repaid.	Optional	48.0
borrowers	Borrower Input[]	List of borrowers for a loan application.	Optional	48.0
estateHoldType	String	Lender's lien is on both land and structure (fee simple) or just structure (leasehold).	Optional	48.0
extendedFields	Extended Fields Input[]	Represents custom fields related to a loan application.	Optional	48.0
externalId	String	Identifier assigned to imported data by external data source (if applicable).	Optional	48.0
financials	Financial Input[]	Represents transaction details for a loan application.	Optional	48.0

Name	Type	Description	Required or Optional	Available Version
hasOtherLoanFeature	Boolean	Indicates whether loan has other amortization feature.	Optional	48.0
hasPrepaymentPenalty	Boolean	Indicates whether penalty is incurred if borrower pays off loan balance before the loan term expires.	Optional	48.0
improvementCost	Double	Construction costs for a construction loan or home improvement costs for a renovation loan.	Optional	48.0
initialBuydownRate	Double	Initial lesser interest rate for the loan.	Optional	48.0
interestOnlyMonthCount	Integer	Number of months that loan payments are interest only.	Optional	48.0
interestRate	Double	Interest rate for loan.	Optional	48.0
isBalloon	Boolean	Indicates whether borrower is applying for a balloon payment mortgage.	Optional	48.0
isBorrowerCommunityPropertyState	Boolean	Indicates whether borrower lives in community property state.	Optional	48.0
isConstructionPermanent	Boolean	Indicates whether at least one borrower lives in a community property state.	Optional	48.0
isContractForDeed	Boolean	Indicates whether loan proceeds are to pay off balance due on a contract for deed or land contract.	Optional	48.0
isEnergyRelatedImprovement	Boolean	Indicates whether loan is to finance energy-related improvements.	Optional	48.0
isInterestOnly	Boolean	Indicates whether borrower is applying for an interest-only mortgage.	Optional	48.0
isNegativeAmortization	Boolean	Indicates whether loan allows for negative amortization where shortfalls in interest payments are added to the outstanding loan balance.	Optional	48.0
isPropertyCommunityPropertyState	Boolean	Indicates whether property is located in a community property state.	Optional	48.0
isRenovation	Boolean	Indicates whether loan proceeds to finance cost of renovations to the property, and renovation value is included in the property's appraised value.	Optional	48.0
isSingleClosing	Boolean	Indicates whether construction and permanent loans have a single combined	Optional	48.0

Name	Type	Description	Required or Optional	Available Version
		closing. Once construction is complete, loan converts to a traditional mortgage.		
isSubjectToPriorityLien	Boolean	Indicates whether property is currently subject to an energy-related lien that could take priority over the first mortgage lien.	Optional	48.0
isTempIntRateBuydown	Boolean	Indicates whether borrower is applying for loan with an initially reduced interest payment in exchange for an up-front cash deposit.	Optional	48.0
leaseholdExpirationDate	String	Date when leasehold expires if land is leased.	Optional	48.0
liabilities	Liability Input[]	Represents details about the borrower and co-borrower current liabilities.	Optional	48.0
loanPurpose	String	Purpose of the loan.	Optional	48.0
lotAcquiredDate	String	Month and year property or land was purchased.	Optional	48.0
lotOriginalCost	Double	Original property cost (refinance) or original land cost (construction).	Optional	48.0
monthsBeforeFirstAdj	Integer	Initial period prior to first adjustment in months.	Optional	48.0
monthsBeforeAdjustments	Integer	Number of months before the first rate adjustment for an adjustable rate loan.	Optional	48.0
mortgageLienType	String	Type of mortgage lien associated with this loan application.	Optional	48.0
mortgageProgramType	String	Type of mortgage program applied for.	Optional	48.0
name	String	Name of the residential loan application.	Required	48.0
nativeLandTenure	String	Property is located on an area reserved by or for an Indian land, village, or tribe to live on and use.	Optional	48.0
opportunityId	String	Opportunity associated with the application.	Required if <code>accountId</code> isn't provided	48.0
otherAmortizationType	String	Description of other amortization type for government loans.	Optional	48.0
otherLoanFeature	String	Description of other loan amortization feature.	Optional	48.0

Name	Type	Description	Required or Optional	Available Version
otherLoanPurpose	String	What the borrower will use the loan for if other was specified.	Optional	48.0
otherMortgageProgramType	String	Description of the other mortgage type.	Optional	48.0
otherRefinanceProgramType	String	Refinance program name if other was specified.	Optional	48.0
prepayPenaltyTermMonth	Integer	Number of months during which borrower incurs a penalty for early payoff of the loan balance.	Optional	48.0
projectType	String	Specifies the type of project that the property belongs to.	Optional	48.0
properties	Property Input[]	Represents details of the property the loan application finances.	Optional	48.0
refinanceProgramType	String	The applicable refinance program type based on the investor, guarantor, or lender guidelines.	Optional	48.0
refinanceType	String	Refinance loan type.	Optional	48.0
status	String	Indicates the current status of the loan application.	Optional	48.0
titleHolders	Title Holder Input[]	Represents details of borrowers who are applying to hold title to the property the loan application finances.	Optional	48.0
titleType	String	Way the borrower or borrowers take title for the loan.	Optional	48.0
trustTitleType	String	Title to be held in a living trust or a land trust.	Optional	48.0

Liability Input

Details about the borrower and co-borrower current liabilities.

    }
  ]
}
```

Properties

Name	Type	Description	Required or Optional	Available Version
extendedFields	Extended Fields Input[]	Custom fields related to the title holder.	Optional	48.0
externalId	String	Identifier assigned to imported title holder data by external data source (if applicable).	Optional	48.0
id	String	ID of the title holder.	Optional	48.0
isCurrentTitleHolder	Boolean	Indicates whether person is a current title holder on property to be refinanced.	Optional	48.0
name	String	Name of the loan application title holder.	Optional	48.0
titleHolderName	String	Name of the person on the title for the property associated with the loan application.	Optional	48.0

Response Bodies

Here's a list of Financial Services Cloud Business API response bodies.

[Mortgage Result](#)

Represents the result of the POST or PATCH method.

[Borrower Employment Output](#)

Represents details about the borrower's or co-borrower's current and past employment.

[Borrower Address Output](#)

Represents Borrower addresses.

[Mapper Result](#)

Represents the Mapper result.

[Mapper Result Representation](#)

Represents the result representation of the POST method.

[Extended Fields Output](#)

Represents custom fields names and values.

[Borrower Output](#)

Represents details of the borrower or co-borrower for the loan application.

[Borrower Income Output](#)

Represents details about the borrower and co-borrower current monthly income.

[Borrower Declaration Output](#)

Represents financial issues like foreclosure, lawsuits, or defaults of the applicant or co-applicant.

[Borrower Declaration Result](#)

Result containing details about borrower's declaration.

[Mortgage Response](#)

Response for the POST or PATCH method.

[Mortgage Information Output](#)

Represents the output of the GET method.

[Borrower employment Result](#)

Borrower employment result of the POST or PATCH request.

[Borrower Income Result](#)

Borrower income result of the POST or PATCH request.

[Asset Result](#)

Asset result of the POST or PATCH request.

[Borrower Address Result](#)

Borrower address result of the POST or PATCH request.

[Title Holder Result](#)

Title holder result of the POST or PATCH request.

[Property Result](#)

Property result of the POST or PATCH request.

[Liability Result](#)

Liability result of the POST or PATCH request.

[Financial Result](#)

Financial result of the POST or PATCH request.

[Borrower Result](#)

Borrower result of the POST or PATCH request.

[Address Output](#)

Represents address details.

[Property Output](#)

Represents details of the property the loan application finances.

[Liability Output](#)

Details about the borrower and co-borrower current liabilities.

[Asset Output](#)

Represents details about the borrower's and co-borrower's current personal and real property.

[Title Holder Output](#)

Represents details of borrowers who are applying to hold title to the property the loan application finances.

[Financial Output](#)

Output details for the financial transaction.

[Mortgage Information Response](#)

Response for the GET method.

Mortgage Result

Represents the result of the POST or PATCH method.

Property Name	Type	Description	Filter Group and Version	Available Version
assets	Asset Result []	Represents details about the borrower's and co-borrower's current personal and real property.	Big, 48.0	48.0
borrowers	Borrower Result []	Represents details about the borrowers and co-borrowers.	Big, 48.0	48.0
externalId	String	Identifier assigned to imported title holder data by external data source if applicable).	Small, 48.0	48.0
financials	Financial Result []	Represents transaction details for a loan application.	Big, 48.0	48.0
id	String	ID of the loan application.	Small, 48.0	48.0
liabilities	Liability Result []	Represents details about the borrower and co-borrower current liabilities.	Big, 48.0	48.0
properties	Property Result []	Represents details of the property the loan application finances.	Big, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
titleHolders	Title Holder Result[]	Represents details of borrowers who are applying to hold title to the property the loan application finances.	Big, 48.0	48.0

Borrower Employment Output

Represents details about the borrower's or co-borrower's current and past employment.

Property Name	Type	Description	Filter Group and Version	Available Version
createdById	String	ID of the user who created this record.	Small, 48.0	48.0
createdDate	String	Date and time when this record was created.	Small, 48.0	48.0
createdInitialMonth	Integer	Additional number of months employed at this job (less than 12).	Small, 48.0	48.0
currentYearsOut	Integer	Number of full years employed at this job.	Small, 48.0	48.0
employerAddress	Address Output[]	Address of borrower's employer or business.	Small, 48.0	48.0
employerName	String	Name of borrower's employer or business.	Small, 48.0	48.0
employerPhone	String	Employer's phone number.	Small, 48.0	48.0
endDate	String	Borrower's last date of employment at this job.	Small, 48.0	48.0
extendedFields	Extended Fields Output[]	Custom fields related to the borrower's employment.	Big, 48.0	48.0
externalId	String	Identifier assigned to imported employer data by external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the borrower's employment.	Small, 48.0	48.0
isDeleted	Boolean	Indicates whether the employment record is deleted.	Small, 48.0	48.0
isSelfOwned	Boolean	Indicates whether borrower owns less than 25% of this business (if applicable).	Small, 48.0	48.0
isRelatedParty	Boolean	Indicates whether borrower is employed by a family member,	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
		property seller, real estate agent, or other person party to the loan application transaction.		
isSelfEmployed	Boolean	Indicates whether borrower is self-employed or owns the business.	Small, 48.0	48.0
jobTitle	String	Borrower's job title or employer's business or industry type.	Small, 48.0	48.0
lastModifiedBy	String	ID of the user who last modified this record.	Small, 48.0	48.0
lastModifiedDate	String	Date and time when a user last modified this record.	Small, 48.0	48.0
lastReferencedDate	String	Date and time when a user last referenced this record.	Small, 48.0	48.0
lastViewedDate	String	Date and time when a user last viewed this record.	Small, 48.0	48.0
loanApplicantId	String	ID of the borrower record.	Small, 48.0	48.0
loanApplicationId	String	ID of the loan application record.	Small, 48.0	48.0
monthlyBonusAmt	Double	Borrower's monthly bonus from this job.	Small, 48.0	48.0
monthlyBonusAmt	Double	Borrower's monthly bonus from this job.	Small, 48.0	48.0
monthlyCommissionAmt	Double	Borrower's monthly commission from this job.	Small, 48.0	48.0
monthlyIncome	Double	Borrower's monthly income or loss from this business.	Small, 48.0	48.0
monthlyMilitaryEntitlementAmt	Double	Borrower's monthly military entitlement from this job.	Small, 48.0	48.0
monthlyMilitaryEntitlementAmt	Double	Borrower's monthly military entitlement from this job.	Small, 48.0	48.0
monthlyOtherIncomeAmt	Double	Borrower's other monthly income from this job.	Small, 48.0	48.0
monthlyOtherIncomeAmt	Double	Borrower's other monthly income from this job.	Small, 48.0	48.0
monthlyOvertimeAmt	Double	Borrower's monthly overtime income from this job.	Small, 48.0	48.0
monthlyOvertimeAmt	Double	Borrower's monthly overtime income from this job.	Small, 48.0	48.0
monthlyTotalIncomeAmt	Double	Borrower's monthly total income from this job.	Total Monthly Income	Small, 48.0
monthlyTotalIncomeAmt	Double	Borrower's monthly total income from this job.	Total Monthly Income	Small, 48.0
name	String	Name of the loan applicant employment.	Small, 48.0	48.0
ownerId	String	ID of the user who owns this record.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
startDate	String	Name of the loan applicant employment.	Small, 48.0	48.0
systemModstamp	String	Date and time when a user or automated process (such as a trigger) last modified this record.	Small, 48.0	48.0

Borrower Address Output

Represents Borrower addresses.

Property Name	Type	Description	Filter Group and Version	Available Version
addressOwnership	String	Identifies borrower's status at residence.	Small, 48.0	48.0
createdById	String	ID of the user who created this record.	Small, 48.0	48.0
createdDate	String	Date and time when this record was created.	Small, 48.0	48.0
extendedFields	Extended Fields Output[]	Custom fields related to the borrower's address.	Big, 48.0	48.0
externalId	String	Identifier assigned to imported borrower's address data by external data source. (if applicable)	Small, 48.0	48.0
id	String	ID of the borrower's address	Small, 48.0	48.0
isDeleted	Boolean	Indicates whether the borrower record is deleted.	Small, 48.0	48.0
lastModifiedById	String	ID of the user who last modified this record.	Small, 48.0	48.0
lastModifiedDate	String	Date and time when a user last modified this record.	Small, 48.0	48.0
lastReferencedDate	String	Date and time when a user last referenced this record.	Small, 48.0	48.0
lastViewedDate	String	Date and time when a user last viewed this record.	Small, 48.0	48.0
loanApplicantId	String	ID of the borrower record.	Small, 48.0	48.0
loanApplicationId	String	ID of the loan application record.	Small, 48.0	48.0
monthlyRentPayment	Double	Borrower's monthly rent payment (if applicable).	Small, 48.0	48.0
name	String	Name of the borrower's address.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
residenceAdditionalMonthCount	Integer	Additional months borrower lived at this residence.	Small, 48.0	48.0
residenceAddress	Address Output[]	Residence's physical address.	Small, 48.0	48.0
residenceYearCount	Integer	Years borrower lived at this residence.	Small, 48.0	48.0
residencyType	String	Identifies borrower's current residency status.	Small, 48.0	48.0
systemModstamp	String	Date and time when a user or automated process (such as a trigger) last modified this record.	Small, 48.0	48.0

Mapper Result

Represents the Mapper result.

systemModstamp	String	Date and time when a user or automated process (such as a trigger) last modified this record.	Small, 48.0	48.0

Borrower Declaration Output

Represents financial issues like foreclosure, lawsuits, or defaults of the applicant or co-applicant.

Property Name	Type	Description	Filter Group and Version	Available Version
bankruptcyType	String	Bankruptcy type or types (if applicable).	Small, 48.0	48.0
borrowedAmount	Double	Amount of money borrowed for loan application transaction.	Small, 48.0	48.0
createdById	String	ID of the user who created this record.	Small, 48.0	48.0
createdDate	String	Date and time when this record was created.	Small, 48.0	48.0
extendedFields	Extended Fields Output[]	Custom fields related to the financial transaction.	Big, 48.0	48.0
externalId	String	Identifier assigned to imported declaration data by external data source (if applicable).	Small, 48.0	48.0
hasBorrowedMoney	Boolean	Indicates whether borrower is borrowing money for loan application transaction.	Small, 48.0	48.0
hasCoSignedThisDebt	Boolean	Indicates whether borrower is co-signer or guarantor on debt or loan that's not disclosed on loan application.	Small, 48.0	48.0
hasDeclaredBankruptcy	Boolean	Indicates whether borrower declared bankruptcy within the past seven years.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
hasDeedSurrender	Boolean	Indicates whether borrower conveyed title to a property in lieu of foreclosure in past seven years.	Small, 48.0	48.0
hasOutstandingJudgment	Boolean	Indicates whether there are one or more outstanding judgments against the borrower.	Small, 48.0	48.0
hasOwnershipInterest	Boolean	Indicates whether borrower had ownership interest in a property in the last ree years.	Small, 48.0	48.0
hasPastShortSale	Boolean	Indicates whether borrower sold a property to a third party where lender agreed to accept amount less than total outstanding mortgage balance due within past ven years.	Small, 48.0	48.0
hasPropertyForeclosed	Boolean	Indicates whether borrower had property foreclosed upon in last ven years.	Small, 48.0	48.0
hasUndisclosedCreditApp	Boolean	Indicates whether, on or before closing, borrower applied for new undisclosed credit like a credit card or installment loan.	Small, 48.0	48.0
hasUndisclosedMortgage	Boolean	Indicates whether, on or before closing, borrower applied for an undisclosed mortgage loan on a property other than the application property.	Small, 48.0	48.0
id	String	ID of the borrower declaration.	Small, 48.0	48.0
isDeleted	Boolean	Indicates whether the declaration record is deleted.	Small, 48.0	48.0
isPartyToLawsuit	Boolean	Indicates whether borrower is party to lawsuit with potential personal financial liability.	Small, 48.0	48.0
isPresentlyDelinquent	Boolean	Indicates whether borrower is currently delinquent or in default on any federal debt or other loan, mortgage, financial obligation, bond, or loan guarantee.	Small, 48.0	48.0
isPrimaryResidence	Boolean	Indicates whether property is to be borrower's primary residence.	Small, 48.0	48.0
isRelatedToSeller	Boolean	Indicates whether borrower has family or business relationship with seller of property (for purchase transaction).	Small, 48.0	48.0
isSubjectToPriorityLien	Boolean	Indicates whether application property is to have a priority clean energy lien like	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
		Property Assessed Clean Energy Program financing that takes priority over the first mortgage lien.		
lastModifiedById	String	ID of the user who last modified this record.	Small, 48.0	48.0
lastModifiedDate	String	Date and time when a user last modified this record.	Small, 48.0	48.0
lastReferencedDate	String	Date and time when a user last referenced this record.	Small, 48.0	48.0
lastViewedDate	String	Date and time when a user last viewed this record.	Small, 48.0	48.0
loanApplicantId	String	ID of the loan applicant record.	Small, 48.0	48.0
loanApplicationId	String	ID of the loan application record.	Small, 48.0	48.0
name	String	Name of the declaration.	Small, 48.0	48.0
ownerId	String	ID of the user who owns the record.	Small, 48.0	48.0
priorPropertyTitleType	String	Identifies how borrower held title in the ownership interest property.	Small, 48.0	48.0
priorPropertyUseType	String	Identifies type of property borrower held ownership interest in.	Small, 48.0	48.0
systemModstamp	String	Date and time when a user or automated process (such as a trigger) last modified this record.	Small, 48.0	48.0

Borrower Declaration Result

Result containing details about borrower's declaration.

Property Name	Type	Description	Filter Group and Version	Available Version
externalId	String	Identifier assigned to imported borrower data by external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the borrower.	Small, 48.0	48.0

Mortgage Response

Response for the POST or PATCH method.

Property Name	Type	Description	Filter Group and Version	Available Version
message	String	Error message, if any.	Small, 48.0	48.0
result	Mortgage Result[]	Representation of mortgage result.	Small, 48.0	48.0

Mortgage Information Output

Represents the output of the GET method.

Property Name	Type	Description	Filter Group and Version	Available Version
accountId	String	Account associated with the application.	Small, 48.0	48.0
amortizationTerm	Double	Duration of the amortization in months.	Small, 48.0	48.0

assets	Asset Output[]	Represents details about the borrower's and co-borrower's current personal and real property.	Big, 48.0	48.0
balloonTermMonths	Double	Number of months during which the cumulative loan must be repaid.	Small, 48.0	48.0
borrowers	Borrower Output[]	List of borrowers for the loan application.	Big, 48.0	48.0
createdById	String	ID of the user who created this record.	Small, 48.0	48.0
createdDate	String	Date and time when this record was created.	Small, 48.0	48.0
estateHoldType	String	Lender's lien is on both land and structure (fee simple) or just structure (leasehold).	Small, 48.0	48.0
extendedFields	Extended Fields Output[]	Represents custom fields related to a loan application.	Big, 48.0	48.0
externalId	String	Identifier assigned to imported data by external data source (if applicable).	Small, 48.0	48.0
financials	Financial Output[]	Represents transaction details for a loan application.	Big, 48.0	48.0
hasOtherLoanFeature	Boolean	Indicates whether loan has other amortization feature.	Small, 48.0	48.0
hasPrepaymentPenalty	Boolean	Indicates whether penalty is incurred if borrower pays off loan balance before the loan term expires.	Small, 48.0	48.0
id	String	ID of the mortgage record.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
improvementCost	Double	Construction costs for a construction loan or home improvement costs for a renovation loan.	Small, 48.0	48.0
initialBuydownRate	Double	Initial lesser interest rate for the loan.	Small, 48.0	48.0
interestOnlyMonthCount	Double	Number of months that loan payments are interest only.	Small, 48.0	48.0
interestRate	Double	Interest rate for loan.	Small, 48.0	48.0
isBalloon	Boolean	Indicates whether borrower is applying for a balloon payment mortgage.	Small, 48.0	48.0
isInCommunityPropState	Boolean	Indicates whether the borrower lives in community property state.	Small, 48.0	48.0
isConstructionPermit	Boolean	Indicates whether at least one borrower lives in a community property state.	Small, 48.0	48.0
isContractForDeed	Boolean	Indicates whether loan proceeds is to pay off balance due on a contract for deed or land contract.	Small, 48.0	48.0
isDeleted	Boolean	Indicates whether the record is deleted.	Small, 48.0	48.0
isEnergyRelatedImprovement	Boolean	Indicates whether loan is to finance energy-related improvements.	Small, 48.0	48.0
isInterestOnly	Boolean	Indicates whether borrower is applying for an interest-only mortgage.	Small, 48.0	48.0
isNegativeAmortization	Boolean	Indicates whether loan allows for negative amortization where shortfalls in interest payments are added to the outstanding loan balance.	Small, 48.0	48.0
isInCommunityPropState	Boolean	Indicates whether property is located in a community property state.	Small, 48.0	48.0
isRenovation	Boolean	Indicates whether loan proceeds to finance cost of renovations to the property, and renovation value is included in the property's appraised value.	Small, 48.0	48.0
isSingleClosing	Boolean	Indicates whether construction and permanent loans have a single combined closing. Once construction is complete, loan converts to a traditional mortgage.	Small, 48.0	48.0
isSubjectToPriorityLien	Boolean	Indicates whether property is currently subject to an energy-related lien that could take priority over the first mortgage lien.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
isTempIntRateBuydown	Boolean	Indicates whether borrower is applying for loan with an initially reduced interest payment in exchange for an up-front cash deposit.	Small, 48.0	48.0
lastModifiedById	String	ID of the user who last modified this record.	Small, 48.0	48.0
lastModifiedDate	String	Date and time when a user last modified this record.	Small, 48.0	48.0
lastReferencedDate	String	Date and time when a user last referenced this record.	Small, 48.0	48.0
lastViewedDate	String	Date and time when a user last viewed this record.	Small, 48.0	48.0
leaseholdExpirationDate	String	Date when leasehold expires if land is leased.	Small, 48.0	48.0
liabilities	Liability Output[]	Represents details about the borrower and co-borrower current liabilities.	Big, 48.0	48.0
loanPurpose	String	Purpose of the loan.	Small, 48.0	48.0
lotAcquiredDate	String	Month and year property or land was purchased.	Small, 48.0	48.0
lotOriginalCost	Double	Original property cost (refinance) or original land cost (construction).	Small, 48.0	48.0
monthsBeforeFirstAdj	Double	Initial period prior to first adjustment in months.	Small, 48.0	48.0
monthsBetweenAdjustments	Double	Number of months before the first rate adjustment for an adjustable rate loan.	Small, 48.0	48.0
mortgageLienType	String	Type of mortgage lien associated with this loan application.	Small, 48.0	48.0
mortgageProgramType	String	Type of mortgage program applied for.	Small, 48.0	48.0
name	String	Name of the residential loan application.	Small, 48.0	48.0
nativeLandTenure	String	Property is located on an area reserved by or for an Indian land, village, or tribe to live on and use.	Small, 48.0	48.0
opportunityId	String	Opportunity associated with the application.	Small, 48.0	48.0
otherAmortizationType	String	Description of other amortization type for government loans.	Small, 48.0	48.0
otherLoanFeature	String	Description of other loan amortization feature.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
otherLoanPurpose	String	What the borrower will use the loan for if other was specified.	Small, 48.0	48.0
otherMortgageProgramType	String	Description of the other mortgage type.	Small, 48.0	48.0
otherRefinanceProgramType	String	Refinance program name if other was specified.	Small, 48.0	48.0
ownerId	String	ID of the user who owns this record.	Small, 48.0	48.0
prepayPenaltyTermMonth	Double	Number of months during which borrower incurs a penalty for early payoff of the loan balance.	Small, 48.0	48.0
projectType	String	Specifies the type of project that the property belongs to.	Small, 48.0	48.0
properties	Property Output[]	Represents details of the property the loan application finances.	Big, 48.0	48.0
refinanceProgramType	String	The applicable refinance program type based on the investor, guarantor, or lender guidelines.	Small, 48.0	48.0
refinanceType	String	Refinance loan type.	Small, 48.0	48.0
status	String	Indicates the current status of the loan application.	Small, 48.0	48.0
systemModstamp	String	Represents details of borrowers who are applying to hold title to the property the loan application finances.	Small, 48.0	48.0
titleHolders	Title Holder Output[]	Way the borrower or borrowers take title for the loan.	Big, 48.0	48.0
titleType	String	Number of months during which borrower incurs a penalty for early payoff of the loan balance.	Small, 48.0	48.0
totalFinancialLiabilityMonth	Double	Total monthly amount of borrowers' outstanding financial liabilities payments excluding real estate.	Small, 48.0	48.0
totalFinancialAssetAmount	Double	Total amount of borrowers' financial account assets excluding real estate.	Small, 48.0	48.0
totalOtherAssetAmount	Double	Total amount of borrowers' other assets excluding real estate.	Small, 48.0	48.0
totalOtherLiabilityMonth	Double	Total monthly amount of borrowers' other monthly liability and expense payments excluding real estate.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
trustTitleType	String	Title to be held in a living trust or a land trust.	Small, 48.0	48.0

Borrower employment Result

Borrower employment result of the POST or PATCH request.

Property Name	Type	Description	Filter Group and Version	Available Version
externalId	String	ID that uniquely identifies imported data in an external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the borrower.	Small, 48.0	48.0

Borrower Income Result

Borrower income result of the POST or PATCH request.

Property Name	Type	Description	Filter Group and Version	Available Version
externalId	String	ID that uniquely identifies imported data in an external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the borrower.	Small, 48.0	48.0

Asset Result

Asset result of the POST or PATCH request.

Property Name	Type	Description	Filter Group and Version	Available Version
externalId	String	ID that uniquely identifies imported data in an external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the borrower.	Small, 48.0	48.0

Borrower Address Result

Borrower address result of the POST or PATCH request.

Property Name	Type	Description	Filter Group and Version	Available Version
externalId	String	ID that uniquely identifies imported data in an external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the borrower.	Small, 48.0	48.0

Title Holder Result

Title holder result of the POST or PATCH request.

Property Name	Type	Description	Filter Group and Version	Available Version
externalId	String	ID that uniquely identifies imported data in an external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the borrower.	Small, 48.0	48.0

Property Result

Property result of the POST or PATCH request.

Property Name	Type	Description	Filter Group and Version	Available Version
externalId	String	ID that uniquely identifies imported data in an external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the borrower.	Small, 48.0	48.0

Liability Result

Liability result of the POST or PATCH request.

Property Name	Type	Description	Filter Group and Version	Available Version
externalId	String	ID that uniquely identifies imported data in an external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the borrower.	Small, 48.0	48.0

Financial Result

Financial result of the POST or PATCH request.

Property Name	Type	Description	Filter Group and Version	Available Version
externalId	String	ID that uniquely identifies imported data in an external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the borrower.	Small, 48.0	48.0

Borrower Result

Borrower result of the POST or PATCH request.

Property Name	Type	Description	Filter Group and Version	Available Version
addresses	Borrower Address Result[]	Borrower's addresses.	Big, 48.0	48.0
declarations	Borrower Declaration Result[]	Borrower's declarations.	Big, 48.0	48.0
employments	Borrower employment Result[]	Borrower's employments.	Big, 48.0	48.0
externalId	String	ID that uniquely identifies imported data in an external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the orrower.	Small, 48.0	48.0
incomes	Borrower Income Result[]	Borrower's incomes.	Big, 48.0	48.0

Address Output

Represents address details.

Property Name	Type	Description	Filter Group and Version	Available Version
city	String	The address city.	Small, 48.0	48.0
country	String	The address country.	Small, 48.0	48.0
postalCode	String	The address postal code.	Small, 48.0	48.0
state	String	The address state.	Small, 48.0	48.0
street	String	The address street.	Small, 48.0	48.0

Property Output

Represents details of the property the loan application finances.

Property Name	Type	Description	Filter Group and Version	Available Version
createdById	String	ID of the user who created this record.	Small, 48.0	48.0
createdDate	String	Date and time when this record was created.	Small, 48.0	48.0
estimatedGrossMonthlyRentalIncome	Double	Estimated gross monthly rental income per unit if application property is a two to four unit primary residence or investment property.	Small, 48.0	48.0
estimatedNetMonthlyRentalIncome	Double	Estimated net monthly rental income per unit if application property is a two-to-four unit primary residence or investment property.	Small, 48.0	48.0
extendedFields	Extended Fields Output[]	Custom fields related to the property.	Big, 48.0	48.0
externalId	String	Identifier assigned to imported property data by external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the property.	Small, 48.0	48.0
isDeleted	Boolean	Indicates whether the property record is deleted.	Small, 48.0	48.0
isManufacturedHome	Boolean	Indicates whether application property is a manufactured home.	Small, 48.0	48.0
isMixedUseProperty	Boolean	Indicates whether application property includes commercial space set aside for business use.	Small, 48.0	48.0
lastModifiedById	String	ID of the user who last modified this record.	Small, 48.0	48.0
lastModifiedDate	String	Date and time when a user last modified this record.	Small, 48.0	48.0
lastReferencedDate	String	Date and time when a user last referenced this record.	Small, 48.0	48.0
lastViewedDate	String	Date and time when a user last viewed this record.	Small, 48.0	48.0
loanApplicationId	String	ID of the loan application record.	Small, 48.0	48.0
loanPurposeType	String	What the borrower will use the loan for.	Small, 48.0	48.0
name	String	Name of loan application property.	Small, 48.0	48.0
propertyAddress	Address Output	Physical address of the property to be financed.	Small, 48.0	48.0
propertyUseType	String	Borrower's stated use for the property.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
propertyValue	Double	Estimated present market value of the application property.	Small, 48.0	48.0
requestedLoanAmount	Double	Total loan amount the borrower is applying for.	Small, 48.0	48.0
systemModstamp	String	Date and time when a user or automated process (such as a trigger) last modified this record.	Small, 48.0	48.0
unitsFinancedCount	Integer	Number of units being financed at this address.	Small, 48.0	48.0

Liability Output

Details about the borrower and co-borrower current liabilities.

Property Name	Type	Description	Filter Group and Version	Available Version
accountNumber	String	Borrower's account number with lender or creditor.	Small, 48.0	48.0
accountType	String	Personal debt borrower owes like credit card balances, other debts, and leases.	Small, 48.0	48.0
borrowersExternalIds	String[]	Identifier assigned to imported borrowers data by external data source (if applicable).	Big, 48.0	48.0
borrowersIds	String[]	IDs of the borrowers.	Big, 48.0	48.0
createdById	String	ID of the user who created this record.	Small, 48.0	48.0
createdDate	String	Date and time when this record was created.	Small, 48.0	48.0
creditLimitAmount	Double	Credit limit of real estate loan or line of credit.	Small, 48.0	48.0
creditorName	String	Lender or creditor owed the debt.	Small, 48.0	48.0
extendedFields	Extended Fields Output []	Custom fields related to the asset.	Big, 48.0	48.0
externalId	String	Identifier assigned to imported liability data by external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the liability.	Small, 48.0	48.0
isDeleted	Boolean	Indicates whether the liability record is deleted.	Small, 48.0	48.0
isJointLiability	Boolean	Indicates whether borrower holds liability jointly.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
lastModifiedById	String	ID of the user who last modified this record.	Small, 48.0	48.0
lastModifiedDate	String	Date and time when a user last modified this record.	Small, 48.0	48.0
lastReferencedDate	String	Date and time when a user last referenced this record.	Small, 48.0	48.0
lastViewedDate	String	Date and time when a user last viewed this record.	Small, 48.0	48.0
liabilityClass	String	Include the liability's monthly payment in this liability class monthly payment total.	Small, 48.0	48.0
loanApplicationAssetId	String	ID of the loan application asset record.	Small, 48.0	48.0
loanApplicationId	String	ID of the loan application record.	Small, 48.0	48.0
loanType	String	Existing real estate loan type.	Small, 48.0	48.0
monthlyPaymentAmount	Double	Borrower's monthly payment required to keep debt account current.	Small, 48.0	48.0
name	String	Name of the liability.	Small, 48.0	48.0
otherLiabilityType	String	Identifies type of other borrower expense or liability.	Small, 48.0	48.0
ownerId	String	ID of the user who owns the record.	Small, 48.0	48.0
shouldBePaidInFull	Boolean	Indicates whether borrower to pay off debt on or before closing.	Small, 48.0	48.0
systemModstamp	String	Date and time when a user or automated process (such as a trigger) last modified this record.	Small, 48.0	48.0
unpaidBalanceAmount	Double	Unpaid liability balance when borrower completed loan application.	Small, 48.0	48.0

Asset Output

Represents details about the borrower's and co-borrower's current personal and real property.

Property Name	Type	Description	Filter Group and Version	Available Version
accountNumber	String	Account number associated with financial institution holding asset.	Small, 48.0	48.0
accountType	String	Identifies asset account type.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
assetClass	String	Identifies which asset class total to include the asset's value in.	Small, 48.0	48.0
assetType	String	Identifies type of other asset.	Small, 48.0	48.0
borrowersExternalIds	String[]	External IDs of borrower and co-borrowers.	Big, 48.0	48.0
borrowersIds	String[]	IDs of borrower and co-borrowers.	Big, 48.0	48.0
cashOnMarketValue	Double	Asset's cash or current market value.	Small, 48.0	48.0
createdById	String	ID of the user who created this record.	Small, 48.0	48.0
createdDate	String	Date and time when this record was created.	Small, 48.0	48.0
dispositionType	String	Real estate asset's planned future use.	Small, 48.0	48.0
extendedFields	Extended Fields Output[]	Custom fields related to the asset.	Big, 48.0	48.0
externalId	String	Identifier assigned to imported asset data by external data source (if applicable).	Small, 48.0	48.0
financialInstitutionName	String	Name of financial institution where financial account is held.	Small, 48.0	48.0
grossMonthlyRentalIncome	Double	Borrower's monthly rent income collected on real estate asset.	Small, 48.0	48.0
id	String	ID of the asset.	Small, 48.0	48.0
isDeleted	Boolean	Indicates whether the asset record is deleted.	Small, 48.0	48.0
isJointAsset	Boolean	Indicates asset is held jointly.	Small, 48.0	48.0
lastModifiedById	String	ID of the user who last modified this record.	Small, 48.0	48.0
lastModifiedDate	String	Date and time when a user last modified this record.	Small, 48.0	48.0
lastReferencedDate	String	Date and time when a user last referenced this record.	Small, 48.0	48.0
lastViewedDate	String	Date and time when a user last viewed this record.	Small, 48.0	48.0
loanApplicationId	String	ID of the loan application record.	Small, 48.0	48.0
name	String	Name of the loan application asset.	Small, 48.0	48.0
netMonthlyRentalIncome	Double	Borrower's net monthly income on real estate asset.	Small, 48.0	48.0
ownerId	String	ID of the user who owns this record.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
presentMarketValue	Double	Cash value of real estate asset if sold today.	Small, 48.0	48.0
realEstateAddress	Address Output[]	Real estate asset's address.	Small, 48.0	48.0
realEstateMonthlyExpense	Double	Borrower's monthly real estate asset expenses including insurance, maintenance, taxes, and miscellaneous costs.	Small, 48.0	48.0
systemModstamp	String	Date and time when a user or automated process (such as a trigger) last modified this record.	Small, 48.0	48.0

Title Holder Output

Represents details of borrowers who are applying to hold title to the property the loan application finances.

Property Name	Type	Description	Filter Group and Version	Available Version
createdById	String	ID of the user who created this record.	Small, 48.0	48.0
createdDate	String	Date and time when this record was created.	Small, 48.0	48.0
extendedFields	Extended Fields Output[]	Custom fields related to the title holder.	Big, 48.0	48.0
externalId	String	Identifier assigned to imported title holder data by external data source (if applicable).	Small, 48.0	48.0
id	String	ID of the title holder.	Small, 48.0	48.0
isCurrentTitleHolder	Boolean	Indicates whether person is a current title holder on property to be refinanced.	Small, 48.0	48.0
isDeleted	Boolean	Indicates whether the title holder record is deleted.	Small, 48.0	48.0
lastModifiedById	String	ID of the user who last modified this record.	Small, 48.0	48.0
lastModifiedDate	String	Date and time when a user last modified this record.	Small, 48.0	48.0
lastReferencedDate	String	Date and time when a user last referenced this record.	Small, 48.0	48.0
lastViewedDate	String	Date and time when a user last viewed this record.	Small, 48.0	48.0
loanApplicationId	String	ID of the loan application record.	Small, 48.0	48.0
name	String	Name of the loan application title holder.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
systemModstamp	String	Date and time when a user or automated process (such as a trigger) last modified this record.	Small, 48.0	48.0
titleHolderName	String	Name of the person on the title for the property associated with the loan application.	Small, 48.0	48.0

Financial Output

Output details for the financial transaction.

Property Name	Type	Description	Filter Group and Version	Available Version
borrowerClosingCostAmt	Double	Total closing costs due from borrower, including prepaid and initial escrow payments.	Small, 48.0	48.0
cashFromOrToBorrowerAmt	Double	Cash the borrower pays or receives at closing, not including reserves or other funds that may still require lender verification.	Small, 48.0	48.0
counselingAgencyName	String	Counseling provider's name if agency isn't HUD approved or if Housing Counseling Agency ID is unknown.	Small, 48.0	48.0
counselingAgencyProviderName	String	Education provider's name if agency isn't HUD-approved or if Housing Counseling Agency ID is unknown.	Small, 48.0	48.0
counselingCompleteBorName	String	Name of borrower or borrowers who completed housing counseling.	Small, 48.0	48.0
counselingCompletionDate	String	Date borrower completed housing counseling.	Small, 48.0	48.0
createdById	String	ID of the user who created this record.	Small, 48.0	48.0
createdDate	String	Date and time when this record was created.	Small, 48.0	48.0
creditFromSeller	Double	Total amount of closing costs due from seller.	Small, 48.0	48.0
discountPointCostAmount	Double	Total cost of discount points purchased by the borrower due at closing.	Small, 48.0	48.0
estFirstMortgagePayment	Double	Proposed monthly first mortgage payment for loan application property, including principal and interest.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
estHomeInsurancePayment	Double	Proposed monthly payment for homeowners insurance on application property.	Small, 48.0	48.0

estStudentLoanPayment	Double	Proposed total monthly payment for other mortgages or liens on loan application property, including principal and interest.	Small, 48.0	48.0
estSuppInsurancePayment	Double	Proposed monthly payment for supplemental property insurance like flood, earthquake, or umbrella policies on application property.	Small, 48.0	48.0
extendedFields	Extended Fields Output[]	Custom fields related to the transaction.	Big, 48.0	48.0
externalId	String	Identifier assigned to imported financial data by external data source (if applicable).	Small, 48.0	48.0
financedMortgageInsuranceAmt	Double	Total amount of financed mortgage insurance or financed mortgage insurance equivalent.	Small, 48.0	48.0
hasCompletedCounseling	Boolean	Indicates whether one or more borrowers completed housing counseling within the last 12 months.	Small, 48.0	48.0
hasHomeownerEducation	Boolean	Indicates whether one or more borrowers completed homeownership education within the last 12 months.	Small, 48.0	48.0
homeEdCompletedBorrowerName	String	Name of borrower or borrowers who completed homeownership education.	Small, 48.0	48.0
homeownerEdCompleteDate	String	Date borrower completed homeownership education.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
homeownerEdFormat	String	Indicates the format of homeownership education attended by borrower.	Small, 48.0	48.0
housingCounselingFormat	String	Indicates the format of the housing counseling completed by borrower.	Small, 48.0	48.0
hudApproveAgencyId	String	Home counseling provider's Housing Counseling Agency ID if agency is HUD-approved.	Small, 48.0	48.0
hudApprovedProviderId	String	Homeownership education provider's Housing Counseling Agency ID if agency is HUD-approved.	Small, 48.0	48.0
id	String	ID of the loan application financial.	Small, 48.0	48.0
isDeleted	Boolean	Indicates whether the financial record is deleted.	Small, 48.0	48.0
landAcquiredSeparatelyCost	Double	Price of land if purchased separately from the building or structure.	Small, 48.0	48.0
lastModifiedById	String	ID of the user who last modified this record.	Small, 48.0	48.0
lastModifiedDate	String	Date and time when a user last modified this record.	Small, 48.0	48.0
lastReferencedDate	String	Date and time when a user last referenced this record.	Small, 48.0	48.0
lastViewedDate	String	Date and time when a user last viewed this record.	Small, 48.0	48.0
loanAmount	Double	Total loan amount.	Small, 48.0	48.0
loanExclMortgageInsurance	Double	Loan amount excluding financed mortgage insurance or financed mortgage insurance equivalent.	Small, 48.0	48.0
loanApplicationId	String	ID of the loan application record.	Small, 48.0	48.0
name	String	Name of the loan application financial.	Small, 48.0	48.0
otherCredit	Double	Total amount of all purchase credits like borrower credits, credits from third parties, and non-cash seller credits.	Small, 48.0	48.0
otherNewMortgageLoanAmt	Double	Total amount of other new borrower mortgages, both first lien and subordinate lien, on the application property.	Small, 48.0	48.0
outstandingLoanAmount	Double	Total amount of all mortgage loans on application property to be paid off by refinance loan.	Small, 48.0	48.0

Property Name	Type	Description	Filter Group and Version	Available Version
purchasePriceAmount	Double	Purchase price for the property.	Small, 48.0	48.0
totalAndRepairsAmount	Double	Cost of any alterations, improvements, and repairs on the property.	Small, 48.0	48.0
systemModstamp	String	Date and time when a user or automated process (such as a trigger) last modified this record.	Small, 48.0	48.0
totalCashDueFromBorrower	Double	Total cash due from borrower at closing.	Small, 48.0	48.0
totalCredit	Double	Total borrower credits.	Small, 48.0	48.0
totalDebtPaidOffAmount	Double	Total amount of all non-application property liabilities borrower indicated would be paid off on or before closing.	Small, 48.0	48.0
totalEstPaymentAmt	Double	Proposed total monthly payment for application property.	Small, 48.0	48.0
totalMortgageLoanDebit	Double	Total mortgage loans plus total credits.	Small, 48.0	48.0
totalMortgageLoanAmt	Double	Total amount of loan.	Small, 48.0	48.0

Mortgage Information Response

Response for the GET method.

Property Name	Type	Description	Filter Group and Version	Available Version
message	String	Error message, if any.	Small, 48.0	48.0
result	Mortgage Information Output[]	Data of the mortgage result.	Small, 48.0	48.0

FINANCIAL SERVICES CLOUD METADATA API

AccountRelationshipShareRule

Represents the rule that determines which object records are shared, how they are shared, the account relationship type that shares the records, and the level of access granted to the records. This type extends the `MetadataWithContent` metadata type and inherits its `content` and `fullName` fields.

AccountRelationshipShareRule

The FSC Insurance permission set in Financial Services Cloud exposes additional values for the `accountToCriteriaField` and `entityType` fields on the `AccountRelationshipShareRule` metadata type.

Field Name	Field Type	Description
<code>accountToCriteriaField</code>	string	Criteria that must be met for the data to be shared. This field shows these additional values for Insurance for Financial Services Cloud. <ul style="list-style-type: none">• <code>BusinessMilestone.OwnerId</code>• <code>BusinessMilestone.PrimaryAccountId</code>• <code>Claim.AccountId</code>• <code>Claim.OwnerId</code>• <code>CustomerProperty.OwnerId</code>• <code>CustomerProperty.PrimaryOwnerId</code>• <code>InsurancePolicy.NameInsuredId</code>• <code>InsurancePolicy.OwnerId</code>• <code>PersonLifeEvent.OwnerId</code>
<code>entityType</code>	string	The type of data shared by this rule. This field shows these additional values for Insurance for Financial Services Cloud. <ul style="list-style-type: none">• <code>BusinessMilestone</code>• <code>Claim</code>• <code>CustomerProperty</code>• <code>InsurancePolicy</code>• <code>PersonLifeEvent</code>

SEE ALSO:

[Metadata API Developer Guide: AccountRelationshipShareRule](#)

BatchCalcJobDefinition

Represents a Data Processing Engine definition.This type extends the Metadata metadata type and inherits its `fullName` field.

File Suffix and Directory Location

BatchCalcJobDefinition components have the suffix `.batchCalcJobDefinition` and are stored in the `batchCalcJobDefinitions` folder.

Version

BatchCalcJobDefinition components are available in API version 51.0 and later.

Special Access Rules

To use this metadata type, one of these licenses is required:

- Loyalty Management
- Financial Services Cloud
- Rebate Management

Fields

Field Name	Field Type	Description
aggregates	BatchCalcJobAggregate[]	Collection of aggregate nodes in a data processing engine.
appends	BatchCalcJobUnion[]	Collection of append nodes in a data processing engine.
datasources	BatchCalcJobDatasource[]	Collection of data source nodes in a data processing engine.
description	string	Description of a data processing engine definition.
filters	BatchCalcJobFilter[]	Collection of filter nodes in a data processing engine.
isTemplate	boolean	Indicates whether this is a template data processing engine definition.
joins	BatchCalcJobSourceJoin[]	Collection of join nodes in a data processing engine.
label	string	The label of a data processing engine definition.
parameters	BatchCalcJobParameter[]	Collection of input variables in a data processing engine.
processType	BatchCalcProcessType (enumeration of type string) <ul style="list-style-type: none">• <code>DataProcessingEngine</code>• <code>Rebates</code>• <code>FSCHierarchyRollUp</code>	The process type of a data processing engine. Valid values are:

Field Name	Field Type	Description
		<ul style="list-style-type: none"> • <code>Loyalty</code>
<code>status</code>	BatchJobDefinitionStatus (enumeration of type string)	Status of a data processing engine definition. Valid values are: <ul style="list-style-type: none"> • <code>Active</code> • <code>Inactive</code>
<code>transforms</code>	BatchCalcJobTransform[]	Collection of data transformation nodes in a data processing engine.
<code>writebacks</code>	BatchCalcJobWritebackObject[]	Collection of writeback objects in which the results of the data processing engine are written back.

BatchCalcJobAggregate

Represents a collection of fields relating to an aggregate node in a data processing engine.

Fields

Field Name	Field Type	Description
<code>description</code>	string	Description of an aggregate node.
<code>fields</code>	BatchCalcJobAggregateField[]	Required. Collection of aggregation fields.
<code>groupBy</code>	string[]	Required. Collections of fields used to group data in an aggregate node.
<code>label</code>	string	Required. Label of an aggregate node.
<code>name</code>	string	Required. Name of an aggregate node.
<code>sourceName</code>	string	Required. Name of the source node.

BatchCalcJobAggregateField

Represents a collection of fields relating to an aggregation field in an aggregate node of a data processing engine.

Fields

Field Name	Field Type	Description
<code>aggregateFunction</code>	BatchCalcJobAggregateFunction (enumeration of type string)	Required. Function used for aggregation. Valid values are: <ul style="list-style-type: none"> • <code>Unique</code>—A count of unique values. • <code>Sum</code>—The sum of all values. • <code>Max</code>—The largest value.

Field Name	Field Type	Description
		<ul style="list-style-type: none">• <code>Min</code>—The smallest value.• <code>Avg</code>—The average value, calculated as the mean.• <code>Std</code>—The standard deviation.• <code>Stdp</code>—A standard deviation with population variance.• <code>Var</code>—The variance.• <code>VarP</code>—The variance with population.• <code>Count</code>—The total count of values.
<code>alias</code>	string	Required. Name that subsequent nodes within the data processing engine use to refer to the aggregate field.
<code>sourceFieldName</code>	string	Required. Source node field on which the aggregate is calculated.

BatchCalcJobDatasource

Represents a collection of fields relating to a data source node in a data processing engine.

Fields

Field Name	Field Type	Description
<code>description</code>	string	Description of a data source node.
<code>fields</code>	BatchCalcJobDatasourceField[]	Required. Collection of data source fields.
<code>label</code>	string	Required. Label of a data source node.
<code>name</code>	string	Required. Name of a data source node.
<code>sourceName</code>	string	Required. Name of a standard or custom object from which the data source node extracts data.
<code>type</code>	BatchCalcJobSourceType (enumeration of type string)	Required. Type of object for the source object field. Supported value is <code>StandardObject</code> .

BatchCalcJobDatasourceField

Represents a collection of fields relating to a source object field that are selected in the data source node of a data processing engine.

Fields

Field Name	Field Type	Description
alias	string	Name that subsequent nodes within the data processing engine use to refer to the data source field. Required when the field name is lookup.
name	string	Required. Name of the field. This can be either of the following: <ul style="list-style-type: none">• Name of the source field selected in the associated data source object.• Name from a nested lookup object with three child levels.

BatchCalcJobFilter

Represents a collection of fields relating to a filter node in a data processing engine.

Fields

Field Name	Field Type	Description
criteria	BatchCalcJobFilterCriteria []	Collection of filter criteria in a filter node.  Note: The field is required when <code>isDynamicFilter</code> is set to <code>False</code> .
description	string	Description of the batch calculation job filter.
filterCondition	string	Logic that is specified to apply the filter conditions.  Note: The field is required when <code>isDynamicFilter</code> is set to <code>False</code> .
filterParameterName	string	Name of the parameter of type filter.
isDynamicFilter	boolean	Indicates whether the filter criteria is dynamic. If value is set to <code>True</code> , filter criteria is passed in runtime with <code>filterParameterName</code> .
label	string	Required. Label of the filter node.
name	string	Required. Name of the filter node.
sourceName	string	Required. Name of the source node.

BatchCalcJobFilterCriteria

Represents a collection of fields relating to a filter condition in a filter node in a data processing engine.

Fields

Field Name	Field Type	Description
inputVariable	string	Name of the input variable used as a filter.
operator	BatchCalcJobFilter Operator (enumeration of type string)	Required. Operator that is specified in the filter condition. Valid values are: <ul style="list-style-type: none">• Equals• NotEquals• GreaterThan• GreaterThanOrEqual• LessThan• LessThanOrEqual• StartsWith• EndsWith• Contains• DoesNotContain• IsNull• IsNotNull
sequence	integer	Required. Sequence number used to refer the criteria in a filter node.
sourceFieldName	string	Required. Name of the field from the source node to apply the filter.
value	string	Value used to filter data from the source node.

BatchCalcJobParameter

Represents a collection of fields relating to an input variable in a data processing engine.

Fields

Field Name	Field Type	Description
dataType	BatchCalcJobParameter DataType (enumeration of type string)	Required. Data type of the parameter. Valid values are: <ul style="list-style-type: none">• Text• Numeric• Date• DateTime• Filter
defaultValue	string	Default value of the parameter.
description	string	Description of the batch calculation job parameter.

Field Name	Field Type	Description
isMultiValue	boolean	Indicates whether the parameter has different values (<code>True</code>) or not (<code>False</code>). This field is supported only for the <code>Text</code> data type.
label	string	Required. Label of the batch calculation job parameter.
name	string	Required. Name of the batch calculation job parameter.

BatchCalcJobSourceJoin

Represents a collection of fields relating to a join node in a data processing engine.

Fields

Field Name	Field Type	Description
description	string	Description of the join node.
fields	BatchCalcJobJoinResultField[]	Collection of fields in a join node.
joinKeys	BatchCalcJobJoinKey[]	Collection of mapping of fields from the primary source node and the second source node in a join node.
label	string	Required. Label of the join node.
name	string	Required. Name of the join node.
primarySourceName	string	Required. Name associated with the node as the primary source node.
secondarySourceName	string	Required. Name associated with the node as the secondary source node.
type	BatchCalcJobSourceJoinType (enumeration of type string)	Required. Type of join specified between the primary source node and secondary source node. Valid values are: <ul style="list-style-type: none">• <code>LeftOuter</code>• <code>RightOuter</code>• <code>Inner</code>• <code>Outer</code>• <code>Lookup</code>

BatchCalcJobJoinKey

Represents a collection of fields relating to a mapping of fields from the first source node and second source node in a join node of a data processing engine.

Fields

Field Name	Field Type	Description
primarySourceFieldName	string	Required. Mapped field name of the primary source node.
secondarySourceFieldName	string	Required. Mapped field name of the secondary source node.

BatchCalcJobJoinResultField

Represents a collection of fields relating to a set of resultant fields in a join node of a data processing engine.

Fields

Field Name	Field Type	Description
alias	string	Required. Name that subsequent nodes within the data processing engine definition use to refer to the resultant field.
sourceFieldName	string	Required. Name of field from the primary or secondary data source.
sourceName	string	Required. Source node of the primary or secondary data source.

BatchCalcJobTransform

Represents a collection of fields relating to a data transformation in a data processing engine.

Fields

Field Name	Field Type	Description
description	string	The description of the batch calculation job transform.
droppedFields	BatchCalcJobTransformDroppedField[]	The collection of dropped fields in a data transformation. Available when the transformation type is <code>Slice</code> .
expressionFields	BatchCalcJobTransformAddedField[]	The collection of formula fields in a data transformation. Available when the transformation type is <code>Expression</code> .
label	string	Required. The label of the batch calculation job transform.
name	string	Required. The name of the batch calculation job transform.
sourceName	string	Required. Name of the source node.
transformType	BatchCalcJobTransformType (enumeration of type string)	Required. The type of transformation. Valid values are: <ul style="list-style-type: none">• <code>Expression</code>• <code>Slice</code>

BatchCalcJobTransformDroppedField

Represents a collection of fields relating to a dropped field in a data transformation of a data processing engine.

Fields

Field Name	Field Type	Description
sourceFieldName	string	Required. Name of the field that is dropped.

BatchCalcJobTransformAddedField

Represents a collection of fields relating to a formula in a data transformation of a data processing engine.

Fields

Field Name	Field Type	Description
alias	string	Required. Name that subsequent nodes within the data processing engine use to the transform node.
dataType	BatchCalcJobDataType (enumeration of type string)	Required. Data type of the formula. Valid values are: <ul style="list-style-type: none">• Text• Numeric• Date• DateTime
decimalPlaces	integer	Number of digits to the right of a decimal point in the value. Required for the Numeric data type.
expression	string	Required. Formula defined by the user.
length	integer	Total length of the value including the decimal places. Required for data types: Text and Numeric .

BatchCalcJobUnion

Represents a collection of fields relating to the union of data from two nodes in a data processing engine.

Fields

Field Name	Field Type	Description
description	string	Description of the batch calculation job union.

Field Name	Field Type	Description
isDisjointedSchema	boolean	Indicates whether the union is of two disjointed datasets. Set to <code>True</code> to allow joining of two datasets having no common fields.
label	string	Required. Label of the batch calculation job union.
name	string	Required. Name of the batch calculation job union.
sources	string[]	Names of the source nodes.

BatchCalcJobWritebackObject

Represents a collection of fields relating to the object in which the results of the data processing engine are written back.

Fields

Field Name	Field Type	Description
description	string	Descriptions of the batch calculation job writeback object.
fields	BatchCalcJobWritebackMapping []	Collection of the writeback fields.
isChangedRow	boolean	Indicates whether a row in the write back object is changed. Set to <code>True</code> to write back the changed rows.
label	string	Required. Name of the write back object.
name	string	Required. Name of the batch calculation job write back object.
operationType	BatchCalcJobWritebackOpn (enumeration of type string)	Required. Type of operation specified. Valid values are: <ul style="list-style-type: none">• <code>Insert</code>• <code>Update</code>• <code>Upsert</code>
sourceName	string	Required. Name of the source node associated with the write back object.
targetObjectName	string	Required. Object that is inserted or upserted by the data processing engine.
writebackSequence	integer	Sequence in which the target object is updated by the data processing engine.
writebackUser	string	ID of the user whose permissions decide which objects and fields of the target object can be updated.

BatchCalcJobWritebackMapping

Represents a collection of fields relating to the mapping between results and the fields in the target object.

Fields

Field Name	Field Type	Description
parentName	string	Name of the lookup object. Required only when the <code>relationshipName</code> field is defined.
relationshipName	string	Name of the lookup relationship.
sourceFieldName	string	Required. Name of the field in the source node that is written back.
targetFieldName	string	Required. Name of the sObject field to which the results are written back.

Declarative Metadata Sample Definition

The following is an example of a BatchCalcJobDefinition component.

```
<?xml version="1.0" encoding="UTF-8"?>
<BatchCalcJobDefinition xmlns="http://soap.sforce.com/2006/04/metadata">
  <aggregates>
    <description>Aggregate Description</description>
    <fields>

    <members>*</members>
    <name>BatchCalcJobDefinition</name>
  </types>
  <version>[fctest]</version>
</Package>

```

Wildcard Support in the Manifest File

This metadata type supports the wildcard character * (asterisk) in the `package.xml` manifest file. For information about using the manifest file, see [Deploying and Retrieving Metadata with the Zip File](#).

Flow for Financial Services Cloud

Represents the metadata associated with a flow. With Flow, you can create an application that navigates users through a series of screens to query and update records in the database. You can also execute logic and provide branching capability based on user input to build dynamic applications.

Flow

Financial Services Cloud exposes additional `FlowProcessType` values on the Flow type in Metadata API.

Field Name	Field Type	Description
<code>processType</code>	<code>FlowProcessType</code> (enumeration of type string)	The type of the flow, as determined by the active version. Valid values added by Financial Services Cloud include: <ul style="list-style-type: none"> <code>FSClending</code>— A flow for Financial Services Cloud Mortgage. This value is available in API version 46.0 and later.

FlowActionCall

Financial Services Cloud exposes additional `actionType` values for the FlowActionCall Metadata type.

Field Name	Field Type	Description
<code>actionType</code>	<code>FlowActionType</code> (enumeration of type string)	Required. The action type. Additional valid values only for Financial Services Cloud include: <ul style="list-style-type: none"> <code>createFinancialRecords</code>—Creates person accounts, contacts, financial accounts, properties, assets, and liabilities from a residential loan application. Available in API version 49.0 and later.

SEE ALSO:

[Metadata API Developer Guide: Flow](#)

Icon

Represents the mapping of custom icons to objects. This type extends the Metadata metadata type and inherits its `fullName` field.

File Suffix and Directory Location

Icon components have the suffix `.icon` and are stored in the `icons` folder.

Version

Icon components are available in API version 49.0 and later.

Special Access Rules

To use this metadata type, your Salesforce org must have the Health Cloud or Financial Services Cloud license.

Fields

Field Name	Field Type	Description
image	string	Required. The image file that is mapped to the object. Use the ContentAsset metadata type to hold the icon image referenced in the <code>image</code> field.
key	string	Required. A field value in the object. For example, with the <code>PersonLifeEvent</code> object, possible values for <code>key</code> can be <code>birthday</code> , <code>marriage</code> , <code>childbirth</code> , and so on.
usageType	IconUsageType (enumeration of type string)	Required. The object that is mapped to the image. Valid values are: <ul style="list-style-type: none"> • <code>PersonLifeEvent</code> • <code>InsurancePolicy</code> • <code>BusinessMilestone</code>

Declarative Metadata Sample Definition

The following is an example of an `Icon` component.

```
<?xml version="1.0" encoding="UTF-8"?>
<Icon xmlns="http://soap.sforce.com/2006/04/metadata">
  <usageType>PersonLifeEvent</usageType>
  <key>Birth</key>
  <image>image</image>
</Icon>
```

The following is an example `package.xml` that references the previous definition.

```
<?xml version="1.0" encoding="UTF-8"?>
<Package xmlns="http://soap.sforce.com/2006/04/metadata">
  <types>
    <members>icons</members>
    <name>Icon</name>
  </types>
  <version>49.0</version>
</Package>
```

IndustriesSettings

Represents settings for industries verticals like Financial Services Cloud, Consumer Goods Cloud, and Health Cloud. This type extends the Metadata metadata type and inherits its `fullName` field.

In the package manifest, all organization settings metadata types are accessed using the Settings name. See Settings for more details.

File Suffix and Directory Location

IndustriesSettings are stored in a single file named `Industries.settings` in the `settings` directory.

Version

Industries settings are available in API version 47.0 and later.

Special Access Rules

Some settings are specific to an industry vertical and are only available to customers with org editions where the vertical is enabled. Users need the FSC Insurance permission set to access the settings available in editions with Financial Services Cloud.

Fields for Financial Services Cloud

Field Name	Field Type	Description
<code>allowMultipleProducersToWorkOnSamePolicy</code>	boolean	Indicates whether multiple producers can be assigned to the same insurance policy. The default is <code>false</code> . This field is available in editions where Financial Services Cloud is enabled.
<code>enableAccessToMasterListOfCoverageTypes</code>	boolean	Indicates whether insurance agents can access the master list of coverage types. The default is <code>false</code> . This field is available in editions where Financial Services Cloud is enabled.
<code>enableBlockResourceAvailabilityOrgPref</code>	boolean	Indicates whether Lightning Scheduler service appointments are added to users' Salesforce calendars. For example, if set to <code>false</code> , users don't see their service appointments on their calendars. The default is <code>false</code> .
<code>enableCompliantDataSharingForAccount</code>	boolean	Indicates whether the Compliant Data Sharing feature is enabled for the Account object. The default is <code>false</code> . This field is available in editions where Financial Services Cloud is enabled.
<code>enableEinsteinDocReaderEnabled</code>	boolean	Indicates whether the Compliant Data Sharing feature is enabled for the Opportunity object. The default is <code>false</code> . This field is available in editions where Financial Services Cloud is enabled.
<code>enableEventManagerOrgPref</code>	boolean	Indicates whether users can add multiple service resources to a service appointment. The default is <code>false</code> .

Field Name	Field Type	Description
<code>enableFSCInsuranceReport</code>	boolean	<p>Indicates whether sales managers can access the dashboard and prebuilt reports. The default is <code>false</code>. This field is available in API version 48.0 and later in editions where Financial Services Cloud is enabled.</p> <p> Note: This setting can be enabled only if the <code>allowMultipleProducersToWorkOnSamePolicy</code> setting is already set to <code>true</code>.</p>
<code>enableInteractionSummaryPref</code>	boolean	Indicates whether the Interaction Summary setting is enabled for your org. The default is <code>false</code> . This field is available in editions where Financial Services Cloud is enabled.
<code>enableInteractionSummaryRoleHierarchy</code>	boolean	Indicates whether the Role-Hierarchy-Based Sharing for Interaction Summaries is enabled for your org. The default is <code>false</code> . This field is available in editions where Financial Services Cloud is enabled.
<code>enableManyToManyRelationships</code>	boolean	Indicates whether insurance can manage many-to-many relationships between claims and cases, claims and assets, and assets and policy participants. For example, if set to <code>true</code> , agents can handle multiple claims through one case or have multiple cases handling one claim. The default is <code>false</code> . This field is available in editions where Financial Services Cloud is enabled.
<code>enableMortgageRlaTotalsOrgPref</code>	boolean	Indicates whether the calculation of assets and liabilities for residential loan application records is enabled for your org (true) or not (false). The default is <code>false</code> . This field is available in editions where Financial Services Cloud is enabled.
<code>enableMultiResourceOrgPref</code>	boolean	Indicates whether users can add multiple service resources to a service appointment. The default is <code>false</code> .
<code>enableOverbookingOrgPref</code>	boolean	Indicates whether users can add multiple service appointments to a single time slot for a service resource. If set to <code>false</code> , concurrent time slots are visible, but can't be modified. The default is <code>false</code> .
<code>enableRBLUsingCalcService</code>	boolean	Indicates whether Roll-by-Lookup (RBL) Using Calc Service is enabled for your org. The default is <code>false</code> . This field is available in editions where Financial Services Cloud is enabled.
<code>enableRecordRollup</code>	boolean	Indicates whether Record Rollup Optimization is enabled for your org. The default is <code>false</code> . This field is available in editions where Financial Services Cloud is enabled.
<code>enableReferralScoring</code>	boolean	Indicates whether Einstein Referral Scoring for Financial Services Cloud is enabled for your org (true) or not (false). The default is <code>false</code> . This field is available in editions where Financial Services Cloud is enabled.
<code>loanApplicantAddressAutoCreation</code>	boolean	Indicates whether automatic generation of loan applicant records for new residential loan applications that are associated with person accounts is enabled for your org. The default is <code>false</code> . This field is

Field Name	Field Type	Description
		available in editions where Financial Services Cloud is enabled. Available in API version 51.0 and later.
loanApplicantAutoCreation	boolean	Indicates whether automatic generation of loan applicant address records for new residential loan applications that are associated with person accounts is enabled for your org. The default is <code>false</code> . This field is available in editions where Financial Services Cloud is enabled. Available in API version 51.0 and later.

Fields for Health Cloud

Field Name	Field Type	Description
enableClinicalDataModel	boolean	Indicates whether Clinical Data Model is enabled for your org. The default is <code>false</code> . Available in API version 51.0 and later.
enableMultipleCareProgramEnrolleeOrgPref	boolean	Indicates whether Multiple Care Program Enrollee is enabled for your org. Available in API version 49.0 and later.
enableMedicalDeviceEnabled	boolean	Indicates whether the Intelligent Sales features are enabled.
enableProviderSearchSyncOrgPref	boolean	Indicates whether provider data search is synced every six hours. The default is <code>false</code> . This field is available in editions where Health Cloud is enabled.
enableVisitInventoryEnabled	boolean	Indicates whether the visit data model is enabled.

Fields for Consumer Goods Cloud

Field Name	Field Type	Description
enableObjectDetection	boolean	Indicates whether Einstein Object Detection is enabled for your org. The default is <code>false</code> . This field is available in editions where Consumer Goods Cloud is enabled.

Declarative Metadata Sample Definition

The following is an example of a Industries.Settings metadata file.

```
<?xml version="1.0" encoding="UTF-8"?>
<IndustriesSettings xmlns="http://soap.sforce.com/2006/04/metadata">
  <enableEventManagerOrgPref>true</enableEventManagerOrgPref>
  <enableMultiResourceOrgPref>false</enableMultiResourceOrgPref>
  <enableOverbookingOrgPref>true</enableOverbookingOrgPref>
</IndustriesSettings>
```

```

    <enableBlockResourceAvailabilityOrgPref>true</enableBlockResourceAvailabilityOrgPref>

    <enableAccessToMasterListOfCoverageTypes>true</enableAccessToMasterListOfCoverageTypes>

```

The following is an example `package.xml` that references the previous definition.

```

<?xml version="1.0" encoding="UTF-8"?>
<Package xmlns="http://soap.sforce.com/2006/04/metadata">
  <types>
    <members>Industries</members>
    <name>Settings</name>
  </types>
  <version>47.0</version>
</Package>

```

ParticipantRole

Represents details, such as the name and associated default access level, for a role that a participant can have in the context of a parent record.

Parent Type

This type extends the [Metadata](#) metadata type and inherits its `fullName` field.

File Suffix and Directory Location

`ParticipantRole` components have the suffix `.participantRole` and are stored in the `participantRoles` folder.

Version

`ParticipantRole` components are available in API version 50.0 and later.

Fields

Field Name	Description
<code>defaultAccessLevel</code>	Field Type picklist

Field Name	Description
	Description Required. The default sharing access granted to the participant role. Valid values are: <ul style="list-style-type: none"> Edit—Read/Write None Read—Read Only
isActive	Field Type boolean Description Indicates whether the participant role is activated.
masterLabel	Field Type string Description Required. The name for the participant role.
parentObject	Field Type string Description Required. The parent object for the participant role. Valid values are: <ul style="list-style-type: none"> Account InteractionSummary Available in API version 51.0 and later. <ul style="list-style-type: none"> Opportunity

Declarative Metadata Sample Definition

The following is an example of a ParticipantRole component.

```
<?xml version="1.0" encoding="UTF-8"?>
<ParticipantRole xmlns="http://soap.sforce.com/2006/04/metadata">
  <defaultAccessLevel>Read</defaultAccessLevel>
  <isActive>true</isActive>
  <masterLabel>Advisor</masterLabel>
  <parentObject>Account</parentObject>
</ParticipantRole>
```

The following is an example package.xml that references the previous definition.

```
<?xml version="1.0" encoding="UTF-8"?>
<Package xmlns="http://soap.sforce.com/2006/04/metadata">
```

```
<types>
  <members>*</members>
  <name>ParticipantRole</name>
</types>
<version>50.0</version>
</Package>
```

Wildcard Support in the Manifest File

This metadata type supports the wildcard character * (asterisk) in the `package.xml` manifest file. For information about using the manifest file, see [Deploying and Retrieving Metadata with the Zip File](#).

FINANCIAL SERVICES CLOUD STANDARD INVOCABLE ACTIONS

Create person accounts, financial accounts, and related records from a residential loan application for Financial Services Cloud. For more information on standard invocable actions, see [REST API Developer Guide](#) and [Actions Developer Guide](#).

Create Financial Records Actions

Creates person accounts, contacts, financial accounts, properties, assets, and liabilities from a residential loan application.

This object is available in API version 49.0 and later for users with a Financial Services Cloud license.

Supported REST HTTP Methods

URI

`/services/data/vXX.X/actions/standard/createFinancialRecords`

Formats

JSON, XML

HTTP Methods

GET, HEAD, POST

Authentication

Authorization: Bearer *token*

Inputs

Input	Details
<code>recordId</code>	Type ID
	Description ID of the residential loan application.

Outputs

Input	Details
<code>status</code>	Type string
	Description Whether the creation process succeeded, partially succeeded, or failed.

Input	Details
customerPropertiesIdList	Type string Description List of IDs created for CustomerProperty records.
assetsAndLiabilitiesIdList	Type string Description List of IDs created for AssetsAndLiabilities records.
financialAccountsIdList	Type string Description List of IDs created for FinancialAccount records.
personAccountsIdList	Type string Description List of IDs created for PersonAccount records.
errors	Type string Description List of errors that occurred during the creation process.

Example

JSON Request Body

```
{
  "recordId" : "0cdB0000000CbVGIA0"
}
```

JSON Response Body

```
{
  "customerPropertiesIdList" : [ "0b8B0000000GnjdiAC" ],
  "assetsAndLiabilitiesIdList" : [ "a03B0000000735LrIAI", "a03B0000000735LsIAI",
"a03B0000000735LtIAI" ],
  "personAccountsIdList" : [ "001B0000001K8Zx5IAF" ],
  "errors" : [ ],
  "status" : "SUCCESS",
  "financialAccountsIdList" : [ "a0EB0000000227WoMAI", "a0EB0000000227WpMAI",
"a0EB0000000227WqMAI" ]
}
```

Data Processing Engine Actions

Run an active Data Processing Engine definition. This action executes a Data Processing Engine definition asynchronously.

A Data Processing Engine definition transforms data from your Salesforce org and writes back the results to your org. For more information about running Data Processing Engine definitions, see [Run a Data Processing Engine Definition](#) in Salesforce Help.

This object is available in API version 51.0 and later.

Supported REST HTTP Methods

- URI**
`/services/data/vXX.X/actions/custom/dataProcessingEngineAction`
- Formats**
JSON
- HTTP Methods**
GET, POST
- Authentication**
Authorization: Bearer *token*

Inputs

Use the GET method to retrieve input parameters of a Data Processing Engine definition. The Data Processing Engine action uses input variables to execute the data processing engine definition and generate a batch job ID. The input values vary according to the input fields in the Data Processing Engine definition.

Outputs

Output	Details
batchJobId	<div>Type string</div> <div>Description ID of the batch job generated after the request is successful. This ID is used to track the progress of the batch job in Monitor Workflow Services.</div>

Usage

JSON Sample Request

```
{
  "PointsAccrual" : {
    "memberTier" : "Gold",
    "minimumPointBalanceRequired" : "50000",
    "pointType" : "non-qualifying"
  }
}
```

```
}  
}
```

JSON Sample Response

```
{  
  "actionName": "PointsAccrual",  
  "errors": null,  
  "isSuccess": true,  
  "outputValues": {  
    "batchJobId": "01Mxx0000A000001EAA"  
  }  
}
```

FINANCIAL SERVICES CLOUD CUSTOM METADATA TYPES

Financial Services Cloud Custom Metadata Types

Use custom metadata types and fields that help deliver additional features for Financial Services Cloud.

Fields and custom metadata types in the package have the `FinServ` namespace prefix. For example, `FinServ__AccountRecordType__c` is a custom field on Individual Record Type Mapper. `FinServ__IndividualRecordTypeMapper__mdt` is a custom metadata type.

Not all fields are listed for some custom metadata types. To verify the complete list of fields for a custom metadata type, use a describe call from the API, inspect the WSDL, or use a schema viewer.

SEE ALSO:

[Custom Metadata Types](#)

IndividualRecordTypeMapper

Maps a new custom Individual record type to the standard Individual record type from Financial Services Cloud.

 **Note:** New custom fields can't be added to managed custom metadata types.

Supported Calls

`describeLayout()`, `describeSObjects()`, `query()`, `retrieve()`, `search()`

Field	Details
<code>AccountRecordTypeNamespace__c</code>	<div>Type string</div> <div>Properties Filter, Group, Nillable, Sort</div> <div>Description Namespace for Account record type being mapped.</div>
<code>AccountRecordType__c</code>	<div>Type string</div> <div>Properties Filter, Group, Nillable, Sort</div> <div>Description The name of your new custom Individual record type being mapped to the Financial Services Cloud Individual record type.</div>

Field	Details
	 Note: This field is for Salesforce internal-use only. By default, this field doesn't appear on any page layout.
ContactRecordTypeNamespace__c	Type string Properties Filter, Group, Nillable, Sort Description Namespace for Contact record type being mapped.
ContactRecordType__c	Type string Properties Filter, Group, Nillable, Sort Description Contact record type being mapped to the Financial Services Cloud Individual record type.
DetailPage__c	Type string Properties Filter, Group, Nillable, Sort Description Salesforce internal-use only.
IndividualType__c	Type string Properties Filter, Group, Nillable, Sort Description Type of Individual being mapped.
LeadRecordTypeNamespace__c	Type string Properties Filter, Group, Nillable, Sort Description Lead namespace for your custom record type's org.
LeadRecordType__c	Type string Properties Filter, Group, Nillable, Sort

Field	Details
	Description Lead Record Type to be used when converting Lead records. Leave this field blank to use any record type. All available record types are converted to an Individual record type unless there is another mapping specified.

GroupRecordTypeMapper

Maps a new custom Group record type to the standard Group record type from Financial Services Cloud.

 **Note:** New custom fields can't be added to managed custom metadata types.

Supported Calls

`describeLayout()`, `describeSObjects()`, `query()`, `retrieve()`, `search()`

Field	Details
<code>AccountRecordType__c</code>	Type string Properties Filter, Group, Nillable, Sort Description The name of your new custom Group record type being mapped to the Financial Services Cloud Group record type.  Note: This field is for Salesforce internal-use only. By default, this field doesn't appear on any page layout.
<code>AccountRecordTypeNamespace__c</code>	Type string Properties Filter, Group, Nillable, Sort Description Namespace for Account record type being mapped.

ReferralRecordTypeMapper

Maps a new custom record type on the Lead object, used to represent a new type of referral, to the standard Referral record type from Financial Services Cloud.

 **Note:** New custom fields can't be added to managed custom metadata types.

Supported Calls

`describeLayout()`, `describeSObjects()`, `query()`, `retrieve()`, `search()`

Field	Details
LeadRecordType__c	<p>Type string</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description The name of your new custom record type on the Lead object being mapped to the Financial Services Cloud Referral record type.</p> <p> Note: This field is for Salesforce internal-use only. By default, this field doesn't appear on any page layout.</p>
LeadRecordTypeNamespace__c	<p>Type string</p> <p>Properties Filter, Group, Nillable, Sort</p> <p>Description Namespace for Lead record type being mapped.</p>

FINANCIAL SERVICES CLOUD CUSTOM TRIGGERS

Financial Services Cloud Custom Triggers

Custom triggers ensure that data flows correctly through the Financial Services Cloud custom objects and fields.

Custom triggers use the `FinServ` namespace prefix. For example, `FinServ__AccountTrigger.trigger`, which is a custom trigger on Account that performs tasks on Account, Contact, and the relationship object AccountAccountRelation.

Table 1: Financial Services Cloud Quick Reference for Triggers

Trigger Name	Host Object
FinServ__AccountAccountRelationTrigger.trigger	AccountAccountRelation
FinServ__AccountContactRelationTrigger.trigger	AccountContactRelation
FinServ__AccountTrigger.trigger	Account
FinServ__AlertTrigger.trigger	Alert
FinServ__AssetsAndLiabilitiesTrigger.trigger	AssetsAndLiabilities
FinServ__ContactContactRelationTrigger.trigger	ContactContactRelation
FinServ__ContactTrigger.trigger	Contact
FinServ__EventTrigger.trigger	Event
FinServ__FinancialAccountRoleTrigger.trigger	FinancialAccountRole
FinServ__FinancialAccountTrigger.trigger	FinancialAccount
FinServ__FinancialGoalTrigger.trigger	FinancialGoal
FinServ__FinancialHoldingTrigger.trigger	FinancialHolding
FinServ__LeadTrigger.trigger	Lead
FinServ__OpportunityTrigger.trigger	Opportunity
FinServ__RBLFilterCriteriaTrigger.trigger	RBLFilterCriteria
FinServ__ReciprocalRoleTrigger.trigger	ReciprocalRole
FinServ__RevenueTrigger.trigger	Revenue
FinServ__RollupByLookupConfigTrigger.trigger	RollupByLookupConfig
FinServ__SecuritiesTrigger.trigger	Securities
FinServ__TaskTrigger.trigger	Task
FinServ__InsurancePolicyTrigger.trigger	InsurancePolicy
FinServ__ClaimTrigger.trigger	Claim

Trigger Behavior

The package provides triggers on sObjects, Relation sObjects, and Rollup sObjects. Each object type's trigger checks for various conditions and then performs tasks based on what it finds. Each object has one trigger. The following list explains trigger behavior by object.

sObjects

Note: The Account triggers support orgs using either the individual or person account models. Where the person account model is in use, the steps involving the creation of a Contact are not needed.

Account

Before insert: If the record type indicates that the account isn't a portion of an individual, `IndividualType` is set to blank.

After insert: If the user creates an account of record type Individual, creates an individual contact linked to the account. Also assigns topics based on the value in the field after an account has been created.

The steps to create an individual contact and assign topics are:

- For each account created, creates a contact.
- For each contact, adds `AccountId`.
- For each account, in a **future** method, adds `ContactId`.
- Sets `IndividualId__c` to `AccountId` concatenated with the current date.

Before update: Validates that the update on the account:

- Hasn't changed the account's record type from individual to another record type, and hasn't changed from one individual record type to another.
- Hasn't changed the account's record type from another record type to an individual record type.

After update: Syncs the contact associated with the updated account to reflect the updated fields. The following fields are synced:

- `AccountName`
- `OwnerId`
- `IndividualType__c`
- `RecordTypeId`

Before delete: Helps perform cascade deletes. Gathers all the rollup objects related to the account to be deleted.

After delete: Rolls back the rollup objects related to the deleted account.

Contact

Before insert: Creates an individual (Account - Representing Party) when the individual contact is promoted as an individual as follows.

- For each account that is passed, creates a contact.
- For each contact, adds `AccountId`.
- For each account, in a **future** method, adds `ContactId`.
- Sets `IndividualId__c` to `AccountId` concatenated with the current datetime.

After insert: Validates that the referenced individual account does not have a contact associated with it. This check is bypassed during a lead conversion.

Before update: Validates that the update on the account record:

- Hasn't changed the record type of the account from individual to another record type.
- Hasn't changed the record type of the account from any other record type to an individual.

- Validates that the referenced individual account does not have a contact associated with it.

After update: Syncs the account associated with the updated contact to reflect the updated fields. The following fields are synced:

- `AccountName`
- `OwnerId`
- `IndividualType__c`
- `RecordTypeId`

Reciprocal Role

After insert: If the role has the flag to create a reciprocal role set, creates a Reciprocal Role sObject for the inverse role.

Before delete: Where there is an inverse Reciprocal Role sObject record, delete that record.

RollupByLookupConfig

Before insert: Validates each new RollupByLookupConfig object according to these rules:

- Cannot insert a duplicate RollupByLookupConfig object. Duplicate records are those that share the same combination of `ToObject__c`, `ToField__c`, and `LookupField__c`.
- Cannot exceed 40 active RollupByLookupConfig objects.
- The fields and lookups on the RollupByLookupConfig object must be valid.
- The Where Clause field must contain a correctly formatted SQL expression.

Before update: Performs the same actions as before insert.

Before delete: Validates that the RollupByLookupConfig object isn't active (active objects cannot be deleted).

RBLFilterCriteria

Before insert: Validates each new RBLFilterCriteria object according to these rules:

- A RBLFilterCriteria object cannot be inserted when its parent is active.
- The fields on the RBLFilterCriteria object must be valid.
- The Operator must be valid ('greater than', 'equals', 'greater than or equals to', 'contains', 'not equal to', 'less than', 'less than or equal to', 'not contains', 'not like', 'starts with', 'ends with', 'in').

Before update: Performs the same actions as before insert.

Before delete: Validates that the RBLFilterCriteria object's parent RollupByLookupConfig object isn't active (RBLFilterCriteria objects with an active parent RollupByLookupConfig object cannot be deleted).

 **Note:** Alerts and Securities sObjects don't have triggers.

Relation sObjects

 **Note:** Rollup calculation triggers are fired when Enable Rollup Summary is enabled in the Wealth Application Config custom setting. For more details, see [Temporarily Disable Rollups to Accelerate Data Loads](#).

AccountContactRelation (ACR)

Before insert: Populates `RecordTypeId` and `Date` for each ACR record to be inserted. Ensures that each ACR obeys the following requirements:

- No multiple primary members for a given household.
- Contact portion can't be a member of multiple households.
- No multiple ACR records with the same `AccountId` and `ContactId` combination.

After insert: Recalculates the rollups for all groups in which member or business ACRs have changed.

Before update: Performs the same actions as before insert.

After update: Performs the same actions as after insert.

Before delete: Ensures that none of the ACRs to be deleted are of the record type Group. Also recalculates rollups for all groups when any member or business ACRs have changed.

AccountAccountRelation (AAR)

After insert: If the auto-create inverse setting is selected, creates the inverse record.

Before update: Checks to see if records are being deactivated. If so, sets `EndDate__c` as the day of the update, and if the auto-create inverse setting is selected deactivates the inverse record.

Before delete: If the auto-create inverse setting is selected, delete the inverse record of the AAR.

ContactContactRelation (CCR)

After insert: If the auto-create inverse setting is selected, creates the inverse record.

Before update: If records are being deactivated, sets `EndDate__c` as today, and if the auto-create inverse setting is selected deactivates the inverse record.

Before delete: If the auto-create inverse setting is selected, deletes the inverse record of the CCR.

Rollup sObjects

Note: Rollup sObject triggers provide for updating `Household__c`, which points to the account portion of the group that they roll up to. Usually, the rollup calculation is also calculated.

Household triggers are fired when Enable Group Record Rollups is enabled in the Wealth Application Config custom setting. After the triggers are fired, any active rollup calculations are performed when Enable Rollup Summary is enabled in the Wealth Application Config. For more details, see [Temporarily Disable Rollups to Accelerate Data Loads](#).

Financial Account

Before insert: Sets the value of the owner type when a FinancialAccount record is updated. Then sets `Household__c` to the account portion of the group that it's rolling up to.

After insert:

- Creates a primary owner financial account role for the new financial account.
- If defined, creates joint owner roles and user-selected roles.
- Performs the rollup calculation.

Before update: Performs the same actions as before insert.

After update: Performs the same actions as before insert.

After delete: Performs the rollup calculation.

Financial Account Role (FAR)

Before insert: If `RelatedContact__c` of the FAR record is associated with an individual account, updates `RelatedAccount__c` to that of the individual account.

After insert: For FAR records of type Joint Owner, updates the Joint Owner field on the associated Financial Account record, then performs the rollup calculations.

Before update: Performs the same actions as before insert and, if the user has chosen to deactivate the FAR records, sets the end day to the current day.

After update: Performs the rollup calculations.

Before delete: Blocks the deletion of any FAR records of type Primary Owner. FAR records of type Primary Owner must be deleted from the associated Financial Account record. For FAR records of type Joint Owner, updates the Joint Owner field on the associated Financial Account record.

After delete: Performs the rollup calculations.

Assets and Liabilities

Before insert: Sets `Household__c` to the account portion of the group that it's rolling up to.

Before update: Performs the same action as before insert.

Financial Goals

Before insert: Sets `Household__c` of the FinancialGoal record to the account portion of the group that the financial goal is rolling up to.

Before update: Performs the same action as before insert.

Financial Holdings

Before insert: Retrieves financial account fields based on the FinancialHolding record and then populates `Household__c` and `PrimaryOwner` on the financial holding to be inserted.

Note: Financial holdings are not part of the rollup objects, so no rollup is performed.

Revenue

After insert: Performs the rollup calculations.

After update: Performs the rollup calculations.

After delete: Performs the rollup calculations.

Tasks

Before insert: Sets `Household__c` of the Task record to the account portion of the group that the task is rolling up to.

After insert: Updates the Next and Last interaction for each Contact that is associated with the task.

Before update: Performs the same action as before insert.

After update: Performs the same action as after insert.

After delete: Performs the same action as after insert.

Events

Before insert: Sets `Household__c` of the Event record to the account portion of the group that the event is rolling up to.

After insert: Updates the Next and Last interaction for each Contact that is associated to the event.

Before update: Performs the same action as before insert.

After update: Performs the same action as after insert.

After delete: Performs the same action as after insert.

Leads

After update: If not done, sets the converted lead contact as the primary contact on the account. The opportunity linked to the lead is updated with the mapped record type.

Opportunities

Before insert: Sets `Household__c` of the Opportunity record to the account portion of the group that the opportunity is rolling up to.

Before update: Performs the same action as before insert.

Insurance Policy

Before insert: Sets Household__c of the Insurance Policy record to the account portion of the household that the insurance policy is rolling up to.

Before update: Performs the same action as before insert.

Claim

Before insert: Sets Household__c of the Claim record to the account portion of the household that the claim is rolling up to.

Before update: Performs the same action as before insert.

FINANCIAL SERVICES CLOUD PLATFORM EVENT

Use platform events to connect business processes in Salesforce and external apps through the exchange of real-time event data. Platform events are secure and scalable messages that contain data. Publishers publish event messages that subscribers receive in real time. To customize the data published, define platform event fields.

SEE ALSO:

[Platform Events Developer Guide](#)

BatchJobStatusChangedEvent

Notifies subscribers of when a batch job is completed in a flow. This object is available in API version 51.0 and later.

Supported Calls

`describeSObjects()`

Supported Subscribers

Subscriber	Supported?
Flows	✓

Fields

Field	Details
BatchJob	Type string Description The unique identifier of the batch job.
BatchJobDefinition	Type string Properties Nillable Description The unique identifier of the batch job's definition.

Field	Details
EndTime	<p>Type dateTime</p> <p>Properties Nillable</p> <p>Description The timestamp for when the batch job execution is complete.</p>
ReplayId	<p>Type string</p> <p>Properties Nillable</p> <p>Description Represents an ID value that is populated by the system and refers to the position of the event in the event stream. Replay ID values aren't guaranteed to be contiguous for consecutive events. A subscriber can store a replay ID value and use it on resubscription to retrieve missed events that are within the retention window.</p>
StartTime	<p>Type dateTime</p> <p>Properties Nillable</p> <p>Description The timestamp for when the batch job execution is started.</p>
Status	<p>Type picklist</p> <p>Properties Restricted picklist</p> <p>Description The status of the batch job. Possible values are:</p> <ul style="list-style-type: none">• Cancelled—Canceled• Failure• Success

DATA PROCESSING ENGINE AND MONITOR WORKFLOW SERVICES

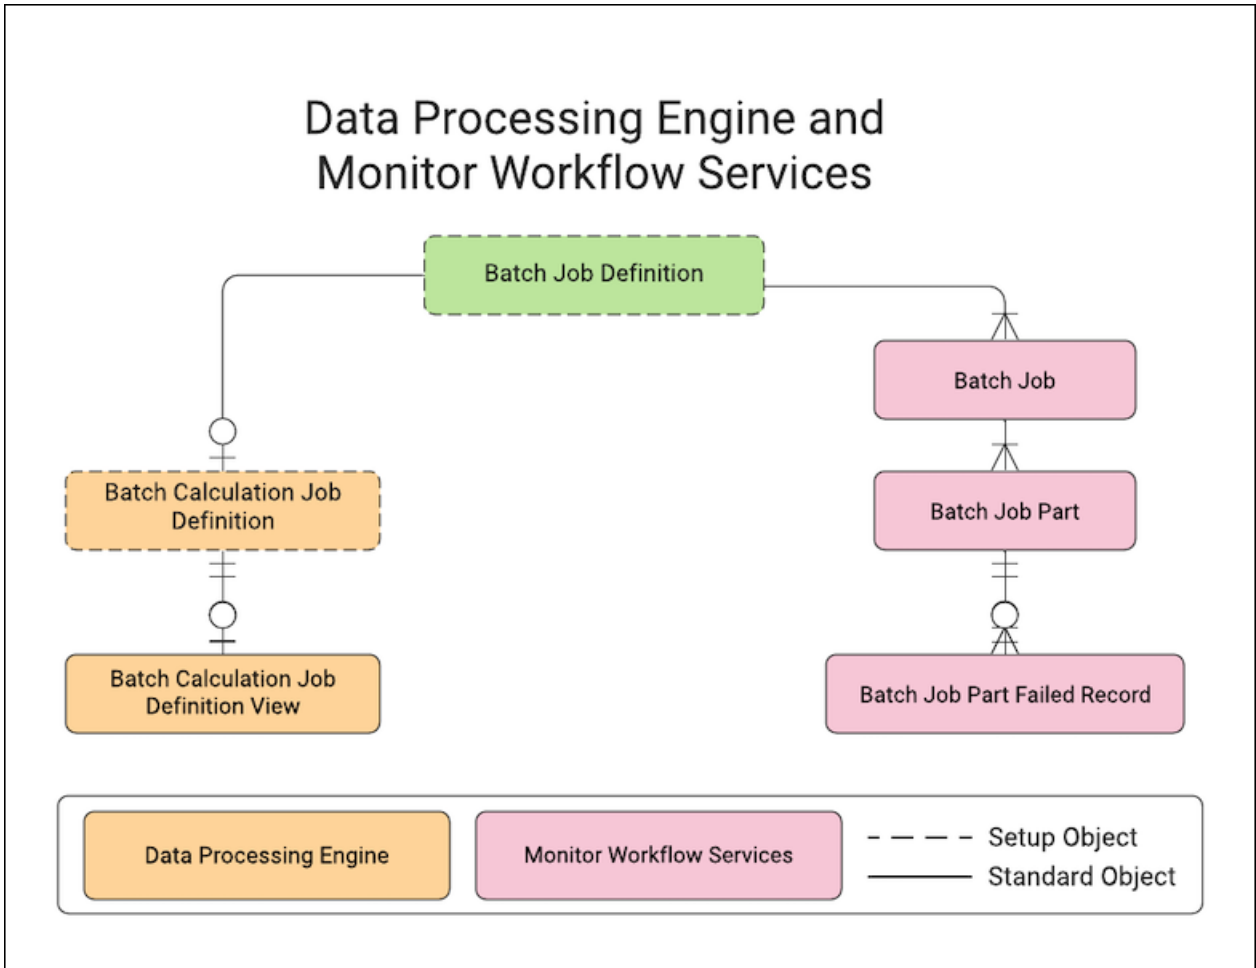

Data Processing Engine helps you transform data that's available in your Salesforce org and write back the transformation results as new or updated records. You can transform the data for standard and custom objects using Data Processing Engine definitions. After you activate a Data Processing Engine definition, you can run it. Each run can be tracked using Monitor Workflow Services.

Here's the data model for Data Processing Engine and Monitor Workflow Services:

EDITIONS

Available in: Lightning Experience

Available in: Data Processing Engine is available with Enterprise, Unlimited, and Performance Editions with the Financial Services Cloud, Loyalty Management, or Rebate Management

Here is the list of developer resources you can use for Data Processing Engine:
