Education Cloud Developer Guide

Version 58.0, Summer '23

CONTENTS

Contents

CHAPTER 1   Introduction to Education Cloud

Use Education Cloud to support the entire learner experience, including managing applications, scheduling, courses, facilities, and more.

Education Cloud draws on the power of Salesforce to connect insights across recruitment, admissions, and student success for a unified view of every learner's journey. With Salesforce at the center of your institution's information technology solution, important tasks can be completed in less time, at scale, and in collaboration between departments. A single source of truth creates a complete student profile, so your institution can offer personalized experiences that translate into successful lifetime learners — from prospective student to engaged alum.

CHAPTER 2   Release Notes

View the latest features from Education Cloud.

Education Cloud Release Notes

CHAPTER 3   Education Cloud Data Model Overview

Learn about the objects and relationships within the Education
Cloud data model.

View entity relationship diagrams from Education Cloud on the
Salesforce Architects site to understand associations between the
objects:

- Education Cloud Data Model Overview
- Education Cloud Recruitment and Admissions Data Model
- Education Cloud Student Success Data Model
- Education Cloud Appointment Scheduling Data Model

CHAPTER 4 Education Cloud Standard Objects

This section lists standard objects available for use with Education Cloud.

Some fields may not be listed for some objects. To verify the complete list of fields for an object, you can use a describe call from the API, or inspect with an appropriate tool, for example, inspecting the WSDL or using a schema viewer.

EDITIONS

Available in: Lightning Experience
in **Performance**, **Enterprise**, **Developer**,
and **Unlimited** editions that have Education Cloud enabled.

AcademicSession

Records course offering period. Specifies time periods based on an institution's calendar whether that is semesters, quarters, trimesters, or other terms. This object is available in API version 57.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AcademicTermId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The Academic Term associated with the Academic Session. This field is a relationship field. **Relationship Name** AcademicTerm **Relationship Type** Lookup **Refers To** AcademicTerm
AddDropDeadline	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The last date when a student can add or drop a course, without a record of registration on their academic period.
AuditDueDate	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The last date for a student to audit a course and take it without seeking a grade or credit.

Field	Details
ClassEndDate	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The date when classes end for the Academic Session.
ClassStartDate	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The date when classes start for the Academic Session.
CourseWithdrawDeadline	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The date when withdraw from a course is recorded on the student's academic record.
Description	**Type** textarea **Properties** Create, Nillable, Update **Description** The description of the Academic Session.
ExamEndDate	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The date when exams for the Academic Session end.
ExamStartDate	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The date when exams for the Academic Session start.

Field	Details
IsActive	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the Academic Session is active (true) or not (false). The default value is `false`.
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.

Field	Details
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** The name for this record.
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User
ResultAvailabilityDate	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The date when the result of the course offering is announced.
ResultDueDate	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The last date to submit the result of a course offering, such as grades.
Season	**Type** restricted picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Specifies the season related to the Academic Session.

Field	Details
	Possible values are:

Possible values are:

- `Fall`
- `Spring`
- `Summer`
- `Winter`

Type	**Type**

`Type`

Type
picklist

Properties
Create, Filter, Group, Restricted picklist, Nillable, Sort, Update

Description
Specifies the type of Academic Session.

Possible values are:

- `First Semester`
- `MiniTerm`
- `Others`
- `Quarter`
- `Second Semester`
- `Semester`
- `Term 1`
- `Term 2`
- `Term 3`
- `Term 4`
- `Trimester`

AcademicTerm

Defines an academic period which may hold other more defined time periods within it to create a specific time for reporting and offerings. This object is available in API version 57.0 and later.

Supported Calls

`create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()`

Fields

Field	Details
AcademicYearId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The academic year that's associated with the Academic Term. This field is a relationship field. **Relationship Name** AcademicYear **Relationship Type** Lookup **Refers To** AcademicYear
Description	**Type** textarea **Properties** Create, Nillable, Update **Description** The description of the Academic Term.
EndDate	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The date when the Academic Term ends.
IsActive	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the Academic Term is active (true) or not (false). The default value is `false`.
IsLocked	**Type** boolean

Field	Details
	Properties
	Defaulted on create, Filter, Group, Sort, Update
	Description
	Indicates whether the record is locked (true) or not (false).
	The default value is `false`.
LastReferencedDate	**Type**
	dateTime
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type**
	dateTime
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LateRegistrationDate	**Type**
	dateTime
	Properties
	Create, Filter, Nillable, Sort, Update
	Description
	The date from when the applications are considered as late submissions.
MayEdit	**Type**
	boolean
	Properties
	Defaulted on create, Filter, Group, Sort
	Description
	Indicates whether the record can be edited (true) or not (false).
	The default value is `false`.
Name	**Type**
	string

Field	Details
	Properties Create, Filter, Group, idLookup, Sort, Update **Description** The name for this record.
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User
RegistrationCloseDate	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The last date for the students to register for the Academic Term.
RegistrationOpenDate	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The date from when the students can begin to register for the Academic Term.
Season	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Specifies the season related to the Academic Term. Possible values are: • Fall

Field	Details
	• Spring • Summer • Winter
StartDate	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** The date when the Academic Term starts.

AcademicTermEnrollment

Represents information about a student's enrollment in an Academic Term. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
AcademicTermId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The Academic Term associated with the Academic Term Enrollment. This field is a relationship field. **Relationship Name** AcademicTerm **Relationship Type** Lookup **Refers To** AcademicTerm
EnrollmentDate	**Type** date

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update **Description** The date that the student enrolled in the Academic Term.
EnrollmentReason	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** The reason the student enrolled in the Academic Term. Possible values are: • Continuing • First Time • Re-admit • Transfer in
EnrollmentStatus	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Specifies the status of a student's enrollment in the Academic Term. Possible values are: • Active • Dropout • Expelled • Graduated • No show • Other • Transferred • Withdrawn
ExitDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date when the student left the institution.

Field	Details
ExitReason	**Type**
	string
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The reason that the student left the institution.
HoursAttempted	**Type**
	int
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The number of credit hours or contact hours attempted by a student during the Academic Term.
IsLocked	**Type**
	boolean
	Properties
	Defaulted on create, Filter, Group, Sort, Update
	Description
	Indicates whether the record is locked (true) or not (false).
	The default value is `false`.
LastReferencedDate	**Type**
	dateTime
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type**
	dateTime
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LearnerAccountId	**Type**
	reference

Field	Details
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The Account of the person associated with the Academic Term Enrollment.
	This field is a relationship field.
	Relationship Name
	LearnerAccount
	Relationship Type
	Lookup
	Refers To
	Account
LearnerContactId	**Type**
	reference
	Properties
	Create, Filter, Group, Sort, Update
	Description
	The Contact person associated with the Academic Term Enrollment.
	This field is a relationship field.
	Relationship Name
	LearnerContact
	Relationship Type
	Lookup
	Refers To
	Contact
MayEdit	**Type**
	boolean
	Properties
	Defaulted on create, Filter, Group, Sort
	Description
	Indicates whether the record can be edited (true) or not (false).
	The default value is `false`.
Name	**Type**
	string
	Properties
	Autonumber, Defaulted on create, Filter, idLookup, Sort
	Description
	The name for this record.

Field	Details
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User
StudentAcademicLevel	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Specifies the student's applicable point in the education process. Possible values are: - Adult Education - Doctoral - Elementary - Graduate - High School - Middle School - Post-Baccalaureate Certificate - Pre-K/Preschool - Professional Education - Undergraduate
StudyYearClassification	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Specifies the student's year of study classification. Possible values are:

Field	Details
	• `Freshman` • `Junior` • `Senior` • `Sophomore`
`TermGradePointAverage`	**Type** string **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The student's cumulative grade point average for the Academic Term.

AcademicYear

Defines an academic year period. This object is available in API version 57.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
`Description`	**Type** textarea **Properties** Create, Nillable, Update **Description** The description of the Academic Year.
`IsLocked`	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.

Field	Details
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** The name for this record.
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner

Field	Details
	Relationship Type Lookup **Refers To** Group, User
Year	**Type** string **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the Academic Year.

ApplicationDecision

Represents information about the academic standing of an applicant. This object is available in API version 57.0 and later.

Supported Calls

`create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()`

Fields

Field	Details
ApplicantDecision	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Specifies the applicant's decision. Possible values are: • Accept • Decline • Defer • Withdraw
ApplicationDecision	**Type** picklist

Field	Details
	Properties Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Specifies the decision on the application. Possible values are: • `Admit` • `Cancelled` • `Deny` • `Enroll` • `Waitlist`
`ApplicationId`	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** The application for which the decision is announced. This field is a relationship field. **Relationship Name** Application **Relationship Type** Lookup **Refers To** IndividualApplication
`Comment`	**Type** textarea **Properties** Create, Nillable, Update **Description** The information about the decision provided on the application.
`DecisionAuthorityId`	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Identifier for the decision authority person. **Relationship Name** DecisionAuthority

Field	Details
	Relationship Type Lookup
	Refers To User
IsLocked	**Type** boolean
	Properties Defaulted on create, Filter, Group, Sort, Update
	Description Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime
	Properties Filter, Nillable, Sort
	Description The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime
	Properties Filter, Nillable, Sort
	Description The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type** boolean
	Properties Defaulted on create, Filter, Group, Sort
	Description Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string

Field	Details
	Properties Autonumber, Defaulted on create, Filter, idLookup, Sort
	Description The name for this record.
OwnerId	**Type** reference
	Properties Create, Defaulted on create, Filter, Group, Sort, Update
	Description The user who owns this record. This field is a polymorphic relationship field.
	Relationship Name Owner
	Relationship Type Lookup
	Refers To Group, User
PreliminaryApplicationRefId	**Type** reference
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description Identifier for the preliminary application reference.
	Relationship Name PreliminaryApplicationRef
	Relationship Type Lookup
	Refers To PreliminaryApplicationRef

ApplicationRecommendation

Represents information about the recommendation for an individual application. This object is available in API version 57.0 and later.

Supported Calls

```
create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(),
retrieve(), search(), undelete(), update(), upsert()
```

Fields

Field	Details
ApplicationRecommenderId	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** The contact associated with the recommendation as the recommender. This field is a relationship field. **Relationship Name** ApplicationRecommender **Relationship Type** Lookup **Refers To** ApplicationRecommender
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.

Field	Details
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** The name for this record.
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User
Recommendation	**Type** textarea **Properties** Create, Nillable, Update **Description** The content submitted as the recommendation.

ApplicationRecommender

Represents a junction between an individual application and the recommender of the application. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
ApplicationId	**Type** reference **Properties** Create, Filter, Group, Sort **Description** The individual application that's associated with the recommender. This field is a relationship field. **Relationship Name** Application **Relationship Type** Lookup **Refers To** IndividualApplication
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record is locked (true) or not (false). The default value is false.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort

Field	Details
	Description The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** The name for this record.
RecommendationStatus	**Type** picklist **Properties** Create, Filter, Restricted picklist, Group, Sort, Update **Description** Specifies the status of the recommendation. Possible values are: • `Requested` • `Submitted`
RecommenderId	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** The contact associated with the application as a recommender. This field is a relationship field. **Relationship Name** Recommender **Relationship Type** Lookup

Field	Details
	Refers To Contact
SubmittedDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the date on which the recommendation was submitted.

ApplicationReview

Represents a review performed against the specified application. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
AcademicTerm	**Type** string **Properties** Filter, Group, Nillable, Sort **Description** Specifies the academic term associated with the application.
ApplicationCategory	**Type** picklist **Properties** Filter, Group, Nillable, Sort **Description** Specifies the category of the application based on the admission decision period. Possible values are: • Early Decision • Regular Decision

Field	Details
ApplicationId	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** The application that is in review. This field is a relationship field. **Relationship Name** Application **Relationship Type** Lookup **Refers To** IndividualApplication
ApplicationRecommendation	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Specifies the recommendation provided by the reviewer for the application into the institution. Possible values are: • Admit • Admit with Conditions • Deny • Pending
AssignedDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the date on which the application is assigned for review.
Comment	**Type** textarea **Properties** Create, Nillable, Update **Description** The information added by the reviewer about the application that's in review.

Field	Details
Condition	**Type** textarea **Properties** Create, Nillable, Update **Description** The condition that's applicable to an applicant.
DueDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The last date by which the application review should be completed.
EndDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date when the application review was completed.
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort

Field	Details
	Description
	The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type**
	boolean
	Properties
	Defaulted on create, Filter, Group, Sort
	Description
	Indicates whether the record can be edited (true) or not (false).
	The default value is `false`.
Name	**Type**
	string
	Properties
	Autonumber, Defaulted on create, Filter, idLookup, Sort
	Description
	The name for this record.
OwnerId	**Type**
	reference
	Properties
	Create, Defaulted on create, Filter, Group, Sort, Update
	Description
	The user who owns this record.
	This field is a polymorphic relationship field.
	Relationship Name
	Owner
	Relationship Type
	Lookup
	Refers To
	Group, User
ReviewedById	**Type**
	reference
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	Identifier of the reviewer of the application.

Field	Details
	Relationship Name Owner **Relationship Type** Lookup **Refers To** User
StartDate	**Type** dateTime **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date when the application review started.
Status	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Specifies the status of the application review. Possible values are: • Cancelled • Completed • In Progress • Not Started
SubmissionDate	**Type** dateTime **Properties** Filter, Group, Nillable, Sort, **Description** The date when the applicant submitted the application.

ApplicationTimeline

Represents the milestone dates in the application process. This object is available in API version 57.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
ApplicationCloseDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The last date when domestic applicants can apply for admission.
ApplicationOpenDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date when applicants can start to apply for admission.
DecisionReleaseDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date when the application decision is announced.
EarlyActionCloseDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The last date when applicants can apply for early action admission.
EarlyActionOpenDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date when applicants can start to apply for early action admission.

Field	Details
EarlyApplicationCloseDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The last date when applicants can apply early for admission.
EarlyApplicationOpenDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date when applicants can start to apply early for admission.
EarlyApplnDecisionRelDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date when the application decision for early applicants is announced.
GraduationApplnDeadline	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The last date for the students to apply for graduation.
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort

Field	Details
	Description The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** The name for this record.
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User

Field	Details
Type	**Type** picklist **Properties** Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update **Description** Specifies the type of application timeline. Possible values are: • Admissions

ConstituentRole

Contains information about roles associated with the individual. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
ContextRecordId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The record of the context that's associated with the constituent. This field is a relationship field. **Relationship Name** ContextRecord **Relationship Type** Lookup **Refers To** Learning
Description	**Type** string **Properties** Create, Filter, Group, Nillable, Sort, Update

Field	Details
	Description The short description of the constituent's role in the system.
EffectiveEndDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date from when the constituent role becomes inactive.
EffectiveStartDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date from when the constituent role becomes active.
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.

Field	Details
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Autonumber, Defaulted on create, Filter, idLookup, Sort **Description** The name for this record.
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User
PersonId	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** The individual associated with the constituent role. This field is a polymorphic relationship field. **Relationship Name** Person **Relationship Type** Lookup

Field	Details
	Refers To
	Account, Contact, Individual
RoleType	**Type**
	picklist
	Properties
	Create, Filter, Restricted picklist, Group, Sort, Update
	Description
	Specifies the type of constituent role.
	Possible values are:
	• Alumni
	• Applicant
	• Donor
	• Faculty
	• Parent
	• Prospect
	• Staff
	• Student
	• Suspect
Status	**Type**
	picklist
	Properties
	Create, Filter, Restricted picklist, Group, Sort, Update
	Description
	The status of the constituent role.
	Possible values are:
	• Active
	• Admitted
	• Current
	• Enrolled
	• Former

ContactProfile

Represents information about an individual, such as their ethnicity, citizenship, birth place, race, and so on. This object is available in API version 57.0 and later.

Supported Calls

`create(),delete(),describeLayout(),describeSObjects(),getDeleted(),getUpdated(),query(),`
`retrieve(),search(),undelete(),update(),upsert()`

Fields

Field	Details
BirthCountryId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The individual's country of birth. This field is a relationship field. **Relationship Name** BirthCountry **Relationship Type** Lookup **Refers To** GeoCountry
BirthPlace	**Type** string **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The individual's place of birth.
ContactId	**Type** reference **Properties** Create, Filter, Group, Sort **Description** The contact associated with the contact profile record. This field is a relationship field. **Relationship Name** Contact **Relationship Type** Lookup **Refers To** Contact

Field	Details
Ethnicity	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the ethnicity of the individual. Possible values are: • `Hispanic or Latino` • `Not Hispanic or Latino` • `Not Selected`
HighestEducationLevel	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the highest educational qualification of the individual Possible values are: • `Graduate` • `High School` • `Masters` • `Other` • `PhD`
IsFirstGenerationStudent	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the individual is the first generation to enroll in education beyond high school. The default value is `false`.
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.

Field	Details
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
MilitaryBranch	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the military branch if the individual has ever enlisted in the military. Possible values are: • `Air Force` • `Army` • `Coast Guard` • `Marine Corps` • `Navy` • `Other` • `Space Force`

Field	Details
MilitaryService	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the current status of military service. Possible values are: • `Active Duty` • `Active Reserve` • `Full time` • `Other` • `Part time` • `Retired` • `Unknown` • `Veteran`
Name	**Type** string **Properties** Autonumber, Defaulted on create, Filter, idLookup, Sort **Description** The name for this record.
PrimaryCitizenshipId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The primary citizenship held by the individual. This field is a relationship field. **Relationship Name** PrimaryCitizenship **Relationship Type** Lookup **Refers To** GeoCountry
PrimaryCitizenshipType	**Type** picklist

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the type of primary citizenship held by the individual. Possible values are: • `Asylum` • `National` • `Other` • `Refugee`
Race	**Type** multipicklist **Properties** Create, Filter, Nillable, Update **Description** Specifies the race of the individual. Possible values are: • `Alaska Native` • `American Indian` • `Asian` • `Black or African American` • `Native Hawaiian or Other Pacific Islander` • `White`
SecondaryCitizenshipId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The secondary citizenship of the individual if they hold dual citizenship. This field is a relationship field. **Relationship Name** SecondaryCitizenship **Relationship Type** Lookup **Refers To** GeoCountry
SecondaryCitizenshipType	**Type** picklist

Field	Details
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	Specifies the type of secondary citizenship held by the individual.
	Possible values are:
	• `Asylum`
	• `National`
	• `Other`
	• `Refugee`

CourseOfferingParticipant

Represents information about a student's enrollment in a Course Offering. This object is available in API version 57.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
`AcademicTermEnrollmentId`	**Type**
	reference
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The Academic Term associated with the Course Offering Participant.
	This field is a relationship field.
	Relationship Name
	AcademicTermEnrollment
	Relationship Type
	Lookup
	Refers To
	AcademicTermEnrollment
`CourseOfferingId`	**Type**
	reference

Field	Details
	Properties Create, Filter, Group, Sort, Update
	Description The Course Offering associated with the Course Offering Participant. This field is a relationship field.
	Relationship Name CourseOffering
	Relationship Type Lookup
	Refers To CourseOffering
EndDate	**Type** date
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description The date when the participant's involvement in the course ended.
IsLocked	**Type** boolean
	Properties Defaulted on create, Filter, Group, Sort, Update
	Description Indicates whether the record is locked (true) or not (false). The default value is `false`.
IsRepeatAttempt	**Type** boolean
	Properties Create, Defaulted on create, Filter, Group, Sort, Update
	Description Indicates whether the participant has previously taken the course (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime
	Properties Filter, Nillable, Sort

Field	Details
	Description The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Autonumber, Defaulted on create, Filter, idLookup, Sort **Description** The name for this record.
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User

Field	Details
ParticipantAccountId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The Account associated with the Course Offering Participant. This field is a relationship field. **Relationship Name** ParticipantAccount **Relationship Type** Lookup **Refers To** Account
ParticipantAffiliation	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** The participant's role in the course. Possible values are: • `Aide` • `Student` • `Teacher`
ParticipantContactId	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** The Contact record associated with the Course Offering Participant. This field is a relationship field. **Relationship Name** ParticipantContact **Relationship Type** Lookup **Refers To** Contact

Field	Details
ParticipationStatus	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Specifies the participation status of the participant in the course. Possible values are: • Audit • Completed • Enrolled • Facilitating • Failed • On Hold • Transfer Credit • Waitlisted • Withdrew
StartDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date when the participant's involvement in the course began.

CourseOfferingPtcpResult

Represents the outcome of a student's participation in a course. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(),
retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
CourseOfferingParticipantId	**Type** reference

Field	Details
	Properties Create, Filter, Group, Sort, Update **Description** The Course Offering Participant associated with the Course Offering Participant Result. This field is a relationship field. **Relationship Name** CourseOfferingParticipant **Relationship Type** Lookup **Refers To** CourseOfferingParticipant
DurationUnit	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** The unit of measurement for completion of the course. Possible values are: • Clock Hours • Continuing Education Units • Credit Hours • No Credit • Other
EvaluatorContactId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The Contact that assigns the result associated with the Course Offering Participant Result. This field is a relationship field. **Relationship Name** EvaluatorContact **Relationship Type** Lookup **Refers To** Contact

Field	Details
IsLocked	**Type**
	boolean
	Properties
	Defaulted on create, Filter, Group, Sort
	Description
	Indicates whether the record is locked (true) or not (false).
	The default value is `false`.
LastReferencedDate	**Type**
	dateTime
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type**
	dateTime
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LetterGrade	**Type**
	string
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The letter grade awarded to the participant for completing the course.
MayEdit	**Type**
	boolean
	Properties
	Defaulted on create, Filter, Group, Sort
	Description
	Indicates whether the record can be edited (true) or not (false).
	The default value is `false`.

Field	Details
Name	**Type** string **Properties** Autonumber, Defaulted on create, Filter, idLookup, Sort **Description** Course Offering Participant Result auto-generated name.
NumericGrade	**Type** double **Properties** Create, Filter, Nillable, Sort, Update **Description** The value that's assigned to a Letter Grade.
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User
ParticipantResultStatus	**Type** picklist **Properties** Create, Filter, Group, Nillable, Restricted picklist, Sort, Update **Description** Specifies the type or status of the participant's result. For example, Pass or Fail. Possible values are: • `Fail` • `Incomplete` • `Pass` • `Withdraw`

Field	Details
UnitsEarned	**Type** double **Properties** Create, Filter, Nillable, Sort, Update **Description** Units of value awarded for completing the course.

CourseOfferingSchedule

Represents information about the schedule defined for a Course Offering. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
CourseOfferingId	**Type** reference **Properties** Create, Filter, Group, Sort **Description** The Course Offering that's associated with the Course Offering Schedule. This field is a relationship field. **Relationship Name** CourseOffering **Relationship Type** Lookup **Refers To** CourseOffering
CourseOfferingScheduleTmplId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update

Field	Details
	Description The Course Offering Schedule Template associated with the Course Offering Schedule. If a Course Offering Schedule Template is specified, the `StartTime`, `EndTime` and `Days` from the Course Offering Schedule Template are used. This field is a relationship field. **Relationship Name** CourseOfferingScheduleTmpl **Relationship Type** Lookup **Refers To** CourseOfferingScheduleTmpl
Description	**Type** string **Properties** Create, Filter, Group, Sort, Update **Description** The description of the Course Offering Schedule Template.
EndTime	**Type** time **Properties** Create, Filter, Nillable, Sort, Update **Description** The time of day when the Course Offering meeting ends.
IsFriday	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates that the Course Offering occurs on Friday. The default value is `false`.
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.

Field	Details
IsMonday	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates that the Course Offering occurs on Monday. The default value is `false`.
IsSaturday	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates that the Course Offering occurs on Saturday. The default value is `false`.
IsSunday	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates that the Course Offering occurs on Sunday. The default value is `false`.
IsThursday	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates that the Course Offering occurs on Thursday. The default value is `false`.
IsTuesday	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates that the Course Offering occurs on Tuesday. The default value is `false`.

Field	Details
IsWednesday	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates that the Course Offering occurs on Wednesday. The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LocationId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The education facility Location that's associated with the Course Offering Schedule. This field is a relationship field. **Relationship Name** Location **Relationship Type** Lookup **Refers To** Location
MayEdit	**Type** boolean

Field	Details
	Properties
	Defaulted on create, Filter, Group, Sort
	Description
	Indicates whether the record can be edited (true) or not (false).
	The default value is `false`.
Name	**Type**
	string
	Properties
	Autonumber, Defaulted on create, Filter, idLookup, Sort
	Description
	The name for this record.
StartTime	**Type**
	time
	Properties
	Create, Filter, Nillable, Sort, Update
	Description
	The time of day when the Course Offering meeting starts.

CourseOfferingScheduleTmpl

Represents a template that can be used to define a course schedule. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
Description	**Type**
	textarea
	Properties
	Create, Update
	Description
	The description of the Course Offering Schedule Template.

Field	Details
EndTime	**Type** time **Properties** Create, Filter, Sort, Update **Description** The time of day when the Course Offering meeting ends.
IsFriday	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates that the Course Offering occurs on Friday. The default value is `false`.
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
IsMonday	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates that the Course Offering occurs on Monday. The default value is `false`.
IsSaturday	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates that the Course Offering occurs on Saturday. The default value is `false`.
IsSunday	**Type** boolean

Field	Details
	Properties Create, Defaulted on create, Filter, Group, Sort, Update
	Description Indicates that the Course Offering occurs on Sunday. The default value is `false`.
IsThursday	**Type** boolean
	Properties Create, Defaulted on create, Filter, Group, Sort, Update
	Description Indicates that the Course Offering occurs on Thursday. The default value is `false`.
IsTuesday	**Type** boolean
	Properties Create, Defaulted on create, Filter, Group, Sort, Update
	Description Indicates that the Course Offering occurs on Tuesday. The default value is `false`.
IsWednesday	**Type** boolean
	Properties Create, Defaulted on create, Filter, Group, Sort, Update
	Description Indicates that the Course Offering occurs on Wednesday. The default value is `false`.
LastReferencedDate	**Type** dateTime
	Properties Filter, Nillable, Sort
	Description The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime

Field	Details
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type**
	boolean
	Properties
	Defaulted on create, Filter, Group, Sort
	Description
	Indicates whether the record can be edited (true) or not (false).
	The default value is `false`.
Name	**Type**
	string
	Properties
	Create, Filter, Group, idLookup, Sort, Update
	Description
	The name for this record.
OwnerId	**Type**
	reference
	Properties
	Create, Defaulted on create, Filter, Group, Sort, Update
	Description
	The user who owns this record.
	This field is a polymorphic relationship field.
	Relationship Name
	Owner
	Relationship Type
	Lookup
	Refers To
	Group, User
StartTime	**Type**
	time
	Properties
	Create, Filter, Sort, Update

Field	Details
	Description
	The time of day when the Course Offering meeting starts.

EducationalInfoRequest

Represents details about a request for information (RFI) raised by prospective students, parents, or counselors. This object is available in API version 57.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AcademicDurationId	**Type**
	reference
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The academic term or academic year that's associated with the Educational Information Request.
	This field is a polymorphic relationship field.
	Relationship Name
	AcademicDuration
	Relationship Type
	Lookup
	Refers To
	AcademicTerm, AcademicYear
CaseId	**Type**
	reference
	Properties
	Create, Filter, Group, Sort
	Description
	The case that's associated with the request for information.
	This field is a relationship field.

Field	Details
	Relationship Name Case **Relationship Type** Lookup **Refers To** Case
Category	**Type** picklist **Properties** Create, Filter, Restricted picklist, Group, Sort, Update **Description** Specifies the category for which the Request for Information is raised. Possible values are: • Academic • Admission • Financial Aid
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is false.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort

Field	Details
	Description
	The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LearningId	**Type**
	reference
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The learning that's associated with the request for information.
	This field is a relationship field.
	Relationship Name
	Learning
	Relationship Type
	Lookup
	Refers To
	Learning
MayEdit	**Type**
	boolean
	Properties
	Defaulted on create, Filter, Group, Sort
	Description
	Indicates whether the record can be edited (true) or not (false).
	The default value is `false`.
Name	**Type**
	string
	Properties
	Create, Filter, Group, idLookup, Sort, Update
	Description
	The name for this record.
RequesterId	**Type**
	reference
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The account of the person associated with the request for information.
	This field is a relationship field.

Field	Details
	Relationship Name
	Requester
	Relationship Type
	Lookup
	Refers To
	Account
SubCategory	**Type**
	picklist
	Properties
	Create, Filter, Group, Restricted picklist, Nillable, Sort, Update
	Description
	Specifies the sub-category for which the Request for Information is raised.
	Possible values are:
	• Application Process
	• Housing
	• Program Info
	• Scholarship
	• Tuition Fee

IndividualApplication

Represents information about the preferences of an applicant during program enrollment. This object is available in API version 57.0 and later.

Supported Calls

`create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()`

Fields

Field	Details
AcademicTerm	**Type**
	string
	Properties
	Filter, Group, Nillable, Sort
	Description
	The academic term associated with the application

Field	Details
ApplicantEmail	**Type** email **Properties** Filter, Group, Nillable, Sort **Description** The email address of the applicant.
ApplicantPhone	**Type** phone **Properties** Filter, Group, Nillable, Sort **Description** The phone number of the applicant.
ApplicationCategory	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Categorizes the ways an application can be processed. Possible values are: • `Early Decision` • `Regular Decision`
ApplicationType	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The type of the application. Possible values are: • `Graduate` • `International` • `Transfer` • `Undergraduate`
Category	**Type** picklist **Properties** Create, Filter, Group, Sort, Update

Field	Details
	Description
	The service category of the application.
	Possible values are:
	• `Education`
ContactId	**Type**
	reference
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The contact person associated with the application.
	This field is a relationship field.
	Relationship Name
	Contact
	Relationship Type
	Lookup
	Refers To
	Contact
DecisionReleaseDate	**Type**
	date
	Properties
	Filter, Group, Nillable, Sort
	Description
	The date when the application decision is announced.
DueDate	**Type**
	date
	Properties
	Filter, Group, Nillable, Sort
	Description
	The last date when applicants can apply for admission.
LearningProgram	**Type**
	reference
	Properties
	Create, Filter, Group, Sort
	Description
	The Learning Program associated with the Individual Application.
	This field is a relationship field.

Field	Details
	Relationship Name
	LearningProgram
	Relationship Type
	Lookup
	Refers To
	LearningProgram
ProgramTermApplnTimelineId	**Type**
	reference
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The application timeline of the program term associated with the application.
	This field is a relationship field.
	Relationship Name
	ProgramTermApplnTimeline
	Relationship Type
	Lookup
	Refers To
	ProgramTermApplnTimeline
Status	**Type**
	picklist
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	he submission and approval status of the application.
	Possible values are:
	• Application Decision
	• Canceled
	• In Review
	• Processing
	• Ready For Decision
	• Denied

For more information, see IndividualApplication in Public Sector Solutions.

LearnerProgram

Represents details of a Learning Program Plan that's created for a learner. This object is available in API version 57.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Description	**Type** textarea **Properties** Create, Nillable, Update **Description** Description of the Learner Program.
EndDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date that the learner exited the program.
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.

Field	Details
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LearnerAccountId	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** The Account associated with the learner that the Learning Program Plan is assigned to. This field is a relationship field. **Relationship Name** LearnerAccount **Relationship Type** Lookup **Refers To** Account
LearnerContactId	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** The Contact record for the learner that the Learning Program Plan is assigned to. This field is a relationship field. **Relationship Name** LearnerContact **Relationship Type** Lookup **Refers To** Contact
LearningProgramPlanId	**Type** reference **Properties** Create, Filter, Group, Sort, Update

Field	Details
	Description Learning Program Plan that's associated with the Learner Program. This field is a relationship field. **Relationship Name** LearningProgramPlan **Relationship Type** Lookup **Refers To** LearningProgramPlan
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** Name of a Learning Program Plan for an individual learner.
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User
StartDate	**Type** date

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description The date that the learner began the program.
Status	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Status of the learner's participation in the program. Possible values are: • `Abandoned` • `Active` • `Completed` • `Not Started` • `Paused`

LearnerProgramRequirement

Represents details of the requirement that a learner is required to complete in their assigned Learning Program Plan. This object is available in API version 57.0 and later.

Supported Calls

`create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()`

Fields

Field	Details
Description	**Type** textarea **Properties** Create, Nillable, Update **Description** Description of a Learner Program Requirement.

Field	Details
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LearnerProgramId	**Type** reference **Properties** Create, Filter, Group, Sort **Description** Learning Program Plan assigned to a learner. This field is a relationship field. **Relationship Name** LearnerProgram **Relationship Type** Lookup **Refers To** LearnerProgram
LearningProgramPlanRqmtId	**Type** reference

Field	Details
	Properties Create, Filter, Group, Sort, Update **Description** The Learning Program Plan associated with the Learner Program Requirement. This field is a relationship field. **Relationship Name** LearningProgramPlanRqmt **Relationship Type** Lookup **Refers To** LearningProgramPlanRqmt
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** Name of the Learning Program Requirement that's assigned to an individual.
Status	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Status of the learner's progress towards meeting the requirement. Possible values are: • `Active` • `Completed` • `Exempt`

LearnerProgramRqmtProgress

Represents information about the progress of a requirement that a learner is required to complete as a part of the assigned program plan. This object is available in API version 57.0 and later.

Supported Calls

`create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()`

Fields

Field	Details
Description	**Type** textarea **Properties** Create, Nillable, Update **Description** The description of the Learning Program Requirement Progress.
Duration	**Type** double **Properties** Create, Filter, Nillable, Sort, Update **Description** The allocated length of time for completion of the Requirement.
DurationUnit	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** The unit of measurement for length of time for the completion of the Requirement. Example values include Credit Hour, Contact Hour, Hours, Weeks, Quarters, Semesters, and Years. Possible values are: • `Clock Hours` • `Continuing Education Units` • `Credit Hours` • `No Credit` • `Other`

Field	Details
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LearnerProgramRequirementId	**Type** reference **Properties** Create, Filter, Group, Sort **Description** The Learner Program Requirement associated with this Learner Program Requirement Progress. This field is a relationship field. **Relationship Name** LearnerProgramRequirement **Relationship Type** Lookup **Refers To** LearnerProgramRequirement

Field	Details
LearningOutcomeItemId	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** The Learning Outcome Item used to fulfill the requirement. This field is a relationship field. **Relationship Name** LearningOutcomeItem **Relationship Type** Lookup **Refers To** LearningOutcomeItem
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** The name of the Learning Program Requirement Progress that tracks the completion of a requirement.

Learning

Represents information that defines a training that can be made available as a course, program, or on-site experience, for a contact. This object is available in API version 57.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AcademicLevel	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** The applicable point in the education process. Possible values are: • Adult Education • Doctoral • Elementary • Graduate • High School • Middle School • Post-Baccalaureate Certificate • Pre-K/Preschool • Professional Education • Undergraduate
ActiveFromDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Date the Learning framework became active.
ActiveToDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Date the Learning framework became inactive.
CipCode	**Type** string **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Classification of Instructional Programming code that identifies the program or field of study.

Field	Details
Description	**Type** textarea **Properties** Create, Nillable, Update **Description** Description of the Learning framework.
Duration	**Type** double **Properties** Create, Filter, Nillable, Sort, Update **Description** The allocated length of time for completion of the Learning.
DurationUnit	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** The unit of measurement for the length of time for completion. Possible values are: • Clock Hours • Continuing Education Units • Credit Hours • No Credit • Other
IsActive	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Specifies that the Learning framework is active. The default value is `false`.
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update

Field	Details
	Description
	Indicates whether the record is locked (true) or not (false).
	The default value is `false`.
LastReferencedDate	**Type**
	dateTime
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type**
	dateTime
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type**
	boolean
	Properties
	Defaulted on create, Filter, Group, Sort
	Description
	Indicates whether the record can be edited (true) or not (false).
	The default value is `false`.
Name	**Type**
	string
	Properties
	Create, Filter, Group, idLookup, Sort, Update
	Description
	Name of the Learning framework.
OwnerId	**Type**
	reference
	Properties
	Create, Defaulted on create, Filter, Group, Sort, Update

Field	Details
	Description The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User
ProviderId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Account of the institution that provides the Learning. This field is a relationship field. **Relationship Name** Provider **Relationship Type** Lookup **Refers To** Account
Type	**Type** picklist **Properties** Create, Filter, Group, Nillable, Restricted picklist, Sort, Update **Description** Specifies the type of Learning. Possible values are: • LearningCourse • LearningProgram

LearningAchievement

Represents information about the outcome of a learning activity. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(),
retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
Abbreviation	**Type** string **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Short name for a Learning Achievement.
AcademicLevel	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** The applicable point in the education process. Possible values are: • Adult Education • Doctoral • Elementary • Graduate • High School • Middle School • Post-Baccalaureate Certificate • Pre-K/Preschool • Professional Education • Undergraduate
Description	**Type** textarea **Properties** Create, Nillable, Update **Description** Description of a Learning Achievement.

Field	Details
FieldOfStudy	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** The academic subject related to the course of study. Possible values are: • `Career and Technical Education` • `Composite` • `Critical Reading` • `English` • `English Language Arts` • `Fine and Performing Arts` • `Foreign Language and Literature` • `Life and Physical Sciences` • `Mathematics` • `Military Science` • `Other` • `Physical, Health, and Safety Education` • `Reading` • `Religious Education and Theology` • `Science` • `Social Sciences and History` • `Social Studies` • `Writing`
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
IssuerId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update

Field	Details
	Description The institution that grants the credential. This field is a relationship field.
	Relationship Name Issuer
	Relationship Type Lookup
	Refers To Account
LastReferencedDate	**Type** dateTime
	Properties Filter, Nillable, Sort
	Description The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime
	Properties Filter, Nillable, Sort
	Description The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type** boolean
	Properties Defaulted on create, Filter, Group, Sort
	Description Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string
	Properties Create, Filter, Group, idLookup, Sort, Update

Field	Details
	Description Name of a Learning Achievement that represents a modeled qualification, achievement, or other program outcome. Used to provide a meaningful mapping between Learnings and the result of their successful completion.
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User
Specialization	**Type** string **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Narrows the category, subject, area of study, discipline, or general branch of knowledge that the achievement was awarded for.

LearningCourse

Represents information about a course that's required in a learning framework. This object is available in API version 57.0 and later.

Supported Calls

`create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()`

Fields

Field	Details

CourseLevelDescription

Type
picklist

Properties
Create, Filter, Group, Restricted picklist, Nillable, Sort, Update

Description
The general type or level of instruction provided throughout the course.

Possible values are:

- Accepted as high school equivalent
- Advanced
- Advanced Placement
- Basic
- Career and Technical Education
- College-level
- Core Subject
- Dual Credit
- English Language Learner
- General
- Gifted and Talented
- Graduation Credit
- Honors
- International Baccalaureate
- Other
- Remedial
- Students with disabilities
- Untracked

CourseNumber

Type
string

Properties
Create, Filter, Group, Nillable, Sort, Update

Description
The number that identifies the level of the course and helps organize the course catalog.

FieldOfStudy

Type
picklist

Properties
Create, Filter, Group, Restricted picklist, Nillable, Sort, Update

Field	Details
	Description The academic subject related to the course of study. Possible values are: • `Career and Technical Education` • `Composite` • `Critical Reading` • `English` • `English Language Arts` • `Fine and Performing Arts` • `Foreign Language and Literature` • `Life and Physical Sciences` • `Mathematics` • `Military Science` • `Other` • `Physical, Health, and Safety Education` • `Reading` • `Religious Education and Theology` • `Science` • `Social Sciences and History` • `Social Studies` • `Writing`
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.

Field	Details
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LearningId	**Type** reference **Properties** Create, Filter, Group, Sort **Description** Learning (unique parent field) associated with a Learning Course. This field is a relationship field. **Relationship Name** Learning **Relationship Type** Lookup **Refers To** Learning
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** Name of a course of study that represents a single unit of teaching that typically lasts one term.
SubjectAbbreviation	**Type** string

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description Abbreviation of the Academic Subject for the course of study. For example, MAT = Mathematics.

LearningFoundationItem

Represents information about the prerequisite, co-requisite, or the recommended learning that's required for a learning outcome. This object is available in API version 57.0 and later.

Supported Calls

`create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()`

Fields

Field	Details
Duration	**Type** double **Properties** Create, Filter, Nillable, Sort, Update **Description** The allocated length of time for completion of the Learning.
DurationUnit	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** The unit of measurement for length of time for completion of the Learning. Possible values are: • `Clock Hours` • `Continuing Education Units` • `Credit Hours` • `No Credit` • `Other`

Field	Details
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LearningAchievementId	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** A modeled qualification, achievement, or other program outcome used for the Learning Foundation. This field is a relationship field. **Relationship Name** LearningAchievement **Relationship Type** Lookup **Refers To** LearningAchievement

Field	Details
LearningId	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** Prerequisite, co-requisite or recommended Learning to attain a Learning Achievement. This field is a relationship field. **Relationship Name** Learning **Relationship Type** Lookup **Refers To** Learning
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Autonumber, Defaulted on create, Filter, idLookup, Sort **Description** Name of the mapping between the Learning and the Learning Achievement requirements.
Type	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Type of Learning Foundation Item. Possible values are: • `Co-requisite` • `Prerequisite` • `Recommended`

LearningOutcomeItem

Represents information about the mapping between the learnings and the related outcome. This object is available in API version 57.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
Duration	**Type** double **Properties** Create, Filter, Nillable, Sort, Update **Description** The allocated length of time for completion of the Learning.
DurationUnit	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** The unit of measurement for length of time for the completion of the Learning. Possible values are: • `Clock Hours` • `Continuing Education Units` • `Credit Hours` • `No Credit` • `Other`
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.

Field	Details
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LearningAchievementId	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** The Learning Achievement that's granted upon the completion of the Learning. This field is a relationship field. **Relationship Name** LearningAchievement **Relationship Type** Lookup **Refers To** LearningAchievement
LearningId	**Type** reference **Properties** Create, Filter, Group, Sort **Description** The Learning framework that's related to the Learning Outcome Item. This field is a relationship field. **Relationship Name** Learning

Field	Details
	Relationship Type Lookup **Refers To** Learning
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Autonumber, Defaulted on create, Filter, idLookup, Sort **Description** Name of the mapping between the Learning and the Learning Achievements that it provides.

LearningProgram

Represents information about one or more trainings in a program that's required to obtain a credential. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false).

Field	Details
	The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LearningId	**Type** reference **Properties** Create, Filter, Group, Sort **Description** Learning (unique parent field) associated with a Learning Program. This field is a relationship field. **Relationship Name** Learning **Relationship Type** Lookup **Refers To** Learning
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.

Field	Details
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** Name of the Learning Program that leads to a Learning Achievement.

LearningProgramPlan

Represents details of a plan that's created to execute a Learning Program. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(),
retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
ActiveFromDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date the Learning Program Plan became active.
ActiveToDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The date after which the Learning Program Plan is inactive.
Description	**Type** textarea **Properties** Create, Nillable, Update **Description** Description of the Learning Program Plan.

Field	Details
IsActive	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Specifies whether the Learning Program Plan is active or not. The default value is `false`.
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LearningProgramId	**Type** reference **Properties** Create, Filter, Group, Sort **Description** The Learning Program associated with the Learning Program Plan. This field is a relationship field.

Field	Details
	Relationship Name LearningProgram
	Relationship Type Lookup
	Refers To LearningProgram
MayEdit	**Type** boolean
	Properties Defaulted on create, Filter, Group, Sort
	Description Indicates whether the record can be edited (true) or not (false). The default value is `false`.
MinimumProgramGradePointAvg	**Type** double
	Properties Create, Filter, Nillable, Sort, Update
	Description The minimum cumulative GPA that's required to complete the program.
Name	**Type** string
	Properties Create, Filter, Group, idLookup, Sort, Update
	Description The name of the Learning Program Plan.
ProviderId	**Type** reference
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description The Account of the institution that provides the Learning Program Plan. This field is a relationship field.
	Relationship Name Provider
	Relationship Type Lookup

Field	Details
	Refers To Account
VersionNumber	**Type** double **Properties** Create, Filter, Nillable, Sort, Update **Description** Specifies the version of the Learning Program Plan.

LearningProgramPlanRqmt

Represents information about the requirements of a learning outcome that's included in the learning program plan. This object is available in API version 57.0 and later.

Supported Calls

```
create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(),
retrieve(), search(), undelete(), update(), upsert()
```

Fields

Field	Details
Description	**Type** textarea **Properties** Create, Nillable, Update **Description** The description of the Learning Program Plan Requirement.
Duration	**Type** double **Properties** Create, Filter, Nillable, Sort, Update **Description** The allocated length of time for completion of the requirement.
DurationUnit	**Type** picklist

Field	Details
	Properties Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** The unit of measurement for length of time for completion of the requirement. Example values include Credit Hours, Clock Hours, No Credit, Continuing Education Units, Other. Possible values are: • `Clock Hours` • `Continuing Education Units` • `Credit Hours` • `No Credit` • `Other`
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LearningAchievementId	**Type** reference **Properties** Create, Filter, Group, Sort, Update

Field	Details
	Description The Learning Achievement associated with the Learning Program Plan Requirement. This field is a relationship field.
	Relationship Name LearningAchievement
	Relationship Type Lookup
	Refers To LearningAchievement
LearningProgramPlanId	**Type** reference
	Properties Create, Filter, Group, Sort
	Description The Learning Program Plan associated with the Learning Program Plan Requirement. This field is a relationship field.
	Relationship Name LearningProgramPlan
	Relationship Type Lookup
	Refers To LearningProgramPlan
MayEdit	**Type** boolean
	Properties Defaulted on create, Filter, Group, Sort
	Description Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string
	Properties Create, Filter, Group, idLookup, Sort, Update
	Description The name of the requirement for a Learning Program Plan.
SequenceNumber	**Type** int

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description The order that the course or other requirement should be taken within a Learning Program Plan.

LocationUse

Records the general purpose of the Location. This object is available in API version 57.0 and later.

Supported Calls

`create(), delete(), describeSObjects(), query(), retrieve(), update(), upsert()`

Fields

Field	Details
DeveloperName	**Type** string **Properties** Create, Filter, Group, Sort, Update **Description** Name of the developer of the location.
IsBookable	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates if the location is bookable. The default value is `false`.
Language	**Type** picklist **Properties** Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update **Description** Specifies the language in use at the location. Possible values are:

Field	Details
	- da – Danish - de – German - en_US – English - es – Spanish - es_MX – Spanish (Mexico) - fi – Finnish - fr – French - it – Italian - ja – Japanese - ko – Korean - nl_NL – Dutch - no – Norwegian - pt_BR – Portuguese (Brazil) - ru – Russian - sv – Swedish - th – Thai - zh_CN – Chinese (Simplified) - zh_CN – Chinese (Traditional)
LocationType	**Type** picklist **Properties** Create, Filter, Group, Sort, Update **Description** Specifies the type of the location. Possible values are: - Building - Campus - Other - Room
MasterLabel	**Type** string **Properties** Create, Filter, Group, Sort, Update **Description** The label that identifies this record throughout the user interface.

Field	Details
Use	**Type** string **Properties** Create, Filter, Nillable, Sort, Update **Description** Specifies what the location is used for.

PersonDisability

Represents information about a person's disability. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
IndividualId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The individual associated with the disability. This field is a polymorphic relationship field. **Relationship Name** Individual **Relationship Type** Lookup **Refers To** Account, Contact, Individual
IsAccommodationRequired	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the individual requires accommodation.

Field	Details
	The default value is `false`.
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** The name for this record.

Field	Details
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User
Rank	**Type** int **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the level of disability.
Status	**Type** picklist **Properties** Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update **Description** Specifies the status of the disability. Possible values are: • `Permanent` • `Temporary` The default value is `Temporary`.
Type	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the type of disability. Possible values are: • `Blindness`

Field	Details
	• Cognitive
	• Hearing impairment
VerificationDate	**Type**
	date
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The date when the disability was verified.
VerifiedBy	**Type**
	picklist
	Properties
	Create, Defaulted on create, Filter, Group, Nillable, Restricted picklist, Sort, Update
	Description
	Specifies the verifier of the disability in the individual.
	Possible values are:
	• HealthcareProvider
	• Other
	• Physician
	• Psychologist
	• SelfReported
	• SocialWorker
	• Teacher
	• Therapist
	The default value is Physician.
VerifiedByOther	**Type**
	string
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	Specifies the verifier of the disability if its other than what is listed in VerifiedBy.

ProgramTermApplnTimeline

Represents a junction between Academic Term, Application Timeline, and Learning Program objects. This object is available in API version 57.0 and later.

Supported Calls

`create()`,`delete()`,`describeLayout()`,`describeSObjects()`,`getDeleted()`,`getUpdated()`,`query()`,
`retrieve()`,`search()`,`undelete()`,`update()`,`upsert()`

Fields

Field	Details
AcademicTermId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The associated Academic Term for which the program is being offered. This field is a relationship field. **Relationship Name** AcademicTerm **Relationship Type** Lookup **Refers To** AcademicTerm
ApplicationTimelineId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The associated Application Timeline that determines when admissions to the program for this term are open. This field is a relationship field. **Relationship Name** ApplicationTimeline **Relationship Type** Lookup **Refers To** ApplicationTimeline
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update

107

Field	Details
	Description
	Indicates whether the record is locked (true) or not (false).
	The default value is `false`.
LastReferencedDate	**Type**
	dateTime
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type**
	dateTime
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
LearningProgramId	**Type**
	reference
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The associated Learning Program which is accepting students for admission.
	This field is a relationship field.
	Relationship Name
	LearningProgram
	Relationship Type
	Lookup
	Refers To
	LearningProgram
MayEdit	**Type**
	boolean
	Properties
	Defaulted on create, Filter, Group, Sort
	Description
	Indicates whether the record can be edited (true) or not (false).

Field	Details
	The default value is `false`.
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** The name for this record.
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User

SuccessTeam

Records details about a success team in Salesforce Scheduler. This object is available in API version 57.0 and later.

Supported Calls

`create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()`

Fields

Field	Details
AccountId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update

Field	Details
	Description The account associated with the success team. This field is a relationship field.
	Relationship Name Account
	Relationship Type Lookup
	Refers To Account
CanSelfSchedule	**Type** boolean
	Properties Create, Defaulted on create, Filter, Group, Sort, Update
	Description Specifies whether the success team can be self scheduled (true) or not (false). The default value is `false`.
CaseRecordTypeId	**Type** reference
	Properties Create, Filter, Group, Sort, Update
	Description The case record type associated with the success team. This field is a relationship field.
	Relationship Name CaseRecordType
	Relationship Type Lookup
	Refers To RecordType
DefaultUnassignedCaseTeam	**Type** string
	Properties Create, Filter, Group, Sort, Update
	Description The default case team that is unassigned.
IsActive	**Type** boolean

Field	Details
	Properties
	Create, Defaulted on create, Filter, Group, Sort, Update
	Description
	Specifies whether the success team is active (true) or not (false).
	The default value is `false`.
IsLocked	**Type**
	boolean
	Properties
	Defaulted on create, Filter, Group, Sort
	Description
	Indicates whether the record is locked (true) or not (false).
	The default value is `false`.
LastReferencedDate	**Type**
	dateTime
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type**
	dateTime
	Properties
	Filter, Nillable, Sort
	Description
	The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type**
	boolean
	Properties
	Defaulted on create, Filter, Group, Sort
	Description
	Indicates whether the record can be edited (true) or not (false).
	The default value is `false`.
Name	**Type**
	string

Field	Details
	Properties Create, Filter, Group, idLookup, Sort, Update
	Description The name of the success team.
OwnerId	**Type** reference
	Properties Create, Defaulted on create, Filter, Group, Sort, Update
	Description The user who owns this record. This field is a polymorphic relationship field.
	Relationship Name Owner
	Relationship Type Lookup
	Refers To Group, User

WorkTypeGroupRole

Represents a grouping of work types by roles, used to categorize types of appointments available in Salesforce Scheduler. This object is available in API version 57.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
CaseTeamRole	**Type** string
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description The role of the case team.

Field	Details
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Autonumber, Defaulted on create, Filter, idLookup, Sort **Description** The name for the work type group role.

Field	Details
WorkTypeGroupId	**Type** reference **Properties** Create, Filter, Group, Sort, Update **Description** The work type group associated with this work type group role. This field is a relationship field. **Relationship Name** WorkTypeGroup **Relationship Type** Lookup **Refers To** WorkTypeGroup

CHAPTER 5   Education Cloud Fields on Standard Objects

In this chapter ...

- CourseOffering
- Location
- PersonEducation
- PersonEmployment
- PersonExamination
- PreliminaryApplicationRef
- ServiceTerritoryMember

This section lists Education Cloud fields available with standard Salesforce objects. These fields are available only in orgs where Education Cloud is enabled.

CourseOffering

Represents an instance of a training course with location and date details of training courses. This object is available in API version 57.0 and later.

Supported Calls

`create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()`

Fields

Field	Details
AcademicSessionId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The Academic Session associated with the Course Offering. This field is a relationship field. **Relationship Name** AcademicSession **Relationship Type** Lookup **Refers To** AcademicSession
EnrolleeCount	**Type** int **Properties** Filter, Group, Nillable, Sort **Description** The current number of enrollees in the Course Offering.
EnrollmentCapacity	**Type** int **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The maximum number of students that are allowed to enroll for the Course Offering.

Field	Details
LearningCourseId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The Learning Course record associated with the Course Offering. This field is a relationship field. **Relationship Name** LearningCourse **Relationship Type** Lookup **Refers To** LearningCourse
PrimaryFacultyId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The Contact associated with the Course Offering as lead instructor. This field is a relationship field. **Relationship Name** PrimaryFaculty **Relationship Type** Lookup **Refers To** Contact
SectionNumber	**Type** string **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Differentiates a Course Offering from other sections in an academic term.
WaitlistCapacity	**Type** int **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The maximum number of students that can be waitlisted for the Course Offering.

Field	Details
WaitlistCount	**Type** int
	Properties Filter, Group, Nillable, Sort
	Description The current number of people on the waitlist for the Course Offering.

For more information, see CourseOffering in Public Sector Solutions.

Location

Represents details about a facility, building, room, or region. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
MaximumOccupancy	**Type** int
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description The maximum occupancy of the location.
OwnershipStatus	**Type** picklist
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description Specifies the status of ownership of the facility. Possible values are: • Leased • Other • Owned • Rented

For more information, see Location in Salesforce Platform Objects.

PersonEducation

Represents information about the academic standing of an applicant. This object is available in API version 57.0 and later.

Supported Calls

create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()

Fields

Field	Details
ClassRank	**Type** string **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The measure of the applicant's academic performance compared to the other students in their class. This rank is based on the class rank reporting format that's followed by the institute, such as a number or percentage.
ClassRankReportingFormat	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the class rank reporting format followed by the institution to report the applicant's performance. Possible values are: • Decile • Exact • None • Quartile • Quintile
ClassRankWeightingType	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update

Field	Details
	Description
	Specifies the GPA weighting type that's used to calculate the applicant's class rank.
	Possible values are:
	• `Unweighted`
	• `Weighted`
Comment	**Type**
	reference
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	Comments on the applicant's education details.
CumulativeGpa	**Type**
	double
	Properties
	Create, Filter, Nillable, Sort, Update
	Description
	The grade point average of all the grades earned by an applicant in all the semesters or terms.
EducationLevel	**Type**
	picklist
	Properties
	Create, Defaulted on create, Filter, Group, Nillable, Sort, Update
	Description
	Level of education achieved.
	Possible values are:
	• `Graduate`
	• `High School`
	• `No Formal Education`
	• `Post Graduate`
	The default value is `Fellowship`.
EndDate	**Type**
	date
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The end date of the individual's education.

Field	Details
GpaScale	**Type** int **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The scale used when calculating the applicant's grade point average.
GpaWeightingType	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the type of weightage given to the applicant's grades when calculating their grade point average. Possible values are: • `Unweighted` • `Weighted`
GraduationClassSize	**Type** int **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The number of students who graduated from the same school, in the same academic year, as the applicant.
InstitutionAccountId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The institution associated with the applicant's education. This field is a relationship field. **Relationship Name** Individual **Relationship Type** Lookup **Refers To** Individual

Field	Details
IsActive	**Type** boolean **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is active. The default value is `false`.

For more information, see PersonEducation in Public Sector Solutions.

PersonEmployment

Represents information about a person's employment. This object is available in API version 57.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
AnnualIncome	**Type** currency **Properties** Create, Filter, Nillable, Sort, Update **Description** The annual income of the person.
EmployerAddress	**Type** address **Properties** Filter, Nillable **Description** The complete address of the employer.
EmployerCity	**Type** string

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description The city where the employer is located.
EmployerCountry	**Type** string
	Properties Create, Filter, Group, Nillable, Sort, Update
	Description The country where the employer is located.
EmployerGeocodeAccuracy	**Type** picklist
	Properties Create, Filter, Group, Nillable, Restricted picklist, Sort, Update
	Description The level of accuracy of a location's geographical coordinates compared with its physical address. A geocoding service typically provides this value based on the address's latitude and longitude coordinates. Possible values are: • Address • Block • City • County • ExtendedZip • NearAddress • Neighborhood • State • Street • Unknown • Zip
EmployerLatitude	**Type** double
	Properties Create, Filter, Nillable, Sort, Update
	Description Used with Longitude to specify the precise geolocation of the address. Acceptable values are numbers between −90 and 90 with up to 15 decimal places.

Field	Details
EmployerLongitude	**Type** double **Properties** Create, Filter, Nillable, Sort, Update **Description** Used with Latitude to specify the precise geolocation of the address. Acceptable values are numbers between −180 and 180 with up to 15 decimal places.
EmployerPhone	**Type** phone **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Employer's phone number.
EmployerPostalCode	**Type** string **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The postal code of the employer's address.
EmployerState	**Type** string **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The state of the employer's address.
EmployerStreet	**Type** textarea **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The street address of the employer.
EmploymentStatus	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update

Field	Details
	Description Specifies the employment status with the employer. Possible values are: • `Employed` • `Retired` • `Self-Employed` • `Unemployed`
EndDate	**Type** date **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The last date of employment at this job.
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.

Field	Details
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Create, Filter, Group, idLookup, Sort, Update **Description** The name for this record.
Occupation	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the person's occupation. Possible values are: • `Actor or Entertainer` • `Architect or Urban Planner` • `Artist` • `Business (Clerical)` • `Business Executive (Management, Administrator)` • `Business Owner or Proprietor` • `Business Salesperson or Buyer` • `Clergy (Minister, Priest)` • `Clergy (Other Religious)` • `Clinical Psychologist` • `College Administrator or Staff` • `College Teacher` • `Computer Programmer or Analyst` • `Conservationist or Forester` • `Dentist (Including Orthodontist)` • `Dietitian or Nutritionist` • `Engineer`

Field	Details
	• Farmer or Rancher • Foreign Service Worker (Including Diplomat) • Homemaker (Full-Time) • Interior Decorator (Including Designer) • Lab Technician or Hygienist • Laborer • Law Enforcement Officer • Lawyer (Attorney) or Judge • Military Service (Career) • Musician (Performer, Composer) • Nurse • Optometrist • Other • Pharmacist • Physician • Policymaker or Government • School Counselor • School Principal or Superintendent • Scientific Researcher • Skilled Trades • Social, Welfare, or Recreation Worker • Teacher or Administrator (Elementary) • Teacher or Administrator (Secondary) • Therapist (Physical, Occupational, Speech) • Veterinarian • Writer or Journalist
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** The user who owns this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup

Field	Details
	Refers To
	Group, User
Position	**Type**
	string
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The last position of the person at this job.
RelatedPersonId	**Type**
	reference
	Properties
	Create, Filter, Group, Sort, Update
	Description
	The person associated with the employment.
	This field is a polymorphic relationship field.
	Relationship Name
	RelatedPerson
	Relationship Type
	Lookup
	Refers To
	Account, Contact
StartDate	**Type**
	date
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	The start date of employment at this job.

PersonExamination

Represents the examinations taken by a person. This object is available in API version 57.0 and later.

Supported Calls

`create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), undelete(), update(), upsert()`

Fields

Field	Details
ContactId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** ID of the contact related to this record. This field is a relationship field. **Relationship Name** Contact **Relationship Type** Lookup **Refers To** Contact
EffectiveFrom	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** Date from which the examination is effective from.
EffectiveTo	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** Date till which the examination is effective.
ExaminationDate	**Type** dateTime **Properties** Create, Filter, Nillable, Sort, Update **Description** Date the examination was taken.
ExaminationId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update

Field	Details
	Description ID of the examination. This field is a relationship field. **Relationship Name** Examination **Relationship Type** Lookup **Refers To** Examination
InstitutionName	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Name of the institution offering the examination. Possible values are: - Abitur - Apolytirion - Baccalauréat (BAC) - Cambridge Internation Education Pre-University (CIE Pre-U) - Caribbean Advanced Proficiency Exam II (CAPE) - Center Shiken or Kyotsu Tests - Chinese National Entrance Examination (Gao Kao) or Joint Entrance Examination (JEE) - College Scholastic Ability Test (CSAT) - Concurso Nacional de Acesso ao Ensino Superior (CNA) - Emerites Standardized Test (EmSAT) - Ethiopian School Leaving Certificate Exams (ESLCE) or Ethiopian Higher Education Entrance - European Baccalaureate - GCE-Advanced Level Examinations (GCE-A Levels) - Higher / Level 6 - Higher Secondary Certificate (HSC) - Higher Secondary Education Board Examination (HSEBE) or School Leaving Certificate (SLC) - Higher Secondary School Certificate (HSSC) - Indian Certificate of Secondary Education - Class X (ICSE)

Field	Details
	• Indian School Certificate - Class XII (ISC)
	• Irish Leaving Certificate
	• Kenya Certificate of Secondary Education (KCSE)
	• Matriculation and Secondary Education Certificate (MATSEC)
	• Matura (Maturita)
	• Other
	• Prueba de Selección Universitaria (PSU)
	• Sijil Tinggi Persekolahan Malaysia (STPM)
	• Te'udat Bagrut
	• Tertiary Entrance Rank (TER) or Universities Admission Index (UAI)
	• Thanaweya Amma
	• Western African Senior School Certificate Examination (WASSCE)
IsLocked	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort, Update **Description** Indicates whether the record is locked (true) or not (false). The default value is `false`.
LastReferencedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last accessed this record, a record related to this record, or a list view.
LastViewedDate	**Type** dateTime **Properties** Filter, Nillable, Sort **Description** The timestamp when the current user last viewed this record or list view. If this value is null, the user might have only accessed this record or list view (`LastReferencedDate`) but not viewed it.

Field	Details
MayEdit	**Type** boolean **Properties** Defaulted on create, Filter, Group, Sort **Description** Indicates whether the record can be edited (true) or not (false). The default value is `false`.
Name	**Type** string **Properties** Autonumber, Defaulted on create, Filter, idLookup, Sort **Description** The name for this record.
OwnerId	**Type** reference **Properties** Create, Defaulted on create, Filter, Group, Sort, Update **Description** ID of the owner of this record. This field is a polymorphic relationship field. **Relationship Name** Owner **Relationship Type** Lookup **Refers To** Group, User
ParentPersonExaminationId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The parent Person Examination associated with this examination. This field is a relationship field. **Relationship Name** ParentPersonExamination **Relationship Type** Lookup

Field	Details
	Refers To PersonExamination
Result	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Result of the examination. Possible values are: • Fail • Pass
Score	**Type** int **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Score secured in the examination.
ScoreType	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Specifies the type of examination score. Possible values are: • Actual • Predicted
SubjectName	**Type** picklist **Properties** Create, Filter, Group, Restricted picklist, Nillable, Sort, Update **Description** Specifies the academic subject associated with the examination. Possible values are: • English • Mathematics • Reading

Field	Details
	• `Reading and Writing`
	• `Science`
	• `Writing`
	• `Composite`
`VerificationDateTime`	**Type**
	dateTime
	Properties
	Create, Filter, Nillable, Sort, Update
	Description
	Date and time the examination details were verified.
`VerificationStatus`	**Type**
	picklist
	Properties
	Create, Filter, Group, Nillable, Sort, Update
	Description
	Status of the examination details verification.
	Possible values are:
	• `Accepted`
	• `Rejected`
	• `Verified`
	• `Waived`

PreliminaryApplicationRef

Represents details about saved applications. This object is available in API version 57.0 and later.

Supported Calls

`create()`, `delete()`, `describeLayout()`, `describeSObjects()`, `getDeleted()`, `getUpdated()`, `query()`, `retrieve()`, `search()`, `undelete()`, `update()`, `upsert()`

Fields

Field	Details
`ApplicantId`	**Type**
	reference

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update **Description** The contact record associated with the person who submitted the application. This field is a relationship field. **Relationship Name** Applicant **Relationship Type** Lookup **Refers To** Contact
ApplicationCategory	**Type** picklist **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** Specifies the category of the application based on the admission decision period. Possible values are: • `Early Decision` • `Regular Decision`
ProgramTermApplnTimelineId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The program term application timeline associated with the preliminary application reference record. This field is a relationship field. **Relationship Name** ProgramTermApplnTimeline **Relationship Type** Lookup **Refers To** ProgramTermApplnTimeline
SubmissionDate	**Type** date

Field	Details
	Properties Create, Filter, Group, Nillable, Sort, Update **Description** The date when the application was submitted.

ServiceTerritoryMember

Represents a service resource who can be assigned in a service territory in Field Service, Salesforce Scheduler, Workforce Engagement, or Education Cloud. This object is available in API version 57.0 and later.

Supported Calls

`create(), delete(), describeLayout(), describeSObjects(), getDeleted(), getUpdated(), query(), retrieve(), search(), update(), upsert()`

Fields

Field	Details
LocationId	**Type** reference **Properties** Create, Filter, Group, Nillable, Sort, Update **Description** The location where the service resource takes appointments. This field is a relationship field. **Relationship Name** Location **Relationship Type** Lookup **Refers To** Location

For more information, see ServiceTerritoryMember in Salesforce Scheduler.
